

INSTALLATION INSTRUCTIONS

User Installation Guide for the SAS® System Version 9 for 64-bit Microsoft® Windows®

- Where to Begin
- The SAS Setup Wizard
- Install the SAS System Viewer
- Repair or Remove SAS Software

Where to Begin

Most people who install the SAS System can be considered either administrators or end users. This *User Installation Guide* is intended for end users. The instructions on the following pages will help you install the SAS System Version 9.

If you need to perform a setup or other system administration tasks, please refer to the *Administrator Guide for the SAS® System Version 9 for 64-bit Microsoft® Windows®*.

To find configuration information and instructions for customizing the installation of specific SAS components and products, please refer to *Post-Installation Guide for the SAS® System Version 9 for 64-bit Microsoft® Windows®*.

Successful Installation

SAS Technical Support strongly recommends that you shut down all programs, including virus-scanning programs, before proceeding with this installation. Keeping a virus program running increases the possibility that one or more reinstallations of SAS software will be necessary.

Installing the SAS® System Version 9 for 64-bit Microsoft® Windows®

A Personal installation uses the SAS Installation Wizard, SAS Setup, to install all the software you need to run on your PC.

Personal Installation

In general, users who complete a Personal Installation of the SAS System are planning to run SAS without a server installation of SAS software in the network.

If you are installing from CDs, you are installing a Personal Installation. A Personal Installation can also be performed by using the SAS Setup Wizard from a network location created by your System Administrator.

The SAS Setup Wizard for End Users

This section describes the steps required to install and run SAS. Users respond to the dialogs as each window is presented.

Most of the dialogs described below offer directions printed in bold text. The lines that begin with bolded words represent the quickest setup method. Dialogs that are shown indented below may not be a part of your installation.

All Setup dialogs are listed below according to the order in which SAS Setup presents them, with the exception of the dialogs that can appear more than once. These are grouped on page 8.

Starting the SAS Setup Wizard

To start SAS Setup, complete the following three steps:

1. Insert the CD-ROM labeled “Setup Disk” into the source drive. The SAS System AutoPlay should appear if AutoPlay is enabled on your computer.

If this does not happen, or if you are running from a network location provided by your administrator, select the Run menu option from the Windows Start menu and type:

```
<source_drive>:\SETUP
```

In this context, *<source_drive>* is the drive containing the SAS System installation media.

2. Select “Install SAS Software” from the list of options.

SAS Setup Wizard Dialogs

Sequence of Setup Windows

- Welcome to the SAS Setup Wizard
- Retrieve SAS Installation Data
 - SAS Installation Data
 - SAS Installation Data Not Found
 - Language Selections
 - Default Language
 - Add/Remove SAS Software
 - SAS Shared Files
 - Choose Destination Folder
 - Specify Data Files Folder
 - Specify Temporary Files Folder
 - Select Components
 - Start Copying Files
 - Confirm Update
- SAS Setup Complete

SAS Setup Wizard Dialogs & Directions

Read *Welcome to the SAS Setup Wizard*

Click Next.

Or, click Cancel to exit the SAS Setup Wizard.

Read *Retrieve SAS Installation Data*

Select Existing, unless you plan to specify a different file, or expect to provide the SAS Installation Data later.

Most users can use the network location provided by an administrator.

However, if your SAS Installation Data is in a different location, select File to enter that location on the *SAS Installation Data File* dialog. More information on that window can be found below.

Click Next.

Or, click Back to view the previous screen, or click Cancel to exit Setup.

Read *SAS Installation Data*, if Setup displays this window.

Type the full path for your SAS Installation Data file, or click Browse to locate the directory.

If the SAS Installation Data file cannot be found, you will receive an error message.

Click Next

Or, click Back to view the *Retrieve SAS Installation Data* screen, or click Cancel to exit Setup.

Read *SAS Installation Data Not Found*, if Setup displays this window.

Click Okay

Deleted: .
Deleted: of the SAS System

Read *Language Selections*, if Setup displays this window.

Click **Select All** to choose all the languages that are available to you, or select **Clear All** to deselect the chosen listings.

Click **Next**.

Or, click **Back** to view the previous window, or click **Cancel** to exit Setup.

Read *Default Language*, if Setup displays this window.

This window displays all the languages chosen on the *Language Selections* window.

Click the box next to the language that you want to select for your default language.

Click **Next**.

Or, click **Back** to view the *Language Selections* window, or click **Cancel** to exit Setup.

Read *SAS Shared Files* if Setup displays this window.

Some files that are installed by Setup are shared between multiple SAS products and/or multiple SAS releases. Most users can use the location listed on the screen.

If you want your shared files in another folder, click **Browse**.

If you have not installed SAS before, or if you have uninstalled SAS and cleaned your Windows registry, you will be prompted for the location of these files.

Click **Next**.

Or, click **Back** to view the previous screen, or click **Cancel** to exit Setup.

Read *Choose Destination Folder*

Click **Next** to install SAS in the destination folder listed on the screen.

Or, click **Browse** to choose a different folder. Click **Back** to view the previous screen, or click **Cancel** to exit Setup.

Read *Specify Data Files Folder*

By default, the Windows user profile directory is created in the location shown in this window. If you select this default choice for the Windows directory, multiple users can use SAS on the same computer.

Personal data folders are created automatically.

Click **Next** to accept the default directory, or click **Browse** to specify a different directory. Click **Back** to view the *Choose Destination Location* screen, or click **Cancel** to exit Setup.

Read *Specify Temporary Files Folder*

As SAS processes your data, temporary files are created.

Click **Next** to select the folder listed on the screen as the location for these temporary files.

Or, click **Browse** to specify a different folder. Click **Back** to view the *Specify Data Files Folder* screen, or click **Cancel** to exit Setup.

Deleted: User Installation Guide for Version 9 of the SAS System for Microsoft Windows

Read *Select Components*

This window displays the components that have been selected for your installation. To make changes to this list, select the components that you want to install, and deselect the components that you do not want to install. Click *Select Licensed Software* as a quick way to select only the components that are listed in your software license.

Click Next.

Or, click *Back* to view the *Specify Temporary Files Folder* screen, or click *Cancel* to exit Setup.

Read *Start Copying Files*

At this point in the installation, Setup has enough information to start copying the program files.

Click Next if you are satisfied with the settings.

Or, if you want to review or change any settings, click *Back* to return to the *Select Components* screen.

Click *Cancel* to exit Setup.

There are two alternatives for the final dialog in the sequence:

Read *SAS Setup Complete* if Setup displays this window.

At this point, Setup has installed the SAS software. If you want to launch the SAS System now, click that checkbox. If you want to view the Post-Installation Guide now, click that checkbox.

Click Finish.

Read *SAS Setup Complete* if Setup displays this window.

At this point, Setup has copied all the required files to your computer. However, some files could not be updated because they are in use. These will be updated automatically when you reboot your computer.

Click on one of the two radio buttons:

- Yes, I want to restart my computer now.
- No, I will restart my computer later.

If you choose to reboot, close all open applications and remove any floppy disks from the disk drives.

Verify that all virus scanning software has been disabled after the computer restarts.

Click Finish.

Dialogs Used More than Once in Setup

The following three dialogs appear as needed during SAS Setup Wizard procedures:

Read *Setup Status*

This dialog is displayed while Setup performs the requested operations. No action is required.

If you click Cancel, you will exit Setup, and the program will not be installed.

Read *Exit Setup*

Setup can be completed later, but if you quit Setup now, the program will not be installed.

Click No to resume Setup, or click Yes to quit.

Read *Choose Folder*

This dialog is used to browse for an available folder. Navigate through the nested folders until you find the correct one for your installation.

Click OK to select the folder.

Or, click Cancel to return to the previous screen.

Installing the SAS System Viewer

The SAS System Viewer is available to users during a CD installation and after an Administrator lays down the image on the server. The SAS System Viewer Installation Wizard can be reached from the Install Utilities selection on the AutoPlay window.

Microsoft Windows

Repair or Remove SAS Software

For an end user, the process of removing or updating SAS software works just as it does for any other Windows software. Click on My Computer, then Control Panel, and then Add/Remove Programs.

Select “SAS System 9.0” from the list to perform the following tasks:

- Remove SAS from your computer
- Repair your SAS installation
- Add products to your SAS System installation
- Remove products from your SAS System installation
