

# System Requirements

## SAS Enterprise Guide® 4.1 for Windows

This document provides requirements for installing and running SAS Enterprise Guide software. Before you run this software, you must update your system to meet the minimum requirements.

These are the major requirements listed in the document:

- Software Requirements
- Hardware Requirements
- Additional Features
- Space Requirements
- Specific Product Requirements

For additional information and to view the latest system requirements for your system, access the SAS Web site at <http://support.sas.com/documentation/installcenter/> or contact SAS Technical Support. Sites in the U.S. and Canada may call (919) 677-8008. Other sites should contact their SAS Installation Representative or SAS Support Consultant for the nearest SAS office.

## Software Requirements

### Operating System

**Important:** Administrator privilege is required to install various system updates. To insure that Enterprise Guide software can be completely and safely installed, it is required that the installer have administrator privilege.

### File System Recommendations

- The use of file systems supporting long filenames is required.
- NTFS is recommended.

### Network Installations

Long filename support is required on any Windows Server or Novell Server where a server installation is performed.

### Windows Server 2003

SAS Enterprise Guide 4.1 is supported on Windows Server 2003 updated with Service Pack 1, on 32-bit architecture only.

## **Windows XP**

SAS Enterprise Guide 4.1 is supported on Windows XP updated with Service Pack 2, on 32-bit architecture only.

## **Windows 2000**

SAS Enterprise Guide 4.1 is supported on Windows 2000 Professional and all Windows 2000 Server Editions. Windows 2000 requires Service Pack 3 or higher.

## **Windows Vista**

SAS Enterprise Guide 4.1 is supported on all 32-bit Windows Vista Editions.

# **Hardware Requirements**

## ***Machines Supported***

Intel or Intel-compatible Pentium III class processor (minimum 800 MHz recommended), with a minimum of 256 MB of memory (512 MB or more recommended).

## ***Monitors Supported***

SVGA, 800x600 with normal size 96 DPI font setting (1024x768 or higher resolution recommended).

# **Additional Features**

## ***Web Browser***

A Web browser is required for use with Enterprise Guide software. This Web browser must be Internet Explorer, Version 5.5 or higher.

## ***Viewing HTML Pages Created with ActiveX and Java Device Drivers***

The ActiveX and Java device drivers allow you to create HTML pages from within the SAS System using Enterprise Guide software.

- The HTML pages created with the ActiveX device driver can only be viewed with Internet Explorer, Version 5.5 or higher on Windows operating systems.
- The HTML pages created with the Java device driver can only be viewed with the following Java-enabled versions of Internet Explorer, Version 5.5 or higher, or Netscape, Version 6.2.3 or higher.

The SAS 9.1 version of the Java Graph applets requires version 1.4.2 of the Java runtime environment (JRE) which is located on the Third Party Software Components CD in the SAS 9.1 package. This JRE is also available for download from the Sun Web site, at <http://www.sun.com>.

## ***Electronic Mail***

**Send to E-Mail Recipient** is provided as a menu item in the File pull-down menu. This feature allows electronic mail messages to be initiated from within Enterprise Guide software using the MAPI subsystem. This requires installation of third party products such as Microsoft Outlook, Microsoft

Outlook Express, or Lotus Notes 4.0 (32-bit version only) and above. SMTP e-mail server access via MAPI requires an Internet connection.

SAS Enterprise Guide also supports Send To E-Mail Recipient operations as a step in the SAS Enterprise Guide project; this feature requires that SMTP mail server options are configured within the SAS Enterprise Guide options.

### ***Rich Text (RTF) Viewer***

Enterprise Guide software, when used in conjunction with Release 8.2 or later of the SAS System, can produce RTF (Rich Text Format) output. Enterprise Guide software can display this output within an integrated window. If you have Microsoft Word 97 or later installed, Enterprise Guide software will use components from Microsoft Word to render the RTF results; this should provide the best viewing experience for RTF output.

If you do not have Microsoft Word installed, Enterprise Guide software can still render the RTF results in an integrated window. It will use a system-provided RTF viewer (similar to that used in the WordPad application that is supplied with Windows). This RTF viewer does not have as many capabilities to render text and graphics as Microsoft Word does.

### ***Portable Document Format (PDF) Viewer***

Enterprise Guide software, when used in conjunction with Release 8.2 or later of the SAS System, can produce PDF files that can be viewed with the Adobe Reader application. You can download the Adobe Reader for free from <http://www.adobe.com>. If you have Acrobat Reader 4.0 or later installed, Enterprise Guide software can display PDF output in an integrated window. You can also choose (through Enterprise Guide preferences) to view the PDF output in a separate Acrobat Reader window, external to Enterprise Guide software.

### ***System Requirements Wizard***

The System Requirements Wizard is used to ensure that a computer onto which you would like to install Enterprise Guide software meets the minimum system requirements. Space requirements will vary depending upon the third-party components and the individual files on your computer that need to be updated. The System Requirements Wizard will inform you of the components that do not meet the minimum system requirements before updating them.

## **Space Requirements**

### ***Disk Space Requirements***

For more information, please see the table below.

- System Components 154 MB
- SAS Enterprise Guide and components 236 MB
- Total Required Disk Space 376 MB

Required System Components	Version	Disk Space Required
Microsoft .Net Framework	1.1	*110 MB
Microsoft Data Access Components	2.7	**20 MB
Microsoft Jet 4.0 Components (Service Pack 8, described at <a href="http://support.microsoft.com/default.aspx?scid=kb;en-us;829558">http://support.microsoft.com/default.aspx?scid=kb;en-us;829558</a> )	4.0SP8	8 MB
Visual C++ Redistributables Bundle	6.0	10 MB
Visual C++ Redistributables Bundle	7.0	4 MB
Visual C++ Redistributables Bundle	7.1	2 MB

\* The .NET Framework requires 150 MB during the install process for creation of temporary files. The final footprint after the install is 110 MB. The .NET Framework also requires Microsoft Internet Explorer 5.01 or later. We also strongly recommend you install Service Pack 1 for .Net Framework 1.1. The Service Pack is available on the System Requirements media in the following folder: `redist\dotnet\SP1`. SAS does not automatically install this Service Pack due to Microsoft requirements documented in <http://support.microsoft.com/default.aspx?scid=kb;en-us;899619>.

\*\*Needed for Windows 2000 systems only.

**Note 1:** More information about the MDAC distribution, including a complete file manifest, can be found at <http://www.microsoft.com/data>.

**Note 2:** The following table displays files that are installed by Microsoft Runtime Components.

File	Release Number	Windows Versions
Atl71.dll (Unicode)	7.10.3077.0	All versions
Mfc71.dll	7.10.3077.0	All versions
Mfc71u.dll	7.10.3077.0	All versions
Msvci71.dll	7.10.3077.0	All versions
Msvcp71.dll	7.10.3077.0	All versions
Msvcr71.dll	7.10.3077.0	All versions
Mfc42.dll	6.0.8447.0	All versions
Mfc42u.dll	6.0.8447.0	Windows 2000
Mfc42loc.dll	6.0.8168.0	All versions
Msvcr71.dll	6.0.8397.0	All versions
Msvcirt.dll	6.0.8168.0	All versions
Msvcp60.dll	6.0.8168.0	All versions
Atl.dll (unicode)	3.0.8449.0	Windows 2000

SAS/Third party Components	Version	Disk Space Required
SAS Integration Technologies	9.1	4.5 MB
SAS OLE/DB	9.1	4.1 MB
SAS ActiveX Graph Control	8.2	5.0 MB
SAS ActiveX Graph Control	9.1	9.4 MB
SAS Enhanced Editor	9.1	2.4 MB
SAS Formats	9.1	1.4 MB
Xerces XML Parser	1.5.1	1.3 MB
SAS BI Client Tasks	4.1	48.0 MB
SAS BI Client OLAP	1.3	16.4 MB
SAS Enterprise Styles	4.1	1.1 MB
SAS Enterprise Clients Images	4.1	12 MB
SAS Image	9.1	12.4 MB
SAS Enterprise Guide	4.1	*118 MB

\* Approximately 20-30 MB of additional space is required for each language you choose to install, depending on the language.

## Specific Product Requirements

### Accessing Local ODBC Data

DBMS Products Required: A 32-bit ODBC driver for the data source from which you want to access data

**Note:** Before you can use Enterprise Guide software to access ODBC data, a 32-bit ODBC driver for the data source from which you want to access data is required. ODBC drivers are often available from DBMS vendors and other third party ODBC driver developers. The ODBC driver you choose may require additional DBMS software for network access. All required network software supplied by your database system vendor must be 32-bit-compliant.

### Accessing Local OLE DB Data

DBMS Products Required: An OLE DB data source provider

**Note:** Before you can use Enterprise Guide software to access OLE DB data, an OLE DB provider for the data source from which you want to access data is required. OLE DB providers are often available from DBMS vendors and other third party software vendors. The OLE DB provider you choose may require additional DBMS software for network access. All required network software supplied by your database system vendor must be 32-bit-compliant.

### Accessing OLE DB for OLAP Data

DBMS Products Required: An OLE DB for OLAP (ODBO) data source provider

**Note:** Before you can use Enterprise Guide software to access OLE DB for OLAP data, an OLE DB for OLAP provider for the data source from which you want to access data is required. OLE DB providers are often available from DBMS vendors and other third party software vendors. The OLE DB for OLAP provider you choose may require additional DBMS software for network access. All required network software supplied by your database system vendor must be 32-bit-compliant.

## OLAP Analyzer support for ESRI ArcGIS

In order to enable the integrated OLAP Analyzer support for displaying maps using ESRI ArcGIS technology, you must have the ESRI ArcGIS Engine Runtime 9.1 components installed and licensed on the same machine where you install SAS Enterprise Guide.

## Connecting to Remote SAS Servers via IOM Bridge for COM

IOM Bridge for COM requires the installation of Microsoft's TCP/IP networking protocol, which is provided with all supported versions of Windows.

## Product Requirements for the SAS Server

SAS Enterprise Guide 4.1 is compatible with all releases of Version 8.2 and higher of the SAS System. However, certain features of SAS Enterprise Guide 4.1 are only available when used with later releases of the SAS System. For example, you can create and run stored processes only using SAS 9.1 or later.

The SAS System, Release 8.2 (TS2M0) is the minimum recommended SAS Server release level.

Product	Required	Recommended
Base SAS Software	√	
SAS Integration Technologies Software <sup>1</sup>	√	
SAS/STAT Software		√
SAS/GRAPH Software		√
SAS/GRAPH Map Data Sets		√
SAS/ETS Software		√
SAS OLAP Server Software		√
SAS/QC Software		√
SAS/SECURE 168-bit Software <sup>2</sup>		√

**Note 1:** SAS Integration Technologies software is not required when accessing a SAS server running on the same PC as the client software (a local server), unless you intend to use certain SAS Integration Technologies features, such as Publish.

**Note 2:** SAS/SECURE 168-bit software is required to establish certain encrypted sessions between Enterprise Guide software and the SAS Server. A proprietary weak encryption is supported without the use of SAS/SECURE 168-bit software.
