## SAS<sup>®</sup> Drivers for JDBC 9.2

### Prerequisites

Platform	Installation Space Required
Microsoft Windows	4.4 MB
Microsoft Windows for 64-Bit Itanium-based Systems	4.4 MB
Microsoft Windows for x64	4.4 MB
Solaris	4.4 MB
AIX	4.4 MB
HP-UX	4.4 MB
HP-UX for the Itanium Processor Family Architecture	4.4 MB
Linux for Intel Architecture	4.4 MB
Linux for x64	4.4 MB
Solaris for x64	4.4 MB

For the latest information about required JREs, please see the Third Party Software Reference Web site at <http://support.sas.com/resources/thirdpartysupport/index.html>.

### Installing SAS Drivers for JDBC 9.2

Before performing the following steps, Windows users should ensure they are logged in as an administrator. UNIX users should ensure they are logged in with an installer ID that is not root.

1. Unpack the download package to a location that is accessible from where you want to install the software. Do not put the download package in an existing SAS Software Depot or in the directory where you want to install. Doing so will cause the SAS Software Depot and SAS Deployment Wizard to work incorrectly. You must put the download package in its own directory/folder.
2. To start the SAS Deployment Wizard, Windows users should double-click the `setup.exe` at the location the files have been unpacked in. UNIX users should execute `setup.sh`.
3. The **Choose Language** page opens. Choose the language in which you want to perform the installation of your downloaded software. Click **OK**. Note that Windows users who have already installed SAS software using the SAS Deployment Wizard will not see this page.

4. The **Specify SAS Home** page opens. Enter the location you want to install your software in the text field, or use the **Browse** button to search for a location. When the correct location is in the text field, click **Next** to continue. Note that Windows users who have already installed SAS software using the SAS Deployment Wizard will not see this page.
5. The **Select Products to Install** page opens. Ensure the checkbox beside every product in the list is checked. If you click the **Info** icon, you will be directed to documentation about the software you have downloaded. The pertinent parts of that documentation are repeated in the "Prerequisites" section above.

When each checkbox has been checked, click **Next** to continue.

6. For hosts other than Windows, the **Select Java Runtime Environment** page opens. Choose to either install the recommended Java Runtime Environment and enter an install location, or select an existing Java Runtime Environment that will be used for the SAS software install. After making your selection, click **Next** to continue.
7. The **Deployment Summary** page opens. Click **Start** to begin the installation.
8. The **Deployment in Progress** page opens, indicating that the installation is taking place. When the installation is complete, click **Next**.
9. The **Additional Resources** page opens, listing a number of online resources should you run into difficulty. Use **Print** to make a copy of this information for future use. Click **Finish** to close the SAS Deployment Wizard.
