z/OS	0.7 MB

For the latest information about required JREs, please see the Third Party Software Reference Web site at http://support.sas.com/resources/thirdpartysupport/index.html.

Additional Requirement Information

The SAS Deployment Tester can be used to test products that use the JUnit jar for validation. Without the JUnit jar these products may operate properly, but you will not be able to validate them using SAS Deployment Tester. In order to be validated properly you must have a copy of this jar. The JUnit jar is available at the Third Party Software Requirements Web site, located at http://support.sas.com/resources/thirdpartysupport/index.html.
