Overview

This document provides requirements for installing and running SAS 9.4 Foundation for Solaris. The requirements in this document have been updated for the sixth maintenance release for SAS 9.4, SAS 9.4M6 (TS1M6).

You must update your system to meet the minimum requirements before running SAS 9.4 Foundation. The major requirements listed in the document are as follows:

- Software Requirements
- Hardware Requirements
- Space Requirements
- Specific Product Requirements

Additional Resources

Configuring Your I/O Subsystem

SAS recommends the white paper titled Best Practices for Configuring your I/O Subsystem for SAS 9 Applications. You can access it here:

Support for Alternative Operating Systems

This document lists the operating systems deployed by SAS in testing the software. Additional operating systems may also be supported. For information about variants of operating systems that are alternatives to the list that SAS identifies as officially supported, see http://support.sas.com/techsup/pcn/altopsys.html.

Troubleshooting System Performance Problems

For a list of papers that are useful for troubleshooting system performance problems, see http://support.sas.com/kb/42/197.html.
Software Requirements

**Operating System**

SAS is supported on Oracle Solaris 10 Update 9 and Oracle Solaris 11 and later. To determine which Solaris release you are running, look at the `/etc/release` file using the `% cat /etc/release` command. Your result should look something like this:

```
Solaris 10 9/10 s10x_u9wos_14a X86
Copyright (c) 2010, Oracle and/or its affiliates. All rights reserved.
Assembled 11 August 2010
```

Verify that the first line includes a value of “Solaris 10 9/10” or later.

SAS recommends that you apply the latest Oracle Solaris Update for x64 Solaris 10 to your Solaris 10 installation.

If you are installing or running SAS 9.4 on Solaris 11, SAS requires that you install the Solaris compatibility/ucb and system/xopen/xcu4 packages. You can download these packages from this location: [http://pkg.oracle.com/solaris/release/en/index.shtml](http://pkg.oracle.com/solaris/release/en/index.shtml)

The Sun Performance Libraries, which include BLAS and LAPACK routines, require installation of the SUNWlibmsr, SUNWcslr, and SUNWpiclu packages on your system.

**Note:** The patch levels listed were correct at the time this document was published. However, patches that are required for Solaris are subject to unexpected change. To ensure you have the latest patch requirements, go to the Install Center web page ([http://support.sas.com/installcenter](http://support.sas.com/installcenter)) to find the most recent updates to this System Requirements document.

The file systems where SAS is installed must have the `setuid` mount option enabled because sasauth, sasperm, and elssrv require it at SAS run time.

In UNIX environments, the SAS BASE (V9) engine requires a POSIX-compliant file system. Consult the vendor for confirmation that the file system you are considering has been certified POSIX-compliant.

**Java Requirements**

**Web Browsers**

Both SAS 9.4 Foundation software and client applications support recent versions of popular web browsers to display SAS user interfaces. To run SAS clients, use a browser and platform combination that is listed on the following SAS Support page:

A few SAS product user interfaces deploy HTML5 to support newer features. For example, SAS Visual Analytics provides an optional “modern” appearance mode. The individual system requirements documents for these products include a link to additional information about supported web browsers.

SAS 9.4 Foundation offers a Remote Browsing feature to display information. Instead of using a local browser, SAS 9.4 Foundation sends the information as a URL to your desktop computer for display in a web browser. This feature removes the browser overhead from the server and allows for the display of output that requires browser plug-ins that do not run on a 64-bit computer. A software agent, the Remote Browser Server, is installed on your desktop computer to enable SAS to communicate with your browser.

To enable remote browsing, your desktop computer must be running on Windows 7 and later, or Linux for x64.

**Remote Browsing**

SAS 9.4 Foundation uses Remote Browsing to display web-based information. Instead of running a browser on the workstation server, SAS 9.4 Foundation sends the URL to your desktop computer for display in a web browser. This feature removes the browser overhead from the server and allows for the display of output that requires browser plug-ins that do not run on a 64-bit computer. A software agent, the Remote Browser Server, is installed on your desktop computer to enable SAS to communicate with your browser.

SAS creates a URL that references the information to be displayed (usually program help or ODS output) and sends the URL to the SAS Remote Browser Server on your desktop computer (Step 1). The Remote Browser Server sends a request to the browser to display a page (Step 2). The browser then reconnects to SAS to retrieve the information and display it (Step 3).
Remote Browsing runs on Windows 7, Windows 8, Windows 10, and 64-bit Linux. To use the remote browsing feature, your desktop computer must have a recent version of one of the following browsers installed:

- Google Chrome
- Microsoft Edge
- Microsoft Internet Explorer
- Mozilla Firefox

The SAS Remote Browser Server, SAS Foundation, and client applications support 32-bit or 64-bit browser software. However, 64-bit browsers are recommended.

In addition to the required operating system and browser, the Remote Browser Server must be installed and running on your desktop machine for SAS to display web information. The installer for the Remote Browser Server can be found on the SAS 9.4 Software Downloads site (http://support.sas.com/downloads/). The browser must also be configured to allow pop-up windows.
Hardware Requirements

Machines Supported
The following machines are supported:

- All models that support Solaris 10 for x64
- Intel processors with Intel 64 support
- AMD processors with AMD64 support

Distribution Media
The following distribution methods are supported:

- Electronic Software Delivery
- DVD

System Configuration
The following are recommended minimums* for a deployment of SAS 9.4 Foundation for Solaris for x64 systems:

Desktop Systems
- A minimum of two cores
- 2 GB RAM (available to SAS)
- Swap space: 1.5 times physical RAM or 250 GB, whichever is less

Server Systems
- A minimum of 4 cores
- 16 GB RAM (available to SAS)
- Swap space: 1.5 times physical RAM or 250 GB, whichever is less
- I/O Throughput of at least 100 MB/second/core

*Note: SAS recommends obtaining a hardware recommendation that is based on your estimated workload and number of users.

Displays Supported
SAS 9.4 supports any X display server in conjunction with an ICCCM-compliant window manager.

Space Requirements
SAS 9.4 Foundation requires approximately 30 MB of disk space on the /tmp partition to complete the installation.

SAS recommends consulting with a SAS Sizing Expert for an official hardware recommendation that is based on your estimated SAS workload and number of users. Disk space requirements are provided for individual components in separate documents. However, the space requirements that you can obtain from the individual System Requirements documents that are provided for SAS
Solutions and other add-on products are not a substitution for expert advice. To request sizing expertise, send an email to contactcenter@sas.com.

Specific Product Requirements

Base SAS Software

Requirements for SPD Engine on Solaris
• An SMP (symmetric multiprocessing) computer with at least two CPUs; four are preferred
• At least one I/O channel per two CPUs
• Enough disk drives to have at least one mount point per CPU isolated on its own disk; two mount points per CPU are preferred

SAS Analytics Accelerator for Teradata
The SAS Analytics Accelerator for Teradata requires Base SAS, SAS/ACCESS Interface to Teradata, and at least one of the following products:
• SAS/ETS
• SAS/STAT
• SAS Enterprise Miner

SAS has extended SAS/ACCESS and SAS In-Database Technologies support to selected cloud and database variants of supported data sources. For a list of the supported variants, see https://support.sas.com/en/documentation/third-party-software-reference/9-4/support-for-database.html.

DBMS Products Required:
• Teradata Database version 13.10 or later
• Teradata CLIv2 client libraries, TTU 13.10 or later for Solaris for x64 (64-bit libraries)

For SAS 9.4M3
DBMS Products Required:
• Teradata Database version 14.10 or later
• Teradata CLIv2 client libraries, TTU 14.10 or later (64-bit libraries)

For SAS 9.4M4 and 9.4M5
DBMS Products Required:
• Teradata Database version 15.10 or later
• Teradata CLIv2 client libraries, TTU 15.10 or later (64-bit libraries)

For SAS 9.4M6
DBMS Products Required:
• Teradata Database version 16.10 or later
• Teradata CLIv2 client libraries, TTU 16.10 or later (64-bit libraries)
SAS In-Database Code Accelerator for Greenplum

The SAS In-Database Code Accelerator for Greenplum requires Base SAS and SAS/ACCESS Interface to Greenplum. It also requires the SAS Embedded Process to be installed and configured on your database.

DBMS Operating Systems:
- Red Hat Enterprise Linux 64-bit, version 6.7 or later
- SUSE Linux Enterprise Server 64-bit, version 11 or later with the latest Service Pack

DBMS Products Required:
- Greenplum Database version 4.2.2 or later
- Greenplum Partner Connector (GPPC) version 1.2 or later

For SAS 9.4M2 - 9.4M5

DBMS Products Required:
- Greenplum Database version 4.3 or later
- Greenplum Partner Connector (GPPC) version 1.2 or later

In Greenplum 5.x, the Partner Connector library (GPPC) is integrated natively into the database. If you are using a Greenplum 5.0 or later database, it is not necessary to install the package. For best performance, SAS recommends using Greenplum 5.7 or later.

For SAS 9.4M6

DBMS Product Required: Greenplum Database version 5.7 or later

For best results, SAS recommends having the latest Service Packs on the client and server.

SAS In-Database Code Accelerator for Hadoop

The SAS In-Database Code Accelerator for Hadoop requires Base SAS and SAS/ACCESS Interface to Hadoop. It also requires the SAS Embedded Process to be installed and configured on Hadoop.

For supported Hadoop distributions and versions, refer to the following web page:

SAS has extended SAS/ACCESS and SAS In-Database Technologies support to selected cloud and database variants of supported data sources. For more information about the supported variants, see https://support.sas.com/en/documentation/third-party-software-reference/9-4/support-for-database.html.

SAS In-Database Code Accelerator for Teradata

The SAS In-Database Code Accelerator for Teradata requires Base SAS and SAS/ACCESS Interface to Teradata. It also requires the SAS Embedded Process to be installed and configured on your database.

Contact a Teradata representative to obtain the required support functions for the SAS Embedded Process. It is important to install the latest version from Teradata at Your Service. Teradata Customer Service coordinates installation of the SAS Embedded Process packages and application of the SAS Embedded Process support functions on the DBMS machine.
SAS has extended SAS/ACCESS and SAS In-Database Technologies support to selected cloud and database variants of supported data sources. For a list of the supported variants, see https://support.sas.com/en/documentation/third-party-software-reference/9-4/support-for-database.html.

**DBMS Products Required:**
- Teradata Database version 13.10 or later
- Teradata CLIv2 client libraries, TTU 13.10 or later for Solaris for x64 (64-bit libraries)

**For SAS 9.4M3**

**DBMS Products Required:**
- Teradata Database version 14.10 or later
- Teradata CLIv2 client libraries, TTU 14.10 or later (64-bit libraries)
- SAS Embedded Process support functions (sasepfunc-14.10-4 or later)

**For SAS 9.4M4 – 9.4M5**

**DBMS Products Required:**
- Teradata Database version 15.10 or later
- Teradata CLIv2 client libraries, TTU 15.10 or later (64-bit libraries)
- SAS Embedded Process support functions (sasepfunc-15.10-4 or later)

**For SAS 9.4M6**

**DBMS Products Required:**
- Teradata Database version 16.10 or later
- Teradata CLIv2 client libraries, TTU 16.10 or later (64-bit libraries)
- SAS Embedded Process support functions (sasepfunc-16.20-2 or later)

**Note:** The version number for sasepfunc indicates the highest version of Teradata Database that is supported. It is backward-compatible with Teradata Database 15.xx and earlier versions of Teradata Database 16.xx.

**SAS Scoring Accelerator for DB2**

The SAS Scoring Accelerator for DB2 requires Base SAS, SAS Enterprise Miner, SAS/ACCESS Interface to DB2, and SAS/STAT.

A current version of the IBM XLC compiler must be installed on the DB2 server where you will be publishing scores. Contact your IBM/DB2 representative to obtain the appropriate compiler for your DB2 installation.

**DBMS Operating Systems:**
- AIX 64-bit, version 7.1 with Service Pack 3 or later
- Red Hat Enterprise Linux 64-bit, version 6.7 or later

**DBMS Products Required:**
- IBM DB2 version 10.1 with FixPack 1 or later
- Client utilities for IBM DB2 version 10.1 or later
For SAS 9.4M1 and Later

DBMS Products Required:
- IBM DB2 version 10.5 or later
- Client utilities for IBM DB2 version 10.5 or later

For best results, SAS recommends installing the latest FixPack on the client and server.

SAS Scoring Accelerator for Greenplum

The SAS Scoring Accelerator for Greenplum requires Base SAS, SAS Enterprise Miner, SAS/ACCESS Interface to Greenplum, and SAS/STAT.

DBMS Operating Systems:
- Red Hat Enterprise Linux 64-bit, version 6.7 or later
- SUSE Linux Enterprise Server 64-bit, version 11 or later with the latest Service Pack

DBMS Product Required:
- Greenplum Database version 4.2.2.0 or later
- Greenplum Partner Connector (GPPC) version 1.2 or later

For SAS 9.4M2 - 9.4M5

DBMS Products Required:
- Greenplum Database version 4.3 or later
- Greenplum Partner Connector version 1.2 or later

In Greenplum 5.x, the Partner Connector library (GPPC) is integrated natively into the database. If you are using a Greenplum 5.0 or later database, it is not necessary to install the package. For best performance, SAS recommends using Greenplum 5.7 or later.

For SAS 9.4M6

DBMS Product Required: Greenplum Database version 5.7 or later.

For best results, SAS recommends installing the latest Service Packs on the client and server.

SAS Scoring Accelerator for Hadoop

The SAS Scoring Accelerator for Hadoop requires Base SAS, SAS/ACCESS Interface to Hadoop, and SAS/STAT. It also requires SAS Enterprise Miner or SAS Model Manager.

For supported Hadoop distributions and versions, refer to the following web page: https://support.sas.com/en/documentation/third-party-software-reference/9-4/support-for-hadoop.html.

SAS has extended SAS/ACCESS and SAS In-Database Technologies support to selected cloud and database variants of supported data sources. For more information about the supported variants, see https://support.sas.com/en/documentation/third-party-software-reference/9-4/support-for-database.html.
**SAS Scoring Accelerator for Oracle**

The SAS Scoring Accelerator for Oracle requires Base SAS, SAS Enterprise Miner, SAS/ACCESS Interface to Oracle, and SAS/STAT.

SAS has extended SAS/ACCESS and SAS In-Database Technologies support to selected cloud and database variants of supported data sources. For a list of the supported variants, see https://support.sas.com/en/documentation/third-party-software-reference/9-4/support-for-database.html.

**DBMS Operating Systems:**
- Red Hat Enterprise Linux version 6.7 or later
- Oracle Enterprise Linux version 5.5 or later

**DBMS Products Required:**
- Oracle Server version 11gR2 or later. The database encoding must be UTF8.
- Oracle Client release 11gR2 (64-bit libraries) or later

*Note:* Some additional configuration might be required to use a 12c or 18c client. See the Configuration Guide for SAS 9.4 Foundation for UNIX Environments for more information.

For best results, SAS recommends installing the latest patches on the client and server.

**SAS Scoring Accelerator for SAP HANA**

SAS Scoring Accelerator for SAP HANA was new in SAS 9.4M2. It requires Base SAS, SAS Enterprise Miner, SAS/ACCESS Interface to SAP HANA, and SAS/STAT.

**DBMS Operating Systems:**
- Red Hat Enterprise Linux 64-bit, version 6.7 or later
- SUSE Linux Enterprise Server 64-bit, version 11 or later

**For SAS 9.4M2 – 9.4M3**

**DBMS Products Required:**
- SAP HANA 1.0 SPS 08 Server
- Client utilities for SAP HANA 1.0 SPS 08 or later

**For SAS 9.4M4 and Later**

**DBMS Products Required:**
- SAP HANA 1.0 SPS 12 Server or later
- Client utilities for SAP HANA 1.0 SPS 12 or later

For best results, SAS recommends installing the latest Service Packs on the client and server. SAS also recommends matching the SAP HANA client version with the version of the SAP HANA server where it will be connected.
**SAS Scoring Accelerator for SPD Server**

The SAS Scoring Accelerator for SPD Server requires Base SAS, SAS Enterprise Miner, SAS Scalable Performance Data Server version 5.1, and SAS/STAT.

**For SAS 9.4M3**

**DBMS Product Required:** SAS Scalable Performance Data Server version 5.2

**For SAS 9.4M4**

**DBMS Product Required:** SAS Scalable Performance Data Server version 5.3

**For SAS 9.4M5 and Later**

**DBMS Product Required:** SAS Scalable Performance Data Server version 5.4

**SAS Scoring Accelerator for Teradata**

The SAS Scoring Accelerator for Teradata requires Base SAS, SAS Enterprise Miner, SAS/ACCESS Interface to Teradata, and SAS/STAT. It also requires the SAS Embedded Process to be installed and configured on your database.

Contact a Teradata representative to obtain the required support functions for the SAS Embedded Process. It is important to install the latest version from Teradata at Your Service. Teradata Customer Service coordinates installation of the SAS Embedded Process packages and application of the SAS Embedded Process support functions on the DBMS machine.

**DBMS Products Required:**
- Teradata Database version 13.10 or later
- Teradata CLImp2 client libraries, TTU 13.10 or later for Solaris for x64 (64-bit libraries)

**For SAS 9.4M3**

**DBMS Products Required:**
- Teradata Database version 14.10 or later
- Teradata CLImp2 client libraries, version TTU 14.10 or later (64-bit libraries)
- SAS Embedded Process support functions (sasepfunc-14.10-4 or later)

**For SAS 9.4M4 and 9.4M5**

**DBMS Products Required:**
- Teradata Database version 15.10 or later
- Teradata CLImp2 client libraries, TTU 15.10 or later (64-bit libraries)
- SAS Embedded Process support functions (sasepfunc-15.10-4 or later)
**For SAS 9.4M6**

**DBMS Products Required:**
- Teradata Database version 16.10 or later
- Teradata CLlv2 client libraries, TTU 16.10 or later (64-bit libraries)
- SAS Embedded Process support functions (sasepfunc-16.10-4 or later)

*Note:* The version number for sasepfunc indicates the latest version of Teradata Database that is supported. It is backward-compatible with Teradata Database 15.xx and earlier versions of Teradata Database 16.xx.

**SAS/ACCESS Interface to Amazon Redshift**

SAS/ACCESS Interface to Amazon Redshift was new with the April 2016 release of SAS/ACCESS. Base SAS is required for the installation of SAS/ACCESS Interface to Amazon Redshift.

SAS/ACCESS Interface to Amazon Redshift includes a required ODBC driver.

For instructions about how to configure SAS/ACCESS Interface to Amazon Redshift, see the Configuration Guide for SAS 9.4 Foundation for UNIX.

**SAS/ACCESS Interface to DB2**

Base SAS is required for the installation of SAS/ACCESS Interface to DB2.

SAS/ACCESS Interface to DB2 can be installed on a DB2 server or on a DB2 client node with an installation of the IBM Data Server Client. In addition, DB2 Connect must be licensed to connect to DB2 databases that reside on AS/400, VSE, VM, MVS, and z/OS systems.

**DBMS Products Required:**
- IBM DB2 version 10.1 or later
- Client utilities for IBM DB2 version 10.1 or later

**For SAS 9.4M1 and Later**

**DBMS Products Required:**
- IBM DB2 10.5 or later
- Client utilities for IBM DB2 10.5 or later

For best results, SAS recommends installing the latest FixPack on the client and server.

**SAS/ACCESS Interface to Greenplum**

Base SAS is required for the installation of SAS/ACCESS Interface to Greenplum.

SAS/ACCESS Interface to Greenplum includes the required 64-bit ODBC driver.

For instructions about how to configure SAS/ACCESS Interface to Greenplum, see the Configuration Guide for SAS 9.4 for UNIX Environments.

**DBMS Product Required:** Greenplum Database version 4.3 or later.

SAS does not recommend using Greenplum Database versions 5.0 - 5.6.
For SAS 9.4M6
DBMS Product Required: Greenplum Database version 5.7 or later.

SAS/ACCESS Interface to Hadoop
Base SAS is required for the installation of SAS/ACCESS Interface to Hadoop.
For supported Hadoop distributions and versions, refer to the following web page:
SAS has extended SAS/ACCESS and SAS In-Database Technologies support to selected cloud and
database variants of supported data sources. For a list of the supported variants, see

SAS/ACCESS Interface to HAWQ
Base SAS is required for the installation of SAS/ACCESS Interface to HAWQ.
SAS/ACCESS Interface to HAWQ includes the required 64-bit ODBC driver.

For SAS 9.4M3
DBMS Product Required: HAWQ Database version 1.2.1 or later

For SAS 9.4M4
DBMS Product Required: HAWQ Database version 2.0 or later

For SAS 9.4M5 and Later
DBMS Product Required: HAWQ Database version 2.2 or later
For instructions about how to configure SAS/ACCESS Interface to HAWQ, see the Configuration Guide for SAS 9.4 for UNIX Environments.

SAS/ACCESS Interface to JDBC
SAS/ACCESS Interface to JDBC was new with the November 2018 release of SAS/ACCESS. Base SAS
is required for the installation of SAS/ACCESS Interface to JDBC.
SAS/ACCESS Interface to JDBC requires a Java Database Connectivity (JDBC) driver. JDBC drivers
are often available from DBMS vendors and from other third-party JDBC driver developers.

SAS/ACCESS Interface to Microsoft SQL Server
Base SAS is required for the installation of SAS/ACCESS Interface to Microsoft SQL Server.
SAS/ACCESS Interface to Microsoft SQL Server includes the required ODBC driver.

Note: With the release of SAS 9.4 M4, SAS/ACCESS Interface to Microsoft SQL Server now includes
support for the Microsoft Azure SQL Database.
SAS has extended SAS/ACCESS and SAS In-Database Technologies support to selected cloud and database variants of supported data sources. For a list of the supported variants, see https://support.sas.com/en/documentation/third-party-software-reference/9-4/support-for-database.html.

**DBMS Product Required:** Microsoft SQL Server 2008 or later.

**For SAS 9.4M3 and Later**

**DBMS Product Required:** Microsoft SQL Server 2012 or later.

For directions about how to configure SAS/ACCESS Interface to Microsoft SQL Server, see the *Configuration Guide for SAS 9.4 for UNIX Environments*.

**SAS/ACCESS Interface to MySQL**

Base SAS is required for the installation of SAS/ACCESS Interface to MySQL.

SAS has extended SAS/ACCESS and SAS In-Database Technologies support to selected cloud and database variants of supported data sources. For a list of the supported variants, see https://support.sas.com/en/documentation/third-party-software-reference/9-4/support-for-database.html.

**DBMS Products Required:**

- MySQL Client version 5.1, 5.6, or 5.7
- MySQL Server version 5.1 or later

**For SAS 9.4M4 and Later**

**DBMS Products Required:**

- MySQL Client version 5.6 or 5.7
- MySQL Server version 5.6 or later

For more information about SAS/ACCESS Interface to MySQL software, see the MySQL chapter in *SAS/ACCESS Software for Relational Databases: Reference*.

**SAS/ACCESS Interface to ODBC**

Base SAS is required for the installation of SAS/ACCESS Interface to ODBC.

**DBMS Product Required:** A compliant ODBC driver manager and ODBC driver (64-bit libraries)

ODBC drivers are often available from DBMS vendors and other third-party ODBC driver developers. The ODBC driver you select may require additional DBMS software in order to access the data.

You may have to use a text editor to edit the `odbc.ini` file in your home directory to configure data sources. Some ODBC driver vendors may allow a system administrator to maintain a centralized copy by setting an environment variable.

The ODBC drivers are ODBC API-compliant dynamic link libraries, referred to in UNIX as shared objects. You must include the full path to the dynamic link libraries in the OS load library environment variable, i.e. `LD_LIBRARY_PATH`, `LIBPATH`, or `SHLIB_PATH`, so that the ODBC drivers can be loaded dynamically at run time.

For more information, consult your ODBC driver vendor.
**SAS/ACCESS Interface to Oracle**

Base SAS is required for the installation of SAS/ACCESS Interface to Oracle.

SAS/ACCESS Interface to Oracle software can be installed on either a full Oracle RDBMS server node or an Oracle client node.

To use the Bulk Load feature of this SAS product, the Oracle SQL*Loader data-loading utility must be installed. This utility can be obtained by running the Oracle installer and selecting the Oracle Utilities product. Refer to your Oracle documentation for information on SQL*Loader.

SAS has extended SAS/ACCESS and SAS In-Database Technologies support to selected cloud and database variants of supported data sources. For a list of the supported variants, see https://support.sas.com/en/documentation/third-party-software-reference/9-4/support-for-database.html.

**DBMS Products Required:**
- Oracle Database 11gR2 or later
- Oracle Client 11gR2 (64-bit libraries) or later

**Notes:** Some additional configuration might be required to use a 12c or 18c client. See the Configuration Guide for SAS 9.4 Foundation for UNIX Environments for more information. For best results, SAS recommends installing the latest patches on the client and server.

**SAS/ACCESS Interface to PC Files**

Base SAS is required for the installation of SAS/ACCESS Interface to PC Files.

**Product Required on Windows:** 32-bit or 64-bit SAS PC Files Server, running the same “bitness” of ACE (Microsoft Access Database Engine 2010 Redistributable) driver on the same Windows machine.

**DBMS Product Required on Windows:** Microsoft Access Database Engine 2010 Redistributable (ACE) or a later version.

SAS/ACCESS Interface to PC Files supports access to virtually any data source through ODBC support on Windows, as well as the following software formats:
- dBase files (.dbf)
- Excel files (.xls,.xlsx,.xlsb,.xlsm)
- JMP files (.jmp is in Base)
- Lotus files (.wk1,.wk3, and .wk4)
- Microsoft Access database files (.mdb or .accdb)
- Paradox (.db)
- SPSS files (.sav)
- Stata files (.dta)

SAS PC Files Server (pcfservlet.exe or pcfservice.exe) running on Windows is required to use the PCFILES libname engine to access Microsoft Access database files, Microsoft Excel workbook files, or any ODBC-supported data sources.

You can run SAS PC Files Server as a Windows service or as an application listening to the PCFILES libname engine. SAS PC Files Server provides data encryption and authentication features with default port 9621, which can be configured through the SAS PC Files Server application console. Note
that the “bitness” (32-bit or 64-bit) of SAS PC Files Server must match that of the Microsoft ACE driver on the same Windows machine.

**SAS/ACCESS Interface to the PI System**
Base SAS is required for the installation of SAS/ACCESS Interface to the PI System. SAS/ACCESS Interface to the PI System uses the PI System Web API, which is HTTPS-based and RESTful. No PI System client software is required to be installed on the machine where SAS is running. However, the PI System Web API (PI Web API 2015-R2 or later) must be installed and activated on the host machine where the user connects.

**SAS/ACCESS Interface to PostgreSQL**
Base SAS is required for the installation of SAS/ACCESS Interface to PostgreSQL.

SAS/ACCESS Interface to PostgreSQL includes the required 64-bit ODBC driver.

SAS has extended SAS/ACCESS and SAS In-Database Technologies support to selected cloud and database variants of supported data sources. For a list of the supported variants, see https://support.sas.com/en/documentation/third-party-software-reference/9-4/support-for-database.html.

**DBMS Product Required:** PostgreSQL Database version 9.1.9 or later.

*For SAS 9.4M4 and 9.4M5*

**DBMS Product Required:** PostgreSQL Database version 9.1.23 or later.

*For SAS 9.4M6*

**DBMS Product Required:** PostgreSQL Database version 9.5.14 or later.

**SAS/ACCESS Interface to SAP ASE**
Base SAS is required for the installation of SAS/ACCESS Interface to SAP ASE (formerly SAS/ACCESS Interface to Sybase).

**Note:** Connecting to SAP IQ is not supported by SAS/ACCESS Interface to SAP ASE; use SAS/ACCESS Interface to SAP IQ instead.

**DBMS Product Required:** SAP ASE (Sybase) Open Client SDK, Release 15.7 or later (64-bit libraries)

**Note:** SAS/ACCESS Interface to SAP ASE no longer supports access to Microsoft SQL Server data. SAS/ACCESS Interface to SAP ASE software uses the CTLIB API calls to access the SAP ASE DBMS product. These CTLIB API calls are not supported by Microsoft SQL Server; therefore, you will have to use SAS/ACCESS Interface to Microsoft SQL Server with an appropriate ODBC driver to gain access to Microsoft SQL Server data.
**SAS/ACCESS Interface to SAP HANA**

Base SAS is required for the installation of SAS/ACCESS Interface to SAP HANA.

SAS/ACCESS Interface to SAP HANA requires the ODBC driver (64-bit) for SAP HANA from SAP. The ODBC driver is part of the SAP HANA Client.

**DBMS Products Required:**
- SAP HANA 1.0 SPS 08 Server or later
- SAP HANA ODBC Client for SAP HANA 1.0 SPS 08 or later

**For SAS 9.4M4 and Later**

**DBMS Products Required:**
- SAP HANA 1.0 SPS 12 Server or later
- SAP HANA ODBC Client for SAP HANA 1.0 SPS 12 or later

For best results, SAS recommends installing the latest Service Packs on the client and server. SAS also recommends matching the SAP HANA client version with the version of the SAP HANA server where it will be connected.

**SAS/ACCESS Interface to SAP IQ**

Base SAS is required for the installation of SAS/ACCESS Interface to SAP IQ (formerly SAS/ACCESS Interface to Sybase IQ).

To obtain the required SAP IQ Network Client, contact your database administrator or SAP Technical Support.

**DBMS Products Required:**
- SAP IQ Network Client version 15.4
- SAP IQ Database version 15.4 or later

**For SAS 9.4M3 and Later**

**DBMS Products Required:**
- SAP IQ Network Client version 16.0 or later
- SAP IQ Database version 16.0 or later

**SAS/ACCESS Interface to Teradata**

Base SAS is required for the installation of SAS/ACCESS Interface to Teradata.

**DBMS Products Required:**
- Teradata Database version 13.10 or later
- Teradata CLIv2 client libraries, TTU 13.10 or later for Solaris for x64 (64-bit libraries)
For SAS 9.4M3
DBMS Products Required:
• Teradata Database version 14.10 or later
• Teradata CLIv2 client libraries, TTU 14.10 or later (64-bit libraries)

For SAS 9.4M4 and Later
DBMS Products Required:
• Teradata Database version 15.10 or later
• Teradata CLIv2 client libraries, TTU 15.10 or later (64-bit libraries)

SAS/AF

Products Required for Build Mode
• Base SAS
• SAS/AF
• SAS/GRAPH software (to create and display some graphics objects)
Other products may be required, depending on the application.

Products Required for Run Mode
• Base SAS
• SAS/GRAPH software (to display some graphics objects)
Other products may be required, depending on the application.

Printers
• A color or gray-scale printer is required for printing graphics-based objects.
• Certain non-graphic objects may require SAS/GRAPH software to print, depending on the object.

SAS/EIS

Products Required for Build Mode
• Base SAS
• SAS/AF
• SAS/EIS
• SAS/FSP
• SAS/GRAPH
Other products may be required, depending on the application.

Products Required for Run Mode
• Base SAS
• SAS/EIS
• SAS/GRAPH
Other products may be required, depending on the application.
Memory

- 96 MB required per concurrent user
- 128 MB recommended per concurrent user

Printers

For printing graphics-based objects, a color or gray-scale printer is required.

SAS/Genetics

Base SAS and SAS/GRAPH are required for the installation of SAS/Genetics.

SAS/GIS

Products Required for Build Mode

- Base SAS
- SAS/AF
- SAS/GIS
- SAS/GRAPH

Other products may be required, depending on the application.

Products Required for Run Mode

- Base SAS
- SAS/FSP
- SAS/GIS
- SAS/GRAPH

Other products may be required, depending on the application.

Printers

A color or gray-scale printer is required.

SAS/IntrNet

SAS/IntrNet consists of several components that may be installed independently. SAS/IntrNet Server software is installed on an existing SAS system and is included on SAS 9.4 media.

CGI Tools and Applications

Application Dispatcher

Requires Base SAS and SAS/IntrNet Server software. The Application Broker component of the Application Dispatcher must be installed on a web server.

htmSQL

Requires Base SAS, SAS/SHARE, and a SAS/IntrNet software license (SETINIT). The htmSQL component must be installed on a web server.
**MDDB Report Viewer Application**
Requires Base SAS, SAS/GRAPH, SAS/IntrNet, and SAS/EIS or SAS OLAP Server software. The Application Dispatcher component must be installed and configured.

**Xplore Sample Web Application**
Requires Base SAS and SAS/IntrNet Server. The Application Dispatcher component must be installed and configured.

**Java Tools and Applications**

**SAS/CONNECT Driver for Java**
Requires Base SAS, SAS/CONNECT, and SAS/IntrNet Server software. SAS/SHARE must also be installed if data services are used. The Java Tools package must be installed on a web server or client system.

**Tunnel Feature**
Must be installed on a web server running on a UNIX or Windows system.

**SAS/OR**
The use of graphics in SAS/OR software requires a SAS/GRAPH license.
SAS is the world leader in providing software and services that enable customers to transform data from all areas of their business into intelligence. SAS solutions help organizations make better, more informed decisions and maximize customer, supplier, and organizational relationships. For more than 30 years, SAS has been giving customers around the world The Power to Know®. Visit us at www.sas.com.
