

About the Release Notes

JMP 9.0.2 is a general maintenance release that contains enhancements and bug fixes. Note that the list of fixes below is intended to show the scope of the 9.0.2 fixes, but is not a complete list of all fixes. All known reproducible crashes, and all known numeric issues have been corrected.

Applying this maintenance release is recommended for all sites.

New Features

- Add ability to specify vertical and horizontal arguments for the Generate Grid() JSL option.
- Add option to List Box (through Set Selected message) for scripts to execute only if the user specifies.

Along with other improvements, the following specific issues have been fixed:

- JMP crashes when the Run Formulas command is sent to a simulation data table that was created in DOE using the Make Table button.
- JMP crashes if incorrect syntax is used for List Box items.
- JMP closes or crashes when the last table is closed when using JMP Automation.
- JMP Automation Document “Name” method does not work.
- The JMP Automation command TableBoxMakeDataTable fails.
- JMP Automation command GetDataTable fails in some circumstances.
- Using JSL, the Bivariate platform now disconnects from the data table when platform results are deleted.
- JMP Excel add-in crashes Excel 2010 on XP.
- Confidence intervals for parameter estimates are incorrect in Choice platform.
- JMP closes unexpectedly when Ctrl-clicking the Match function.
- Arrange Plots option not functional on ALT-click red triangle menu in Overlay Plot.
- Firth Effect Likelihood Ratio Tests and Firth Joint Factor Tests use incorrect likelihood in Choice and GLM platform.
- Contour plot fill option removes some contours.
- Using JSL, JMP produces a Summary table before Concatenation is complete.
- Sequence Fill option no longer fills empty rows to end of table.
- Moving range sigma capability analysis ignores excluded values, weights, and frequencies.
- Fit Model not correctly processing By group analyses if run from a saved script.
- Empty Graph Builder result when copying and pasting.
- The Save Estimates option in Nonlinear does not function properly in the Formula Editor.
- Response counts in Leaf Report for nominal responses should be whole numbers.

Release Notes for JMP 9.0.2

- Factor settings change unexpectedly for unlocked factors in Profiler.
- JMP 9 Excel Add-In does not work properly with 64-bit Excel 2010.
- REML Hat statistics don't match PROC MIXED.
- Scatterplot matrix with nominal data crashes when the Ellipses Coverage option is used.
- Stepwise applies transformation to all response variables.
- JMP cannot connect to SAS after connecting to R.
