

## The SAS<sup>®</sup> System Version 9 (TS M0) AIX<sup>®</sup>

### Please Read Before Beginning Installation

Alert Notes list problems that you need to be aware of before installing or using this software. Fixes and/or workarounds may be provided for the problems. Should you need assistance with the software, we ask that only the SAS Representative or SAS Support Consultant call our Technical Support Division. Sites in the U.S. and Canada may call (919) 677-8008. Other sites should contact their SAS Representative or SAS Support Consultant for the nearest SAS office.

### Installation and General System Issues

- Alert Notes about Installation and General System Issues are the only Alert Notes included in this document.
- For the latest Alert Notes about Installation, General System Issues, or product-specific issues, visit the following SAS Web site:

[http://www.sas.com/service/techsup/search/alert\\_search.html](http://www.sas.com/service/techsup/search/alert_search.html)

This Web page gives you the following search options:

- Operating System
- Release
- Sorted by
- Product
- Component

SAS recommends that you perform two searches - one in which "component" is *Installation Issues* and one in which "component" is *General System Issues*.

In addition, you may want to perform a third search in which "component" is *All Components* and select a product to view product-specific Alert Notes.

- The SAS Data Quality - Cleanse product is driven by a collection of files known as the Quality Knowledge Base (QKB). The Quality Knowledge Base defines rules, criteria, and data by which data cleansing can be performed.

The SAS System 9 installation media contains a Quality Knowledge Base that supports the ENUSA locale (English, United States) as part of the SAS Data Quality - Cleanse product, and the DEDEU

locale (German, Germany) as part of the SAS Data Quality - Cleanse, International Edition product. This Quality Knowledge Base is "beta" quality and is now obsolete.

Immediately after installing SAS System 9, you must obtain an updated production status Quality Knowledge Base from:

<http://www.dataflux.com/QKB>

The use of a production status Quality Knowledge Base obtained from this Web site is required in order to achieve and maintain production quality status for the SAS System 9, SAS Data Quality - Cleanse product. SAS Note SN-008835 documents this Alert Note.

- After your initial query of Alert Notes from the Web site listed above, it is essential that one or more representatives at your site subscribe to TSNEWS-L in order to receive future Alert Notes concerning your software. By subscribing, we will automatically e-mail you with any new Alert Notes, removing the need for frequent visits to the Web site.

To subscribe through e-mail, send e-mail to [LISTSERV@VM.SAS.COM](mailto:LISTSERV@VM.SAS.COM). The body of the e-mail should read SUBSCRIBE TSNEWS-L.

To subscribe through Technical Support's Web site, complete the Web form located at:

<http://www.sas.com/service/techsup/news/tsnews.html>
