

README

SAS[®] Providers for OLE DB 9.23

Prerequisites

Platform	Installation Space Required
Microsoft Windows	18.9 MB
Microsoft Windows for x64	18.9 MB

For the latest information about required JREs, please see the Third Party Software Reference Web site at <http://support.sas.com/resources/thirdpartysupport/index.html>.

Contents of the Package

The contents of the download package for SAS Providers for OLE DB vary slightly depending on the operating system you are downloading to:

- Microsoft Windows (32-bit): Providers for IOM, OLAP, SAS/SHARE, Base SAS, Local, and Table Server access from 32-bit applications
- Microsoft Windows for x64:
 - 32-bit providers for IOM, OLAP, SAS/SHARE, Base SAS, Local, and Table Server access from 32-bit applications
 - 64-bit providers for IOM, OLAP, and Local access from 64-bit applications

Installing SAS Providers for OLE DB 9.23

Before performing the following steps, you should ensure you are logged in as an administrator.

1. Unpack the download package to a location that is accessible from where you want to install the software. Do not put the download package in an existing SAS Software Depot or in the directory where you want to install. Doing so will cause the SAS Software Depot and SAS Deployment Wizard to work incorrectly. You must put the download package in its own directory/folder.
2. To start the SAS Deployment Wizard, Windows users should double-click the `setup.exe` at the location the files have been unpacked in. UNIX users should execute `setup.sh`.
3. The **Choose Language** page opens. Choose the language in which you want to perform the installation of your downloaded software. Click **OK**.

4. The **Specify SAS Home** page opens. Enter the location you want to install your software in the text field, or use the **Browse** button to search for a location. When the correct location is in the text field, click **Next** to continue. Note that users who have already installed SAS software using the SAS Deployment Wizard will not see this page.
5. The **Select Products to Install** page opens. Ensure the checkbox beside SAS Providers for OLE DB is checked. If you click the **Info** icon, you will be directed to documentation about the software you have downloaded. The pertinent parts of that documentation are repeated in the "Prerequisites" section above.

When each checkbox has been checked, click **Next** to continue.

6. The **Deployment Summary** page opens. Click **Start** to begin the installation.
7. The **Deployment in Progress** page opens, indicating that the installation is taking place. When the installation is complete, click **Next**.
8. The **Additional Resources** page opens, listing a number of online resources should you run into difficulty. Use **Print** to make a copy of this information for future use. Click **Finish** to close the SAS Deployment Wizard.
