Overview

This document provides requirements for installing and running SAS 9.4 Foundation for Linux for x64. It has been updated for the seventh maintenance release of SAS 9.4 Foundation, SAS 9.4M7 (TS1M7).

You must update your system to meet the minimum requirements before running SAS 9.4 Foundation. These are the major requirements listed in the document:

- Software Requirements
- Hardware Requirements
- Space Requirements
- Specific Product Requirements

Additional Resources

Configuring Your I/O Subsystem

SAS recommends the white paper titled *Best Practices for Configuring your I/O Subsystem for SAS 9 Applications*. You can access it here:

Support for Alternative Operating Systems

This document lists the operating systems deployed by SAS in testing the software. Additional operating systems may also be supported. For information about variants of operating systems that are alternatives to the list that SAS identifies as officially supported, see

Troubleshooting System Performance Problems

For a list of papers useful for troubleshooting system performance problems, see

Software Requirements

Operating System

SAS Foundation is supported on the following operating systems:

- Oracle Linux 6.1 and later within 6.x
- Oracle Linux 7.1 (64-bit version) on the x64 chip family
- Oracle Linux 8.0 (64-bit version) on the x64 chip family*
- Red Hat Enterprise Linux 6 update 1 and later within 6.x
- Red Hat Enterprise Linux 7.1 and later within 7.x
- Red Hat Enterprise Linux 8.0 (64-bit version) on the x64 chip family*
- SUSE Linux Enterprise Server 11 SP1 and later within SUSE 11**
- SUSE Linux Enterprise Server 12 SP1 and later within SUSE 12

* SAS 9.4M6 or later is required.

** Starting with SAS 9.4M7, the SAS Web Server cannot be configured on SUSE Linux Enterprise Server 11. SAS recommends installing SAS Web Server on SUSE Linux Enterprise Server 12 or another supported operating system. You can also choose not to install SAS Web Server as an alternative.

The typical Linux installation comes with all the packages that SAS requires. Problems can occur if default packages were removed in the base operating system (for example, X11 libraries and system utilities). In particular, if you run Red Hat Enterprise Linux, the libXp and libXmu packages are required.

SAS Foundation 9.4 also requires the numactl package, and X11/Xmotif (GUI) packages must be installed on any machine where you want to run SAS Foundation 9.4.

**Note:** To verify that you have the latest patch requirements, SAS recommends checking periodically for the most recent updates to this System Requirements document on the Install Center page (http://support.sas.com/installcenter).

The file systems where SAS is installed must have the setuid mount option enabled because sasauth, sasperm, and elssrv require it at SAS run time.

In Linux environments, the SAS BASE (V9) engine requires a POSIX-compliant file system. Consult the vendor for confirmation that the file system you are considering has been certified POSIX-compliant.

SELinux

With SAS 9.4M7, Security Enhanced Linux (SELinux) set to Enforcing is supported on Red Hat Enterprise Linux 8.0.

Operating System Tuning Guidelines

For information about tuning your Linux for x64 operating system for optimum performance of SAS 9.4, refer to “Installation Note 53873: Operating System Tuning Papers” at http://support.sas.com/kb/53/873.html.
glibc
SAS Foundation 9.4 requires glibc 2.12 or later. Here are the minimum release levels for Red Hat Enterprise Linux:

- Red Hat Enterprise Linux 6 requires glibc-2.12-1.166.el6 and later. Refer to RHBA-2015:1465 to obtain the latest package list.
- Red Hat Enterprise Linux 7 requires glibc-2.17-107.el7 and later. Refer to RHSA-2016:2573 to obtain the latest package list.
- Red Hat Enterprise Linux 8 ships with a default release of glibc 2.28. No update is necessary.

Note: To see all content related to the issue, users must log in to the Red Hat website.

To determine which version of glibc is installed on the system where SAS will be installed, use the command `ldd --version`

Java Requirements
For information about Java Runtime Environment (JRE) requirements, refer to the SAS 9.4 Support for Java Runtime Environments page:

Web Browsers
Both SAS 9.4 Foundation software and client applications support recent versions of popular web browsers to display SAS user interfaces. To run SAS clients, use a browser and platform combination that is listed on the following SAS Support page:

A few SAS product user interfaces include HTML5 to support newer features. The individual system requirements documents for these products include a link to information about supported web browsers.

Remote Browsing
SAS 9.4 Foundation uses Remote Browsing to display web-based information. Instead of running a browser on the workstation server, SAS 9.4 Foundation sends the URL to your desktop computer for display in a web browser. This feature removes the browser overhead from the server and allows for the display of output that requires browser plug-ins that do not run on a 64-bit computer. A software agent, the Remote Browser Server, is installed on your desktop computer to enable SAS to communicate with your browser.

SAS creates a URL that references the information to be displayed (usually program help or ODS output) and sends the URL to the SAS Remote Browser Server on your desktop computer (Step 1). The Remote Browser Server sends a request to the browser to display a page (Step 2). The browser then reconnects to SAS to retrieve the information and display it (Step 3).
Remote Browsing runs on Windows 7, Windows 8, Windows 10, and 64-bit Linux. To use the remote browsing feature, your desktop computer must have a recent version of one of the following browsers installed:

- Google Chrome
- Microsoft Edge
- Microsoft Edge for Chromium
- Microsoft Internet Explorer
- Mozilla Firefox

The SAS Remote Browser Server, SAS Foundation, and client applications support 32-bit or 64-bit browser software. However, 64-bit browsers are recommended.

A supported operating system and browser and the Remote Browser Server must be installed and running on your desktop machine to enable Remote Browsing. The installer for the Remote Browser Server can be found on the SAS 9.4 Software Downloads site (http://support.sas.com/downloads/). The browser must also be configured to allow pop-up windows. In addition, make sure that the default browser on the local machine is set to the browser that you want to use, and then select Default Browser for the Display with browser setting in the Remote Browser Preferences dialog box.
Hardware Requirements

*Machines Supported*

The following machines are supported:

- Intel processors with Intel 64 support
- AMD processors with AMD64 support

*Distribution Media*

The following distribution methods are supported:

- Electronic Software Delivery
- DVD

*System Configuration*

*Important:* Hostname length is restricted to a maximum of 60 characters for all machines in the deployment.

The following are recommended minimum levels* for a deployment of SAS 9.4 on Linux for x64:

**Desktop Systems**

- A minimum of two cores
- 2 GB RAM (available to SAS)
- Swap space: 1.5 times physical RAM or 250 GB, whichever is less

**Server Systems**

- A minimum of 4 cores
- 16 GB RAM (available to SAS)
- Swap space: 1.5 times physical RAM or 250 GB, whichever is less
- I/O Throughput of at least 100 MB/second/core

*Note:* SAS strongly recommends obtaining a hardware recommendation that is based on your estimated workload and number of users.

*Displays Supported*

SAS 9.4 supports any X display server in conjunction with an ICCCM-compliant window manager.

*Space Requirements*

SAS 9.4 Foundation requires approximately 30 MB of disk space on the /tmp partition to complete the installation.

SAS strongly recommends consulting with a SAS Sizing Expert to obtain an official hardware recommendation that is based on your estimated SAS workload and number of users. Disk space requirements are provided for individual components in separate documents. However, the space requirements that you can obtain from the individual System Requirements documents that are
provided for SAS Solutions and other add-on products are not a substitution for expert advice. To request sizing expertise, send an email to contactcenter@sas.com.

Specific Product Requirements

Base SAS Software

Requirements for SPD Engine on Linux for x64

- An SMP (symmetric multiprocessing) computer with at least two CPUs; four are preferred
- At least one I/O channel per two CPUs
- Enough disk drives to have at least one mount point per CPU isolated on its own disk; two mount points per CPU are preferred

SAS Analytics Accelerator for Teradata

The SAS Analytics Accelerator for Teradata requires Base SAS, SAS/ACCESS Interface to Teradata, and at least one of the following products:

- SAS/ETS
- SAS/STAT
- SAS Enterprise Miner

SAS has extended SAS/ACCESS and SAS In-Database Technologies support to selected cloud and database variants of supported data sources. For a list of the supported variants, see https://support.sas.com/en/documentation/third-party-software-reference/9-4/support-for-database.html.

DBMS Products Required:

- Teradata Database version 13.10 or later
- Teradata CLIv2 client libraries, TTU 13.10 or later for Linux (64-bit libraries)

For SAS 9.4M3

DBMS Products Required:

- Teradata Database version 14.10 or later
- Teradata CLIv2 client libraries, TTU 14.10 or later for Linux (64-bit libraries)

For SAS 9.4M4 – 9.4M5

DBMS Products Required:

- Teradata Database version 15.10 or later
- Teradata CLIv2 client libraries, TTU 15.10 or later for Linux (64-bit libraries)

For SAS 9.4M6 and Later

DBMS Products Required:

- Teradata Database version 16.10 or later
- Teradata CLIv2 client libraries, TTU 16.10 or later for Linux (64-bit libraries)
SAS Data Quality Accelerator for Teradata

SAS Data Quality Accelerator for Teradata requires Base SAS and SAS/ACCESS Interface to Teradata. It also requires the SAS Embedded Process to be installed and configured on your database.

Contact a Teradata representative to obtain the required support functions for the SAS Embedded Process. It is important to install the latest version from Teradata at Your Service. Teradata Customer Service coordinates installation of the SAS Embedded Process packages and application of the SAS Embedded Process support functions on the DBMS machine.

SAS has extended SAS/ACCESS and SAS In-Database Technologies support to selected cloud and database variants of supported data sources. For a list of the supported variants, see https://support.sas.com/en/documentation/third-party-software-reference/9-4/support-for-database.html.

DBMS Products Required:
- Teradata Database version 13.10 or later
- Teradata CLIv2 client libraries, TTU 13.10 or later for Linux (64-bit libraries)

For SAS 9.4M3

DBMS Products Required:
- Teradata Database version 14.10 or later
- Teradata CLIv2 client libraries, TTU 14.10 or later for Linux (64-bit libraries)
- SAS Embedded Process support functions (sasepfunc-14.10 or later)

For SAS 9.4M4 and 9.4M5

DBMS Products Required:
- Teradata Database version 15.10 or later
- Teradata CLIv2 client libraries, TTU 15.10 or later for Linux (64-bit libraries)
- SAS Embedded Process support functions (sasepfunc-15.10-4 or later).

For SAS 9.4M6 and Later

DBMS Products Required:
- Teradata Database version 16.10 or later
- Teradata CLIv2 client libraries, TTU 16.10 or later for Linux (64-bit libraries)
- SAS Embedded Process support functions, latest version available (sasepfunc-16.20-2 or later)

Note: The version number for sasepfunc indicates the latest version of Teradata Database that is supported. It is backward-compatible with Teradata Database 15.xx and earlier versions of Teradata Database 16.xx.

SAS In-Database Code Accelerator for Greenplum

The SAS In-Database Code Accelerator for Greenplum requires Base SAS and SAS/ACCESS Interface to Greenplum. It also requires the SAS Embedded Process to be installed and configured on your database.

DBMS Operating Systems:
- Red Hat Enterprise Linux 64-bit, version 6.7 or later
• SUSE Linux Enterprise Server 64-bit, version 11 or later with the latest Service Pack

**DBMS Products Required**

• Greenplum Database version 4.2.2 or later
• Greenplum Partner Connector (GPPC) version 1.2 or later

**For SAS 9.4M2 – 9.4M5**

**DBMS Products Required:**

• Greenplum Database version 4.3 or later
• Greenplum Partner Connector (GPPC) version 1.2 or later

In Greenplum 5.x, the Partner Connector library (GPPC) is integrated natively into the database. If you are using a Greenplum 5.0 or later database, it is not necessary to install the package. For best performance, SAS recommends using Greenplum 5.7 or later.

**For SAS 9.4M6 and Later**

**DBMS Product Required:** Greenplum Database version 5.7 or later.

For best results, SAS recommends installing the latest Service Packs on the client and server.

**SAS In-Database Code Accelerator for Hadoop**

The SAS In-Database Code Accelerator for Hadoop requires Base SAS and SAS/ACCESS Interface to Hadoop. It also requires the SAS Embedded Process to be installed and configured on Hadoop.

**For SAS 9.4M4 – 9.4M6**

Hive 0.14 or later is required.

**For SAS 9.4M7**

Hive 1.1 or later is required.

For supported Hadoop distributions and versions, refer to the following web page:

SAS has extended SAS/ACCESS and SAS In-Database Technologies support to selected cloud and database variants of supported data sources. For more information about the supported variants, see https://support.sas.com/en/documentation/third-party-software-reference/9-4/support-for-database.html.

**SAS In-Database Code Accelerator for Teradata**

The SAS In-Database Code Accelerator for Teradata requires Base SAS and SAS/ACCESS Interface to Teradata. It also requires the SAS Embedded Process to be installed and configured on your database.

Contact a Teradata representative to obtain the required support functions for the SAS Embedded Process. It is important to install the latest version from Teradata at Your Service. Teradata Customer Service coordinates installation of the SAS Embedded Process packages and application of the SAS Embedded Process support functions on the DBMS machine.

SAS has extended SAS/ACCESS and SAS In-Database Technologies support to selected cloud and database variants of supported data sources. For a list of the supported variants, see...

**DBMS Products Required**
- Teradata Database version 13.10 or later
- Teradata CLIv2 client libraries, TTU 13.10 or later for Linux (64-bit libraries)

**For SAS 9.4M3**

**DBMS Products Required**
- Teradata Database version 14.10 or later
- Teradata CLIv2 client libraries, TTU 14.10 or later for Linux (64-bit libraries)
- SAS Embedded Process support functions (sasepfunc-15.00-8 or later)

**For SAS 9.4M4 and 9.4M5**

**DBMS Products Required**
- Teradata Database version 15.10 or later
- Teradata CLIv2 client libraries, TTU 15.10 or later for Linux (64-bit libraries)
- SAS Embedded Process support functions (sasepfunc-15.10-4 or later)

**For SAS 9.4M6 and Later**

**DBMS Products Required:**
- Teradata Database version 16.10 or later
- Teradata CLIv2 client libraries, TTU 16.10 or later for Linux (64-bit libraries)
- SAS Embedded Process support functions (sasepfunc-16.20-2 or later)

**Note:** *The version number for sasepfunc indicates the latest version of Teradata Database that is supported. It is backward-compatible with Teradata Database 15.xx and earlier versions of Teradata Database 16.xx.*

**SAS Scoring Accelerator for Aster**

The SAS Scoring Accelerator for Aster requires Base SAS, SAS Enterprise Miner, SAS/ACCESS Interface to Aster, and SAS/STAT.

The recommended DBMS operating system is Red Hat Enterprise Linux 64-bit, version 6.3 or later.

**DBMS Products Required**
- Aster Server versions 4.6.3, 5.0.1, 5.1, or 6.0
- Client utilities for Aster version 4.6.3, 5.0.1, or 5.1

**For SAS 9.4M2 – 9.4M3**

**DBMS Products Required**
- Aster Server version 6.0
- Client utilities for Aster version 5.1

**For SAS 9.4M4 and Later**

**DBMS Products Required:**
- Aster Server version 6.1
- Client utilities for Aster version 6.1 or later
**SAS Scoring Accelerator for DB2**

The SAS Scoring Accelerator for DB2 requires Base SAS, SAS/STAT, SAS/ACCESS Interface to DB2, and SAS Enterprise Miner.

A current version of the IBM XLC compiler must be installed on the IBM DB2 server where you will publish scores. Contact an IBM/DB2 representative to obtain the compiler for your DB2 installation.

**DBMS Operating Systems:**
- IBM AIX 64-bit version 7.1 with Service Pack 3 or later
- Red Hat Enterprise Linux 64-bit, version 6.7 or later

**DBMS Products Required:**
- IBM DB2 version 10.1 with FixPack 1 or later
- Client utilities for IBM DB2 version 10.1 or later

**For SAS 9.4M1 and Later**

**DBMS Products Required:**
- IBM DB2 version 10.5 or later
- Client utilities for IBM DB2 version 10.5 or later

For best results, SAS recommends installing the latest FixPack on the client and server.

**SAS Scoring Accelerator for Greenplum**

The SAS Scoring Accelerator for Greenplum requires Base SAS, SAS Enterprise Miner, SAS/ACCESS Interface to Greenplum, and SAS/STAT.

**DBMS Operating Systems:**
- Red Hat Enterprise Linux 64-bit, version 6.7 or later
- SUSE Linux Enterprise Server 64-bit, version 11 or later with the latest Service Pack

**DBMS Products Required:**
- Greenplum Database version 4.2.2.0
- Greenplum Partner Connector (GPPC) version 1.2

**For SAS 9.4M2 – 9.4M5**

**DBMS Products Required:**
- Greenplum Database version 4.3 or later
- Greenplum Partner Connector version 1.2 or later

In Greenplum 5.x, the Partner Connector library (GPPC) is integrated natively into the database. If you are using a Greenplum 5.0 or later database, it is not necessary to install the package. For best performance, SAS recommends using Greenplum 5.7 or later.

**For SAS 9.4M6 and Later**

**DBMS Product Required:** Greenplum Database version 5.7 or later.

For best results, SAS recommends installing the latest Service Packs on the client and server.
SAS Scoring Accelerator for Hadoop
The SAS Scoring Accelerator for Hadoop requires Base SAS, SAS/STAT and SAS/ACCESS Interface to Hadoop. It also requires SAS Enterprise Miner or SAS Model Manager.

For SAS 9.4M4 – 9.4M6
Hive 0.14 or later is required.

For SAS 9.4M7
Hive 1.1 or later is required.

For supported Hadoop distributions and versions, refer to the following web page:

SAS has extended SAS/ACCESS and SAS In-Database Technologies support to selected cloud and database variants of supported data sources. For information about the supported variants, see https://support.sas.com/en/documentation/third-party-software-reference/9-4/support-for-database.html.

SAS Scoring Accelerator for Netezza
The SAS Scoring Accelerator for Netezza requires Base SAS, SAS Enterprise Miner, SAS/ACCESS Interface to Netezza, and SAS/STAT.

DBMS Products Required:
- IBM Netezza version 7.0 or later
- Client utilities for IBM Netezza version 7.0 or later

For SAS 9.4M3 – 9.4M5
DBMS Products Required:
- IBM Netezza version 7.0.3 or later
- Client utilities for IBM Netezza version 7.0.3 or later

For SAS 9.4M6 and Later
DBMS Products Required:
- IBM Netezza version 7.2.1 or later
- Client utilities for IBM Netezza version 7.2.1 or later

SAS Scoring Accelerator for Oracle
The SAS Scoring Accelerator for Oracle requires Base SAS, SAS/STAT, SAS/ACCESS Interface to Oracle, and SAS Enterprise Miner.

SAS has extended SAS/ACCESS and SAS In-Database Technologies support to selected cloud and database variants of supported data sources. For a list of the supported variants, see https://support.sas.com/en/documentation/third-party-software-reference/9-4/support-for-database.html.
DBMS Operating Systems:
- Red Hat Enterprise Linux 64-bit, version 5.5 or later
- Oracle Enterprise Linux version 5.5 or later

DBMS Products Required:
- Oracle Server version 11gR2 or later. The database encoding must be UTF8.
- Oracle Client release 11gR2 or later (64-bit libraries)

Notes: Some additional configuration might be required to use the 12c, 18c, or later client. See the Configuration Guide for SAS 9.4 Foundation for UNIX Environments for more information. You can also use the Oracle Instant Client with SAS/ACCESS Interface to Oracle. However, if you find any issues, you should switch to the full Oracle client, which is the only Oracle client that SAS uses in official tests. SAS Technical Support will only investigate issues that can be reproduced with the full Oracle client.

For best results, SAS recommends installing the latest patches on the client and server.

SAS Scoring Accelerator for SAP HANA
SAS Scoring Accelerator for SAP HANA was new in SAS 9.4M2. It requires Base SAS, SAS Enterprise Miner, SAS/ACCESS Interface to SAP HANA, and SAS/STAT.

DBMS Operating Systems:

For SAS 9.4M2 – 9.4M3
- Red Hat Enterprise Linux 64-bit, version 6.6 or later
- SUSE Linux Enterprise Server 64-bit, version 11 or later with the latest service pack

For SAS 9.4M4 – 9.4M5
- Red Hat Enterprise Linux 64-bit, version 6.10 or later
- SUSE Linux Enterprise Server 64-bit, version 12 or later with the latest service pack

For SAS 9.4M6 and Later
- Red Hat Enterprise Linux 64-bit, version 7.2 or later
- SUSE Linux Enterprise Server 64-bit, version 12 or later with the latest service pack

Note: Refer to SAP Note 2235581 “SAP HANA: Supported Operating Systems” for more information regarding operating system versions that are supported for a specific SAP HANA release and revision level. This note is available at https://launchpad.support.sap.com/#/notes/2235581.

DBMS Products Required:

For SAS 9.4M2 – 9.4M3
- SAP HANA 1.0 SPS 08 Server or later
- Client utilities for SAP HANA 1.0 SPS 08 or later

For SAS 9.4M4 – 9.4M5
- SAP HANA 1.0 SPS 12 Server or later
- Client utilities for SAP HANA 1.0 SPS 12 or later
For SAS 9.4M6 and Later

- SAP HANA 2.0 SPS 02 or SAP HANA 2.0 SPS 03 Server
- Client utilities for SAP HANA 2.0 SPS 02 or later

Note: In order to run SAS Scoring Accelerator for SAP HANA for SAS 9.4M6 on an SAP HANA 2.0 SPS04 server or later, you must access and apply the software updates for SAS Embedded Process. To access and apply these software updates, request a SAS 9.4M6 instance of SAS Embedded Process from your SAS account representative. If you need assistance in determining your SAS account representative, send an email to contactcenter@sas.com.

For best results, match the SAP HANA client version with the version of the SAP HANA server where it will be connected.

SAS also recommends installing the latest Service Packs on the client and server.

SAS Scoring Accelerator for SPD Server

The SAS Scoring Accelerator for SPD Server requires Base SAS, SAS Enterprise Miner, SAS Scalable Performance Data Server version 5.1, and SAS/STAT.

For SAS 9.4M3

DBMS Product Required: SAS Scalable Performance Data Server version 5.2.

For SAS 9.4M4

DBMS Product Required: SAS Scalable Performance Data Server version 5.3.

For SAS 9.4M5 and Later

DBMS Product Required: SAS Scalable Performance Data Server version 5.4.

SAS Scoring Accelerator for Teradata

The SAS Scoring Accelerator for Teradata requires Base SAS, SAS Enterprise Miner, SAS/STAT, and SAS/ACCESS Interface to Teradata. It also requires the SAS Embedded Process to be installed and configured on your database.

Contact a Teradata representative to obtain the required support functions for the SAS Embedded Process. It is important to install the latest version from Teradata at Your Service. Teradata Customer Service coordinates installation of the SAS Embedded Process packages and application of the SAS Embedded Process support functions on the DBMS machine.

SAS has extended SAS/ACCESS and SAS In-Database Technologies support to selected cloud and database variants of supported data sources. For a list of the supported variants, see https://support.sas.com/en/documentation/third-party-software-reference/9-4/support-for-database.html.

DBMS Products Required:
- Teradata Database version 13.10 or later
- Teradata CLIv2 client libraries, TTU 13.10 or later for Linux (64-bit libraries)
For SAS 9.4M3

DBMS Products Required:
- Teradata Database version 14.10 or later
- Teradata CLIv2 client libraries, TTU 14.10 or later for Linux (64-bit libraries)
- SAS Embedded Process support functions (sasepfunc-14.10-4 or later)

For SAS 9.4M4 and 9.4M5

DBMS Products Required:
- Teradata Database version 15.10 or later
- Teradata CLIv2 client libraries, TTU 15.10 or later for Linux (64-bit libraries)
- SAS Embedded Process support functions (sasepfunc-15.10-4 or later)

For SAS 9.4M6 and Later

DBMS Products Required:
- Teradata Database version 16.10 or later
- Teradata CLIv2 client libraries, TTU 16.10 or later for Linux (64-bit libraries)
- SAS Embedded Process support functions (sasepfunc-16.20-2 or later)

Note: The version number for sasepfunc indicates the latest version of Teradata Database that is supported. It is backward-compatible with Teradata Database 15.xx and earlier versions of Teradata Database 16.xx.

SAS/ACCESS Interface to Amazon Redshift

SAS/ACCESS Interface to Amazon Redshift was new with the April 2016 release of SAS/ACCESS. Base SAS is required for the installation of SAS/ACCESS Interface to Amazon Redshift.

SAS/ACCESS Interface to Amazon Redshift includes a required ODBC driver.

For instructions about how to configure SAS/ACCESS Interface to Amazon Redshift, see the Configuration Guide for SAS 9.4 Foundation for UNIX.

SAS/ACCESS Interface to Aster

Base SAS is required for the installation of SAS/ACCESS Interface to Aster.

SAS/ACCESS Interface to Aster requires the Aster ODBC driver (64-bit version) and the bulk loading clients. To obtain the ODBC driver and bulk loading clients, contact Aster Data Technical Support.

DBMS Products Required:
- Aster Server version 4.6.3 or later
- Aster ODBC driver version 4.6.3 or later for Linux (64-bit libraries)

For SAS 9.4M3

DBMS Products Required:
- Aster Server version 6.0 or later
- Aster ODBC driver version 5.1 or later for Linux (64-bit libraries)
For SAS 9.4M4 and Later

DBMS Products Required:

- Aster Server version 6.1 or later
- Aster ODBC driver version 6.1 or later for Linux (64-bit libraries)

Refer to the *Configuration Guide for SAS 9.4 Foundation for UNIX Environments* for information about where to install the ODBC driver and bulk loader client and how to configure your SAS software to work with them.

**SAS/ACCESS Interface to DB2**

Base SAS is required for the installation of SAS/ACCESS Interface to DB2.

SAS/ACCESS Interface to DB2 can be installed on an IBM DB2 server or on a DB2 client node with an installation of the IBM Data Server Client. In addition, DB2 Connect must be licensed to connect to DB2 databases that are installed on AS/400, VSE, VM, MVS, and z/OS systems.

DBMS Products Required:

- IBM DB2 version 10.1 or later
- Client utilities for IBM DB2 version 10.1 or later

For SAS 9.4M1 – 9.4M6

DBMS Products Required:

- IBM DB2 version 10.5 or later
- Client utilities for IBM DB2 version 10.5 or later

For SAS 9.4M7

DBMS Products Required:

- IBM DB2 version 11 or later
- Client utilities for IBM DB2 11 or later

For best results, SAS recommends installing the latest FixPack on the client and server.

**SAS/ACCESS Interface to Google BigQuery**

Base SAS is required for the installation of SAS/ACCESS Interface to Google BigQuery.

The required Google BigQuery client library is included with SAS/ACCESS Interface to Google BigQuery.

**SAS/ACCESS Interface to Greenplum**

Base SAS is required for the installation of SAS/ACCESS Interface to Greenplum.

SAS/ACCESS Interface to Greenplum includes the required 64-bit ODBC driver.

For instructions about how to configure SAS/ACCESS Interface to Greenplum, see the *Configuration Guide for SAS 9.4 for UNIX Environments*.

DBMS Product Required: Greenplum Database version 4.3 or later.

SAS does not recommend using Greenplum Database versions 5.0 - 5.6.
For SAS 9.4M6
DBMS Product Required: Greenplum Database version 5.7 or later.

For SAS 9.4M7
DBMS Product Required: Greenplum Database version 6.0 or later
For best results, SAS recommends installing the latest Service Packs on the client and server.

SAS/ACCESS Interface to Hadoop
Base SAS is required for the installation of SAS/ACCESS Interface to Hadoop.

For SAS 9.4M4 – 9.4M6
Hive 0.14 or later is required.

For SAS 9.4M7
Hive 1.1 or later is required.
For a list of supported Hadoop distributions and versions, refer to the following web page:
SAS has extended SAS/ACCESS and SAS In-Database Technologies support to selected cloud and database variants of supported data sources. For information about the supported variants, see

SAS/ACCESS Interface to HAWQ
Base SAS is required for the installation of SAS/ACCESS Interface to HAWQ.
SAS/ACCESS Interface to HAWQ includes the required 64-bit ODBC driver.

For SAS 9.4M3
DBMS Product Required: HAWQ Database version 1.2.1 or later.

For SAS 9.4M4
DBMS Product Required: HAWQ Database version 2.0 or later.

For SAS 9.4M5 and Later
DBMS Product Required: HAWQ Database version 2.2 or later.
For instructions about how to configure SAS/ACCESS Interface to HAWQ, see the Configuration Guide for SAS 9.4 for UNIX Environments.
**SAS/ACCESS Interface to Impala**

Base SAS is required for the installation of SAS/ACCESS Interface to Impala.

In addition, the ODBC Driver for Impala requires the unixODBC Driver Manager.

**DBMS Products Required:**
- Impala Server version 1.2.3 or later
- ODBC Driver for Impala version 2.5.13 or later
- The unixODBC Driver Manager. Use the latest version.

**For SAS 9.4M4 – 9.4M6**

**DBMS Products Required:**
- Impala server version 2.6 or later
- unixODBC Driver for Impala, version 2.5.41 or later
- The latest version of the unixODBC Driver Manager

**For SAS 9.4M7**

**DBMS Products Required:**
- Impala server version 3.2.0 or later
- ODBC Driver for Impala version 2.6.9 or later

**SAS/ACCESS Interface to Informix**

Base SAS is required for the installation of SAS/ACCESS Interface to Informix.

SAS/ACCESS Interface to Informix uses an ODBC connection. The ODBC driver included with Informix Connect must be installed and configured prior to using SAS/ACCESS to Informix.

SAS/ACCESS Interface to Informix also requires the use of communication protocols such as TCP/IP to function properly.

**DBMS Products Required:**
- Informix Client SDK 350.UC9
- Informix Server version 11.5 or later

**For SAS 9.4M3 and Later**

**DBMS Products Required:**
- Informix Client SDK 4.10FC4 (64-bit only)
- Informix Server version 11.5 or later

**SAS/ACCESS Interface to JDBC**

SAS/ACCESS Interface to JDBC was new with the November 2018 release of SAS/ACCESS. Base SAS is required for the installation of SAS/ACCESS Interface to JDBC.

SAS/ACCESS Interface to JDBC requires a Java Database Connectivity (JDBC) driver. JDBC drivers are often available from DBMS vendors and from other third-party JDBC driver developers. SAS recommends using JDBC drivers that comply with the JDBC 4.1 specification or later.
SAS/ACCESS Interface to Microsoft SQL Server

Base SAS is required for the installation of SAS/ACCESS Interface to Microsoft SQL Server.

SAS/ACCESS Interface to Microsoft SQL Server includes the required ODBC driver.

SAS has extended SAS/ACCESS and SAS In-Database Technologies support to selected cloud and database variants of supported data sources. For a list of the supported variants, see https://support.sas.com/en/documentation/third-party-software-reference/9-4/support-for-database.html.

**DBMS Product Required:** Microsoft SQL Server 2008 or later.

For SAS 9.4M3 and Later

**DBMS Product Required:** Microsoft SQL Server 2012 or later.

For directions about how to configure SAS/ACCESS Interface to Microsoft SQL Server, see the Configuration Guide for SAS 9.4 for UNIX Environments.

SAS/ACCESS Interface to MongoDB

SAS/ACCESS Interface to MongoDB was new with the April 2019 release of SAS/ACCESS.

Base SAS is required for the installation of SAS/ACCESS Interface to MongoDB.

SAS/ACCESS Interface to MongoDB requires the MongoDB C Driver (“libmongoc,” the official client library for C applications). You can obtain the latest MongoDB C driver from the following website: http://mongoc.org/.

**DBMS Products Required:**

- MongoDB version 3.6.5 or later
- MongoDB C Driver version 1.9.2 or later

You must add the location of the MongoDB C shared libraries to the shared library path environment variable specific to your operating system. For more information, see the Configuration Guide for SAS 9.4 Foundation for UNIX Environments, available at the following location: http://support.sas.com/documentation/installcenter/en/ikfdtnunxcg/66380/PDF/default/config.pdf.

SAS/ACCESS Interface to MySQL

Base SAS is required for the installation of SAS/ACCESS Interface to MySQL.

SAS has extended SAS/ACCESS and SAS In-Database Technologies support to selected cloud and database variants of supported data sources. For a list of the supported variants, see https://support.sas.com/en/documentation/third-party-software-reference/9-4/support-for-database.html.

**DBMS Products Required:**

- MySQL Client version 5.1, 5.6, or 5.7
- MySQL Server version 5.1 or later
For SAS 9.4M4 – 9.4M6

DBMS Products Required:
- MySQL Client version 5.6 or 5.7
- MySQL Server version 5.6 or later

For SAS 9.4M7

DBMS Products Required:
- MySQL Client version 5.7 or 8.0
- MySQL Server version 5.7 or later (including MySQL 8)

For more information about SAS/ACCESS Interface to MySQL, see the MySQL chapter in SAS/ACCESS Software for Relational Databases: Reference.

SAS/ACCESS Interface to Netezza

Base SAS is required for the installation of SAS/ACCESS Interface to Netezza.

SAS/ACCESS Interface to Netezza requires an ODBC driver from IBM. To obtain the appropriate IBM Netezza ODBC driver, contact IBM Technical Support at (877) 426-6006 or visit the IBM Fix Central website, http://www.ibm.com/support/fixcentral/.

DBMS Products Required:
- IBM Netezza version 6.0 or later
- Client utilities for IBM Netezza version 4.6.2 or later

For SAS 9.4M2 - 9.4M5

DBMS Products Required:
- IBM Netezza version 7.0.3 or later
- Client utilities for IBM Netezza version 7.0.3 or later

For SAS 9.4M6 and Later

DBMS Products Required:
- IBM Netezza version 7.2.1 or later
- Client utilities for IBM Netezza version 7.2.1 or later

For best results, match the Netezza ODBC client version with the version of the Netezza server where it will be connected. For example, if you have a Netezza Interface server release 7.0.4, you should use the ODBC client driver release 7.0.4 with SAS/ACCESS to Netezza.

SAS/ACCESS Interface to ODBC

Base SAS is required for the installation of SAS/ACCESS Interface to ODBC.

A compliant ODBC driver manager and ODBC driver (64-bit libraries) are required. ODBC drivers are often available from DBMS vendors and other third-party ODBC driver developers. The ODBC driver that you select might require additional DBMS software to access the data.

You might have to use a text editor to modify the odbc.ini file in your home directory to configure data sources. Some ODBC driver vendors may allow a system administrator to maintain a centralized copy by setting an environment variable.
The ODBC drivers are ODBC API-compliant dynamic link libraries, referred to in UNIX as shared objects. You must include the full path to the dynamic link libraries in the OS load library environment variable, i.e., LD_LIBRARY_PATH, LIBPATH, or SHLIB_PATH, so that the ODBC drivers can be loaded dynamically at run time.

For more information, consult the vendor of your ODBC driver.

**SAS/ACCESS Interface to Oracle**

Base SAS is required for the installation of SAS/ACCESS Interface to Oracle.

SAS/ACCESS Interface to Oracle can be installed on either a full Oracle RDBMS server node or on an Oracle client node.

To use the Bulk Load feature of this SAS product, the Oracle SQL*Loader data-loading utility must be installed. This utility can be obtained by running the Oracle installer and selecting the Oracle Utilities product. Refer to your Oracle documentation for information on SQL*Loader.

SAS has extended SAS/ACCESS and SAS In-Database Technologies support to selected cloud and database variants of supported data sources. For a list of the supported variants, see https://support.sas.com/en/documentation/third-party-software-reference/9-4/support-for-database.html.

**DBMS Products Required:**
- Oracle Database 11gR2 or later
- Oracle Client 11gR2 (64-bit libraries) or later

**For SAS 9.4M7**

**DBMS Products Required:**
- Oracle Database 12.1 or later
- Oracle Client 12.1 or later

**Notes:** Some additional configuration might be required to use the 12c, 18c, or later client. See the Configuration Guide for SAS 9.4 Foundation for UNIX Environments for more information.

You can also use the Oracle Instant Client with SAS/ACCESS Interface to Oracle. However, if you find any issues, you should switch to the full Oracle client, which is the only Oracle client that SAS uses in official tests. SAS Technical Support will only investigate issues that can be reproduced with the full Oracle client.

For best results, SAS recommends installing the latest patches on the client and server.

**SAS/ACCESS Interface to PC Files**

Base SAS is required for the installation of SAS/ACCESS Interface to PC Files.

**Product Required on Windows:** 32-bit or 64-bit SAS PC Files Server, running the same “bitness” of ACE (Microsoft Access Database Engine 2010 Redistributable) driver on the same Windows machine.

**DBMS Product Required on Windows:** Microsoft Access Database Engine 2010 Redistributable (ACE) or a later version.
SAS/ACCESS Interface to PC Files supports access to virtually any data source through ODBC support on Windows, as well as the following software formats:

- dBase files (.dbf)
- Excel files (.xls, .xlsx, .xlsb, .xlsm)
- JMP files (.jmp is in Base)
- Lotus files (.wk1, .wk3, and .wk4)
- Microsoft Access database files (.mdb or .accdb)
- Paradox (.db)
- SPSS files (.sav)
- Stata files (.dta)

SAS PC Files Server (pcfserver.exe or pcfservice.exe) running on Windows is required to use the PCFILES libname engine to access Microsoft Access database files, Microsoft Excel workbook files, or any ODBC supported data sources.

You can run SAS PC Files Server as a Windows service or as an application listening to the PCFILES libname engine. SAS PC Files Server provides data encryption and Authentication features with default port number 9621, which can be configured through the SAS PC Files Server application console. Note that the “bitness” (32-bit or 64-bit) of SAS PC Files Server must match that of the Microsoft ACE driver on the same Windows machine.

**SAS/ACCESS Interface to the PI System**

Base SAS is required for the installation of SAS/ACCESS Interface to the PI System.

SAS/ACCESS Interface to the PI System uses the PI System Web API, which is HTTPS-based and RESTful. No PI System client software is required to be installed on the machine where SAS is running. However, the PI System Web API (PI Web API 2015-R2 or later) must be installed and activated on the host machine where the user connects.

**SAS/ACCESS Interface to PostgreSQL**

Base SAS is required for the installation of SAS/ACCESS Interface to PostgreSQL.

SAS/ACCESS Interface to PostgreSQL includes the required 64-bit ODBC driver.

SAS has extended SAS/ACCESS and SAS In-Database Technologies support to selected cloud and database variants of supported data sources. For a list of the supported variants, see https://support.sas.com/en/documentation/third-party-software-reference/9-4/support-for-database.html.

**DBMS Product Required:** PostgreSQL Database version 9.1.9 or later

**For SAS 9.4M4 and 9.4M5**

**DBMS Product Required:** PostgreSQL Database version 9.1.23 or later
System Requirements for SAS 9.4 Foundation for Linux for x64

For SAS 9.4M6 and Later

DBMS Product Required: PostgreSQL Database version 9.5.14 or later

SAS/ACCESS Interface to Salesforce

SAS/ACCESS Interface to Salesforce was new with the April 2019 release of SAS/ACCESS.

Base SAS is required for the installation.

SAS/ACCESS Interface to Salesforce requires a Salesforce user account that has API access enabled.

For more information, see the Configuration Guide for SAS 9.4 Foundation for UNIX Environments, available at the following location: http://support.sas.com/documentation/installcenter/en/ikfdtnunxcg/66380/PDF/default/config.pdf

Product Required: Salesforce API access, version 46.0 or later.

SAS/ACCESS Interface to SAP ASE

Base SAS is required for the installation of SAS/ACCESS Interface to SAP ASE, formerly SAS/ACCESS Interface to Sybase.

Note: SAP IQ is not supported by SAS/ACCESS Interface to SAP ASE; use SAS/ACCESS Interface to SAP IQ instead.

DBMS Product Required: SAP ASE (Sybase) Open Client SDK, Release 15.7 or later (64-bit libraries)

Note: SAS/ACCESS Interface to SAP ASE no longer supports access to Microsoft SQL Server data. SAS/ACCESS Interface to SAP ASE software uses the CTLIB API calls to access the SAP (Sybase) DBMS product. These CTLIB API calls are not supported by Microsoft SQL Server; therefore, you must use SAS/ACCESS Interface to Microsoft SQL Server with an appropriate ODBC driver to access Microsoft SQL Server data.

SAS/ACCESS Interface to SAP HANA

Base SAS is required for the installation of SAS/ACCESS Interface to SAP HANA.

SAS/ACCESS Interface to SAP HANA requires the ODBC driver (64-bit) for SAP HANA from SAP. The ODBC driver is part of the SAP HANA Client.

DBMS Products Required:

- SAP HANA 1.0 SPS 08 Server or later
- SAP HANA ODBC Client for SAP HANA 1.0 SPS 08 or later

For SAS 9.4M4 – 9.4M6

DBMS Products Required:

- SAP HANA 1.0 SPS 12 Server or later
- SAP HANA ODBC Client for SAP HANA 1.0 SPS 12 or later
For SAS 9.4M7

DBMS Products Required:
- SAP HANA 2.0 SPS 4 Server or later
- SAP HANA ODBC Client for SAP HANA 2.2.83 or later

For best results, SAS recommends installing the latest Service Packs on the client and server. SAS also recommends matching the SAP HANA client version with the version of the SAP HANA server where it will be connected.

SAS/ACCESS Interface to SAP IQ

Base SAS is required for the installation of SAS/ACCESS Interface to SAP IQ, formerly SAS/ACCESS Interface to Sybase IQ.

To obtain the required SAP IQ Network Client, contact your database administrator, or contact SAP Technical Support.

DBMS Products Required:
- SAP IQ Network Client version 15.4 or later
- SAP IQ Database version 15.4 or later

For SAS 9.4M3 and Later

DBMS Products Required:
- SAP IQ Network Client version 16.0
- SAP IQ Database version 16.0

SAS/ACCESS Interface to Snowflake

Base SAS is required for the installation of SAS/ACCESS Interface to Snowflake.

DBMS Products Required:
- ODBC Driver for Snowflake, version 2.20.4 or later
- The unixODBC Driver Manager. Use the latest version.

For instructions about how to configure SAS/ACCESS Interface to Snowflake, see the Configuration Guide for SAS 9.4 Foundation for UNIX Environments.

SAS/ACCESS Interface to Spark

Base SAS is required for the installation of SAS/ACCESS Interface to Spark.

Spark 2.4 or later is required.

For a list of supported Hadoop distributions and versions, refer to the following web page: https://support.sas.com/en/documentation/third-party-software-reference/9-4/support-for-hadoop.html.
**SAS/ACCESS Interface to Teradata**

Base SAS is required for the installation of SAS/ACCESS Interface to Teradata.

**DBMS Products Required:**
- Teradata Database version 13.10 or later
- Teradata CLIv2 client libraries, TTU 13.10 or later for Linux (64-bit libraries)

**For SAS 9.4M3**

**DBMS Products Required:**
- Teradata Database version 14.10 or later
- Teradata CLIv2 client libraries, TTU 14.10 or later (64-bit libraries)

**For SAS 9.4M4 – 9.4M6**

**DBMS Products Required:**
- Teradata Database version 15.10 or later
- Teradata CLIv2 client libraries, TTU 15.10 or later (64-bit libraries)

**For SAS 9.4M7**

**DBMS Products Required:**
- Teradata Database version 16.20 or later
- Teradata CLIv2 client libraries, TTU 16.20 or later

**SAS/ACCESS Interface to Vertica**

Base SAS is required for the installation of SAS/ACCESS Interface to Vertica.

SAS/ACCESS Interface to Vertica requires the Vertica ODBC Client Driver. To obtain the Vertica Client ODBC driver, contact your database administrator or Micro Focus Technical Support.

**DBMS Products Required:**
- Vertica Analytic Database version 6.1 or later
- Vertica ODBC client version 6.1 or later

**For SAS 9.4M3 – 9.4M5**

**DBMS Products Required:**
- Vertica Analytic Database version 7.1 or later
- Vertica ODBC client version 7.1 or later

**For SAS 9.4M6 and Later**

**DBMS Products Required:**
- Vertica Analytic Database version 9.1 or later
- Vertica ODBC client version 9.1 or later
For information about where to install the ODBC driver and how to configure your SAS software to work with Vertica software, refer to the Configuration Guide for SAS 9.4 Foundation for UNIX Environments, available at the following location: http://support.sas.com/documentation/installcenter/en/ikfdtnunxcg/66380/PDF/default/config.pdf.

**SAS/ACCESS Interface to Yellowbrick**

Base SAS is required for the installation of SAS/ACCESS Interface to Yellowbrick. It is new with the seventh maintenance release of SAS 9.4 (SAS 9.4M7).

SAS/ACCESS Interface to Yellowbrick includes the required 64-bit PostgreSQL ODBC driver.

**DBMS Product Required:**

Yellowbrick Database version 4.0.0-23452 or later

**SAS/AF**

**Products Required for Build Mode**

- Base SAS
- SAS/AF
- SAS/GRAPH (to create and display some graphics objects)

Other products may be required, depending on the application.

**Products Required for Run Mode**

- Base SAS
- SAS/GRAPH (to display some graphics objects)

Other products may be required, depending on the application.

**Printers**

- For printing graphics-based objects, a color or gray-scale printer is required.
- Certain non-graphic objects may require SAS/GRAPH software to print, depending on the object.

**SAS/EIS**

**Products Required for Build Mode**

- Base SAS
- SAS/AF
- SAS/EIS
- SAS/FSP
- SAS/GRAPH

Other products may be required, depending on the application.
Products Required for Run Mode
- Base SAS
- SAS/EIS
- SAS/GRAPH
Other products may be required, depending on the application.

Memory
- 96 MB required per concurrent user
- 128 MB recommended per concurrent user

Printers
- For printing graphics-based objects, a color or gray-scale printer is required.

SAS/Genetics
Base SAS and SAS/GRAPH are required for the installation of SAS/Genetics.

SAS/GIS

Products Required for Build Mode
- Base SAS
- SAS/AF
- SAS/GIS
- SAS/GRAPH
Other products may be required, depending on the application.

Products Required for Run Mode
- Base SAS
- SAS/FSP
- SAS/GIS
- SAS/GRAPH
Other products may be required, depending on the application.

Printers
A color or gray-scale printer is required.

SAS/IntrNet
SAS/IntrNet consists of several components that may be installed independently. SAS/IntrNet Server software is installed on an existing SAS system and is included on SAS 9.4 installation media.
CGI Tools and Applications

Application Dispatcher
Requires Base SAS and SAS/IntrNet Server. The Application Broker component of the Application Dispatcher must be installed on a web server.

htmSQL
Requires Base SAS, SAS/SHARE, and a SAS/IntrNet software license (SETINIT). The htmSQL component must be installed on a web server.

MDDB Report Viewer Application
Requires Base SAS, SAS/GRAPH, SAS/IntrNet, and SAS/EIS or SAS OLAP Server software. The Application Dispatcher component must be installed and configured.

Xplore Sample Web Application
Requires Base SAS and SAS/IntrNet Server. The Application Dispatcher component must be installed and configured.

Java Tools and Applications

SAS/CONNECT Driver for Java
Requires Base SAS, SAS/CONNECT, and SAS/IntrNet Server. SAS/SHARE must also be installed if data services are used. The Java Tools package must be installed on a web server or client system.

Tunnel Feature
Must be installed on a web server running on a UNIX or Windows system.

SAS/OR
The use of traditional graphics in SAS/OR software requires a SAS/GRAPH license.

SAS/QC
The use of traditional graphics in SAS/QC software requires a SAS/GRAPH license.
SAS is the world leader in providing software and services that enable customers to transform data from all areas of their business into intelligence. SAS solutions help organizations make better, more informed decisions and maximize customer, supplier, and organizational relationships. For more than 30 years, SAS has been giving customers around the world The Power to Know®. Visit us at www.sas.com.
