

## SAS<sup>®</sup> Universal Viewer 9.2

### Prerequisites

Platform	Required Java Runtime Environment	Install Space Required
Microsoft Windows	Java 5 Update 12	5.0 MB
Microsoft Windows for 64-Bit Itanium-based Systems	1.5.0_12 (5.0 R27.4)	5.0 MB
Microsoft Windows for x64	Java 5 Update 12	5.0 MB

In addition, SAS Universal Viewer requires the Microsoft .NET Framework runtime 2.0.

### Installing SAS Universal Viewer 9.2

Before performing the following steps, ensure you are logged in as an administrator.

1. Unpack the download package to a location that is accessible from where you want to install the software. Do not put the download package in an existing SAS Software Depot or in the directory where you want to install. Doing so will cause the SAS Software Depot and SAS Deployment Wizard to work incorrectly. You must put the download package in its own directory/folder.
2. To start the SAS Deployment Wizard, Windows users should double-click the `setup.exe` at the location the files have been unpacked in. UNIX users should execute `setup.sh`.
3. The **Choose Language** dialog opens. Choose the language in which you want to perform the installation of your downloaded software. Click **OK**.
4. The **Specify SAS Home** dialog opens. Enter the location you want to install your software in the text field, or use the **Browse** button to search for a location. When the correct location is in the text field, click **Next** to continue. Note that users who have already installed SAS software using the SAS Deployment Wizard will not see this dialog.
5. The **Select Products to Install** dialog opens. Ensure the checkbox beside every product in the list is checked. If you click the **Info** icon, you will be directed to documentation about the software you have downloaded. The pertinent parts of that documentation are repeated in the "Prerequisites" section above.

When each checkbox has been checked, click **Next** to continue.

6. The **Deployment Summary** dialog opens. Click **Start** to begin the installation.
7. The **Deployment in Progress** dialog opens, indicating that the installation is taking place. When the installation is complete, click **Next**.
8. The **Additional Resources** dialog opens, listing a number of online resources should you run into difficulty. Use **Print** to make a copy of this information for future use. Click **Finish** to close the SAS Deployment Wizard.
