Overview

The System Requirements for SAS 9.4 Foundation for Microsoft Windows (32-bit) provides requirements for installing and running SAS 9.4 Foundation on Microsoft Windows. This document has been updated for the sixth maintenance release of SAS 9.4, SAS 9.4M6 (TS1M6).

You must update your system to meet the minimum requirements before running SAS 9.4 Foundation.

The following major requirements are listed in this document:

- Software Requirements
- Hardware Requirements
- Space Requirements
- Additional Features
- Specific Product Requirements

For additional information and to view the latest system requirements for your system, visit the SAS Install Center web site: http://support.sas.com/documentation/installcenter.

Additional Resources

Configuring your IO Subsystem

Troubleshooting System Performance Problems

For a list of papers that are useful for troubleshooting system performance problems, see http://support.sas.com/kb/42/197.html

SAS Technical Support

For information about SAS Technical Support, visit http://support.sas.com/techsup/.
Software Requirements

Preparing for Installation

File System Requirements
For releases prior to SAS 9.4M3, the 8.3 filename convention must remain enabled. The use of file systems supporting long filenames is recommended.

Administrator Privileges
An installer must have administrator privileges to install various updates. This requirement ensures that SAS 9.4 Foundation can be completely and safely installed.

Anti-virus and/or Firewall Software
Before you start, SAS recommends closing your anti-virus and firewall software. Some anti-virus and/or firewall configurations can prevent an application from installing successfully. If you are unable to close the anti-virus or firewall software, make sure that your configuration allows you to install software and to update the Registry. If your SAS installation fails and you have mandatory anti-virus or firewall software running, check with your system administrator.

Windows Software Updates
A Microsoft bug associated with the method that an individual machine is using to retrieve periodic operating-system updates may cause an error during the installation. If you are running Microsoft Windows 8 Pro, Windows Server 2012, or Windows 8 Enterprise, SAS recommends performing the steps that are described in SAS Installation Note 48410 (http://support.sas.com/kb/48/410.html). These steps ensure that the SAS Deployment Wizard can successfully enable the required version of Microsoft .NET Framework on your system during the installation.

Windows Environments
For more information about the Microsoft Windows operating systems that are supported in SAS 9.4, refer to the Supported Operating Systems web page: http://support.sas.com/resources/sysreq/hosts/pc/.

Note: Software distributed with the SAS release designation SAS 9.4M0 does not support Windows in 32-bit environments, but Windows 32-bit support is provided in SAS release 9.4M1 and later.
Server Operating Systems

**Microsoft Windows Server 2008 Family**
SAS 9.4 Foundation is supported on the following 32-bit and 64-bit editions of the Windows Server 2008 family with SAS 9.4M1 (9.4 TS1M1) and later:
- Microsoft Windows Server 2008 SP2 Enterprise Edition
- Microsoft Windows Server 2008 SP2 Standard Edition
- Microsoft Windows Server 2008 SP2 Datacenter Edition

SAS 9.4 Foundation is supported on the following editions of the Windows Server 2008 R2 family with SAS 9.4M1 and later:
- Microsoft Windows Server 2008 R2 SP1 Enterprise Edition
- Microsoft Windows Server 2008 R2 SP1 Standard Edition
- Microsoft Windows Server 2008 R2 SP1 Datacenter Edition

**Microsoft Windows Server 2012 Family**
SAS 9.4 Foundation is supported on the following editions of the Windows Server 2012 family with SAS 9.4M1 and later:
- Microsoft Windows Server 2012 Foundation Edition
- Microsoft Windows Server 2012 Essentials Edition
- Microsoft Windows Server 2012 Standard Edition
- Microsoft Windows Server 2012 Datacenter Edition

SAS 9.4 Foundation is supported on the following editions of the Windows Server 2012 R2 family with SAS 9.4M1 and later:
- Microsoft Windows Server 2012 R2 Foundation Edition
- Microsoft Windows Server 2012 R2 Essentials Edition
- Microsoft Windows Server 2012 R2 Standard Edition
- Microsoft Windows Server 2012 R2 Datacenter Edition

**Microsoft Windows Server 2016 Family**
SAS 9.4 Foundation is supported on the following editions of the Windows Server 2016 family with SAS 9.4M5 (9.4 TS1M5) and later:
- Microsoft Windows Server 2016 Essentials Edition
- Microsoft Windows Server 2016 Standard Edition with Desktop Experience
- Microsoft Windows Server 2016 Datacenter Edition with Desktop Experience

**Microsoft Windows Server 2019 Family**
SAS 9.4 Foundation is supported on the following editions of the Windows Server 2019 family with SAS 9.4M6 (9.4 TS1M6) and later:
Client Operating Systems

Windows 7 SP1 Professional, Ultimate, and Enterprise: Supported for client installations of SAS 9.4 Foundation products.

Windows 10 Home, Pro, Enterprise, and Education: Supported for client installations of SAS 9.4 Foundation products.

Windows 7 Home Premium, Windows 8, Windows 8.1, and Windows 10: Supported for the Education Analytical Suite (EAS). The following list indicates the Education Analytical Suite products that are supported on Windows 7 and later:

Note: These products are not supported individually on Windows 7 Home Premium, Windows 8, Windows 8.1, and Windows 10.

- Base SAS
- SAS/ACCESS Interface to Greenplum
- SAS/ACCESS Interface to MySQL
- SAS/ACCESS Interface to MS SQL Server
- SAS/ACCESS Interface to ODBC
- SAS/ACCESS Interface to PC Files
- SAS/ACCESS Interface to SAP ASE
- SAS/AF
- SAS/ASSIST
- SAS/CONNECT
- SAS/EIS
- SAS/ETS
- SAS/FSP
- SAS/GRAPH
- SAS/IML
- SAS/OR
- SAS/QC
- SAS/SECURE
- SAS/SHARE
- SAS/STAT

Web Browsers

Both SAS 9.4 Foundation software and client applications support recent versions of popular web browsers to display SAS user interfaces. To run SAS clients, use a browser and platform combination that is listed on the following SAS Support page:

A few SAS product user interfaces include HTML5 to support newer features. For example, SAS Visual Analytics provides an optional “modern” appearance mode. The individual system requirements documents for these products include a link to information about supported web browsers.

Remote Browsing

SAS 9.4 Foundation uses Remote Browsing to display web-based information. Instead of running a browser on the workstation server, SAS 9.4 Foundation sends the URL to your desktop computer for display in a web browser. This feature removes the browser overhead from the server and allows for the display of output that requires browser plug-ins that do not run on a 64-bit computer. A software agent, the Remote Browser Server, is installed on your desktop computer to enable SAS to communicate with your browser.
SAS creates a URL that references the information to be displayed (usually program help or ODS output) and sends the URL to the SAS Remote Browser Server on your desktop computer (Step 1). The Remote Browser Server sends a request to the browser to display a page (Step 2). The browser then reconnects to SAS to retrieve the information and display it (Step 3).

Remote Browsing runs on Windows 7, Windows 8, Windows 10, and 64-bit Linux. To use the remote browsing feature, your desktop computer must have a recent version of one of the following browsers installed:

- Google Chrome
- Microsoft Edge
- Microsoft Internet Explorer
- Mozilla Firefox

The SAS Remote Browser Server, SAS Foundation, and client applications support 32-bit or 64-bit browser software. However, 64-bit browsers are recommended.

In addition to the required operating system and browser, the Remote Browser Server must be installed and running on your desktop machine for SAS to display web information. The installer for the Remote Browser Server can be found on the SAS 9.4 Software Downloads site (http://support.sas.com/downloads/). The browser must also be configured to allow pop-up windows.

**Java Requirements**

Hardware Requirements

The following recommendations are for new customers who install SAS 9.4 Foundation for Microsoft Windows. (The hardware requirements for current SAS 9 customers remain unchanged.)

Machines Supported

SAS 9.4 supports x64 processor family systems, also known as Intel64 or AMD64 systems.

Distribution Media

The following distributions methods are supported:

- Electronic Software Delivery
- DVD

System Configuration

The following are recommended minimums* for a deployment of SAS 9.4 on Windows systems:

Desktop Systems

Examples are Windows 7, Windows 8, and Windows 10.

- a minimum of 2 cores
- 2 GB RAM (available to SAS)
- Swap space: 1.5 times physical RAM or 250 GB, whichever is less

Server Systems

- a minimum of 4 cores
- 16 GB RAM (available to SAS)
- I/O Throughput of 400MB/sec
- Swap space: 1.5 times physical RAM or 250 GB, whichever is less

* Note: SAS recommends obtaining a hardware recommendation that is based on your estimated workload and number of users.

Monitors Supported

SVGA (resolution of 800x600 or higher)

Space Requirements

SAS 9.4 Foundation requires approximately 30 MB of disk space to complete the installation. These space requirements will vary depending on the blocking factor and compression algorithms that are in use on the installation disk drive.

SAS strongly recommends consulting with a SAS sizing expert to obtain an official hardware recommendation that is based on your estimated SAS workload and number of users. Disk space
requirements are provided for individual components in separate documents. However, the space requirements that you can obtain from the individual System Requirements documents that are provided for SAS Solutions and other add-on products are not a substitution for expert advice. To request sizing expertise, send an email to contactcenter@sas.com.

**DBCS Support**

The following list contains space requirements in MB for SAS 9.4 components that offer DBCS support.

<table>
<thead>
<tr>
<th>Software Product- DBCS Support</th>
<th>Disk Space (in MB)*</th>
</tr>
</thead>
<tbody>
<tr>
<td>Core of SAS 9.4 DBCS Support Files</td>
<td>34.0</td>
</tr>
<tr>
<td>SAS/ACCESS Interface to DB2 DBCS Support Files</td>
<td>0.9</td>
</tr>
<tr>
<td>SAS/ACCESS Interface to Oracle DBCS Support Files</td>
<td>0.3</td>
</tr>
<tr>
<td>SAS/AF DBCS Support Files</td>
<td>0.5</td>
</tr>
<tr>
<td>SAS/CONNECT DBCS Support Files</td>
<td>1.1</td>
</tr>
<tr>
<td>SAS/EIS DBCS Support Files</td>
<td>0.4</td>
</tr>
<tr>
<td>SAS/Lab</td>
<td>1.9</td>
</tr>
<tr>
<td>SAS/SHARE DBCS Support Files</td>
<td>0.1</td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td><strong>39.20</strong></td>
</tr>
</tbody>
</table>

* The actual disk space size has been rounded. Therefore, the values will differ slightly from the ones shown by the installer.

**National Language Support (NLS)**

The following list contains space requirements in MB for SAS 9.4 components that support Asian languages.

<table>
<thead>
<tr>
<th>Languages Supported</th>
<th>Disk Space (in MB)*</th>
<th>See Table</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chinese – Traditional</td>
<td>3.0</td>
<td>below</td>

Additional Features

The User Installation Experience in SAS 9.4

If you are upgrading to SAS 9.4 Foundation, note that some of these features were not available in earlier releases of SAS software.

Internet Access

With Internet access, you can view and download documents from the SAS Install Center, and review material on the SAS Support web site.

HTMLHelp Viewer

To conform to the native Windows environment, SAS Help and Documentation is provided in the compiled HTML format supported by the Microsoft HTML Help Viewer, which presents help information in the same layout used in Windows applications. This format is very compact and provides extensive searching capabilities. The highest level of functionality is available when Internet Explorer, Version 6, Service Pack 2 (or later) is installed. Internet Explorer is provided with Windows Server.

SAS Universal Viewer

SAS Universal Viewer is an application for the Windows operating environment that enables you to view SAS data sets and other types of files without invoking SAS and without installing SAS on your computer. SAS Universal Viewer is a replacement for the SAS System Viewer, and it is available with Base SAS and as a free download from SAS. You can view, sort, and filter data sets, but you are not able to edit them.

With SAS Universal Viewer, you can view the following types of files:

- SAS data sets, including those that were created on platforms other than Windows
- SAS v5 transport files
- SAS programs, logs, and listings
- General text files
- HTML and other file types that open in Internet Explorer

Dynamic Data Exchange

Dynamic Data Exchange (DDE) allows for the exchange of data between SAS 9.4 Foundation and any other application supporting DDE. SAS 9.4 Foundation will act as a client only.

Email

Send Mail is provided as a menu item in the File menu. The Send Mail feature enables you to initiate email messages from SAS 9.4 Foundation. It is also possible to send email using a data step file access method or SCL via SAS/AF software. The following mail APIs are supported: MAPI and VIM. This feature requires installation of third-party products such as Microsoft Outlook or Microsoft Outlook Express. SMTP email server access via MAPI requires an Internet connection.
Lotus Notes

The Lotus Notes access method, NOTESDB, allows populating new documents directly to Lotus Notes from SAS 9.4 Foundation. The NotesSQL ODBC driver enables you to access Lotus Notes documents from within SAS 9.4. An installed license for Lotus Notes Desktop is required. SAS 9.4 Foundation supports the 32-bit version of Lotus Notes 4.0 or later.

SAS Service Configuration Utility

The SAS Service Configuration Utility allows administrators to customize the operation of SAS 9.4 Foundation running as a service on a particular computer. It requires only 0.5 MB of space on the computer using the SAS Service Configuration Utility.

For additional information, refer to the SAS Service Configuration Utility chapter in Configuration Guide for SAS 9.4 Foundation on Microsoft Windows.

SAS Deployment Wizard and Subset Orders

The SAS Deployment Wizard allows users to subset orders within a depot when it is being moved or copied. The previous process of creating a Client Software Depot or a Personal Software Depot that was available in the SAS Administrator Wizard in earlier releases of SAS has been replaced. If you are accustomed to using either one of these features, refer to the SAS Deployment Wizard and SAS Deployment Manager 9.4: User’s Guide for information about selecting the specific products that you want to copy into a separate depot. This type of newly created depot can serve the same function as those depots did in previous releases. The User’s Guide can be found here: http://support.sas.com/documentation/installcenter/en/ikdeploywizug/66034/PDF/default/user.pdf
Specific Product Requirements

**Base SAS Software**

Requirements for SPD Engine on Microsoft Windows:

SPDE will run with the minimum system specified in the Hardware Requirements section on page 6. However, the following list provides the minimum recommended system guidelines to make use of SPDE functionality:

- An SMP (symmetric multiprocessing) computer with at least two CPUs; four are preferred
- At least one I/O channel per two CPUs
- Enough disk drives to have at least one mount point per CPU, isolated on its own disk; two mount points per CPU are preferred

**SAS Analytics Accelerator for Teradata**

The SAS Analytics Accelerator for Teradata requires Base SAS, SAS/ACCESS Interface to Teradata, and at least one of the following products:

- SAS Enterprise Miner
- SAS/ETS
- SAS/STAT

SAS has extended SAS/ACCESS and SAS In-Database Technologies support to selected cloud and database variants of supported data sources. For a list of the supported variants, see https://support.sas.com/en/documentation/third-party-software-reference/9-4/support-for-database.html.

**DBMS Products Required:**

- Teradata Database 13.10 or later
- Teradata CLIv2 client libraries, Teradata Tools and Utilities (TTU) 13.10 or later for Windows (32-bit libraries)

**For SAS 9.4M3**

**DBMS Products Required:**

- Teradata Database 14.10 or later
- Teradata CLIv2 client libraries, TTU 14.10 or later for Windows (32-bit libraries)

**For SAS 9.4M4 and Later**

**DBMS Products Required:**

- Teradata Database version 15.10 or later
- Teradata CLIv2 client libraries, TTU 15.10 or later for Windows (32-bit libraries)

**SAS High-Performance Forecasting**

Base SAS is required for the installation of SAS High-Performance Forecasting software.
SAS In-Database Code Accelerator for Greenplum

The SAS In-Database Code Accelerator for Greenplum requires Base SAS and SAS/ACCESS Interface to Greenplum. It also requires the SAS Embedded Process to be installed and configured on your database.

DBMS Operating Systems:
- Red Hat Enterprise Linux 64-bit, version 6.7 or later (recommended)
- SUSE Linux Enterprise Server 64-bit, version 11 or later with the latest Service Pack

DBMS Products Required:
- Greenplum Database 4.2.2
- Greenplum Partner Connector (GPPC) 1.2

For SAS 9.4M2 – 9.4M5

DBMS Products Required:
- Greenplum Database 4.3 or later
- Greenplum Partner Connector (GPPC) 1.2 or later

In Greenplum 5.x, the Partner Connector library (GPPC) is integrated natively into the database. If you are using a Greenplum 5.0 or later database, it is not necessary to install the package. For best performance, SAS recommends using Greenplum 5.7 or later.

For SAS 9.4M6

DBMS Product Required: Greenplum Database version 5.7 or later

For best results, SAS recommends having the latest Service Packs on the client and server.

SAS In-Database Code Accelerator for Hadoop

The SAS In-Database Code Accelerator for Hadoop requires Base SAS and SAS/ACCESS Interface to Hadoop. It also requires the SAS Embedded Process to be installed and configured on Hadoop.

For supported Hadoop distributions and versions, refer to the following web page:

SAS has extended SAS/ACCESS and SAS In-Database Technologies support to selected cloud and database variants of supported data sources. For more information about the supported variants, see https://support.sas.com/en/documentation/third-party-software-reference/9-4/support-for-database.html.

SAS In-Database Code Accelerator for Teradata

The SAS In-Database Code Accelerator for Teradata requires Base SAS and SAS/ACCESS Interface to Teradata. It also requires the SAS Embedded Process to be installed and configured on your database.

Contact a Teradata representative to obtain the required support functions for the SAS Embedded Process. It is important to install the latest version from Teradata at Your Service. Teradata Customer Service coordinates installation of the SAS Embedded Process packages and application of the SAS Embedded Process support functions on the DBMS machine.
SAS has extended SAS/ACCESS and SAS In-Database Technologies support to selected cloud and database variants of supported data sources. For a list of the supported variants, see https://support.sas.com/en/documentation/third-party-software-reference/9-4/support-for-database.html.

**DBMS Products Required:**
- Teradata 13.10 or later
- Teradata CLIv2 client libraries, TTU 13.10 or later for Windows (32-bit libraries)

**For SAS 9.4M3**
- Teradata Database 14.10 or later
- Teradata CLIv2 client libraries, TTU 14.10 or later for Windows (32-bit libraries)

**For SAS 9.4M4 – 9.4M5**
- Teradata Database version 15.10 or later
- Teradata CLIv2 client libraries, TTU 15.10 or later for Windows (32-bit libraries)
- SAS Embedded Process support functions (sasepfunc-15.10-4 or later).

**For SAS 9.4M6**
- Teradata Database version 16.10 or later
- Teradata CLIv2 client libraries, TTU 16.10 or later for Windows (32-bit libraries)
- SAS Embedded Process support functions (sasepfunc-16.20-2 or later).

**Note:**  The version number for sasepfunc indicates the latest version of Teradata database that is supported. It is backward-compatible with Teradata Database 15.xx and earlier versions of Teradata Database 16.xx.

**SAS Scoring Accelerator for Aster**
The SAS Scoring Accelerator for Aster requires Base SAS, SAS Enterprise Miner, SAS/ACCESS Interface to Aster, and SAS/STAT.

**DBMS Products Required:**
- Aster Server version 4.6.3, 5.0.1, 5.1, or 6.0
- Client utilities for Aster version 4.6.3, 5.0.1, or 5.1

**DBMS Operating System:** Red Hat Enterprise Linux 64-bit version 6.7 or later.

**For SAS 9.4M2 and Later**
- Aster Server version 6.0
- Client utilities for Aster version 5.1
**SAS Scoring Accelerator for DB2**

The SAS Scoring Accelerator for DB2 requires Base SAS, SAS Enterprise Miner, SAS/ACCESS Interface to DB2, and SAS/STAT.

A current version of the IBM XLC compiler must be installed on the DB2 server where you will be publishing scores. Contact your IBM/DB2 representative to secure the appropriate compiler for your DB2 installation.

**DBMS Operating Systems:**
- IBM AIX 64-bit version 7.1 with Service Pack 3 or later
- Red Hat Enterprise Linux 64-bit, version 6.7 or later

**DBMS Products Required:**
- IBM DB2 version 10.1 with FixPack 1 or later
- Client utilities for IBM DB2 version 10.1 with FixPack 1 or later

*For SAS 9.4M1 and Later*

**DBMS Products Required:**
- IBM DB2 version 10.5 or later
- Client utilities for IBM DB2 version 10.5 or later

For best results, SAS recommends installing the latest FixPack on the client and server.

**SAS Scoring Accelerator for Greenplum**

The SAS Scoring Accelerator for Greenplum requires Base SAS, SAS Enterprise Miner, SAS/ACCESS Interface to Greenplum, and SAS/STAT.

**DBMS Operating Systems:**
- Red Hat Enterprise Linux 64-bit, version 6.7 or later
- SUSE Linux Enterprise Server 64-bit, version 11 or later with the latest Service Pack

**DBMS Products Required:**
- Greenplum Database version 4.2.2.0
- Greenplum Partner Connector (GPPC) version 1.2

*For SAS 9.4M2 – 9.4M5*

**DBMS Products Required:**
- Greenplum Database version 4.3 or later
- Greenplum Partner Connector (GPPC) version 1.2 or later

In Greenplum 5.x, the Partner Connector library (GPPC) is integrated natively into the database. If you are using a Greenplum 5.0 or later database, it is not necessary to install the package. For best performance, SAS recommends using Greenplum 5.7 or later.

*For SAS 9.4M6*

**DBMS Product Required:** Greenplum Database version 5.7 or later.

For best results, SAS recommends installing the latest Service Packs on the client and server.
**SAS Scoring Accelerator for Hadoop**

The SAS Scoring Accelerator for Hadoop requires Base SAS, SAS/ACCESS Interface to Hadoop, and SAS/STAT. It also requires SAS Enterprise Miner or SAS Model Manager.

**SAS Scoring Accelerator for Netezza**

The SAS Scoring Accelerator for Netezza requires Base SAS, SAS Enterprise Miner, SAS/ACCESS Interface to Netezza, and SAS/STAT.

**DBMS Products Required:**

- IBM Netezza version 7.0
- Client utilities for IBM Netezza version 7.0

**For SAS 9.4M3 – 9.4M5**

**DBMS Products Required:**

- IBM Netezza version 7.0.3 or later
- Client utilities for IBM Netezza version 7.0.3 or later

**For SAS 9.4M6**

**DBMS Products Required:**

- IBM Netezza version 7.2.1 or later
- Client utilities for IBM Netezza version 7.2.1 or later

For best results, match the Netezza ODBC client version with the version of the Netezza server where it will be connected. For example, if you have a Netezza server release 7.0.4, use the ODBC client driver release 7.0.4 with SAS/ACCESS Interface to Netezza.

**SAS Scoring Accelerator for Oracle**

The SAS Scoring Accelerator for Oracle requires Base SAS, SAS Enterprise Miner, SAS/ACCESS Interface to Oracle, and SAS/STAT.

**DBMS Operating Systems:**

- Red Hat Enterprise Linux version 6.7 or later
- Oracle Enterprise Linux version 5.5 or later
DBMS Products Required:

- Oracle Server version 11gR2 or later. The database encoding must be UTF8.
- Oracle Client 11gR2 (32-bit libraries) or later

*Note:* Some additional configuration might be required to use the 12c or 18c client. See the Configuration Guide for SAS 9.4 Foundation for Microsoft Windows for more information. For best results, SAS recommends installing the latest patches on the client and server.

**SAS Scoring Accelerator for SPD Server**

The SAS Scoring Accelerator for SPD Server requires Base SAS, SAS Enterprise Miner, SAS Scalable Performance Data Server version 5.1, and SAS/STAT.

*For SAS 9.4M3*

**DBMS Product Required:** SAS Scalable Performance Data Server version 5.2

*For SAS 9.4M4*

**DBMS Product Required:** SAS Scalable Performance Data Server version 5.3

*For SAS 9.4M5 and Later*

**DBMS Product Required:** SAS Scalable Performance Data Server version 5.4

**SAS Scoring Accelerator for Teradata**

The SAS Scoring Accelerator for Teradata requires Base SAS, SAS Enterprise Miner, SAS/ACCESS Interface to Teradata, and SAS/STAT. It also requires the SAS Embedded Process to be installed and configured on your database.

Contact a Teradata representative to obtain the required support functions for the SAS Embedded Process. It is important to install the latest version from Teradata at Your Service. Teradata Customer Service coordinates installation of the SAS Embedded Process packages and application of the SAS Embedded Process support functions on the DBMS machine.

**DBMS Products Required:**

- Teradata Database version 13.10 or later
- Teradata CLiv2 client libraries, TTU 13.10 or later for Windows (32-bit libraries)

*For SAS 9.4M3*

**DBMS Products Required:**

- Teradata 13 Database version 14.10.02.01 or later
- Client utilities for Teradata (13CLiv2 client libraries, TTU 14.10 or later for Windows (32-bit libraries)
For SAS 9.4M4 and 9.4M5
DBMS Products Required:
- Teradata Database version 15.10 or later
- Teradata CLIv2 client libraries, TTU 15.10 or later for Windows (32-bit libraries)
- SAS Embedded Process support functions (sasepfunc-15.10-4 or later).

For SAS 9.4M6
DBMS Products Required:
- Teradata Database version 16.10 or later
- Teradata CLIv2 client libraries, TTU 16.10 or later for Windows (32-bit libraries)
- SAS Embedded Process support functions (sasepfunc-16.20-2 or later).
  Note: The version number for sasepfunc indicates the latest version of Teradata Database that is supported. It is backward-compatible with Teradata Database 15.xx and earlier versions of Teradata Database 16.xx.

SAS/ACCESS Interface to Amazon Redshift
SAS/ACCESS Interface to Amazon Redshift was new with the April 2016 release of SAS/ACCESS. Base SAS is required for the installation of SAS/ACCESS Interface to Amazon Redshift. SAS/ACCESS Interface to Amazon Redshift includes a required ODBC driver.
For instructions about how to configure SAS/ACCESS Interface to Amazon Redshift, see the Configuration Guide for SAS 9.4 Foundation for Microsoft Windows.

SAS/ACCESS Interface to Aster
Base SAS is required for the installation of SAS/ACCESS Interface to Aster. SAS/ACCESS Interface to Aster requires the Aster ODBC driver and the bulk loading client. To obtain the ODBC driver and bulk loader client, contact Aster Data Technical Support.
DBMS Products Required:
- Aster Server version 4.6.3 or later
- Aster ODBC driver version 4.6.3 or later for Windows (32-bit libraries)

For SAS 9.4M3
DBMS Products Required:
- Aster Server version 6.0 or later
- Aster ODBC driver version 5.1 or later for Windows (32-bit libraries)

For SAS 9.4M4 and Later
DBMS Products Required:
- Aster Server version 6.1 or later
- Aster ODBC driver version 6.1 or later for Windows (32-bit libraries)
Refer to the Configuration Guide for SAS 9.4 Foundation for Microsoft Windows for information about where to install the ODBC driver and bulk loader client and how to configure your SAS software in order to work with them.

**SAS/ACCESS Interface to DB2**

Base SAS is required for the installation of SAS/ACCESS Interface to DB2.

SAS/ACCESS Interface to DB2 can be installed on a DB2 server or on a DB2 client node with an installation of the IBM Data Server Client. In addition, DB2 Connect must be licensed to connect to DB2 databases that reside on AS/400, VSE, VM, MVS, and z/OS systems.

**DBMS Products Required:**

- IBM DB2 version 10.1 or later
- Client utilities for IBM DB2 version 10.1 or later

**For SAS 9.4M1 and Later**

**DBMS Products Required:**

- IBM DB2 version 10.5 or later
- Client utilities for IBM DB2 version 10.5 or later

For best results, SAS recommends installing the latest FixPack on the client and server.

**SAS/ACCESS Interface to Greenplum**

Base SAS is required for the installation of SAS/ACCESS Interface to Greenplum.

SAS/ACCESS Interface to Greenplum includes the required ODBC driver.

**DBMS Product Required:** Greenplum Database version 4.3 or later.

SAS does not recommend using Greenplum Database versions 5.0 - 5.6.

**For SAS 9.4M6**

**DBMS Product Required:** Greenplum Database version 5.7 or later.

**SAS/ACCESS Interface to Hadoop**

Base SAS is required for the installation of SAS/ACCESS Interface to Hadoop.

For supported for Hadoop distributions and versions, refer to the following web page:

SAS has extended SAS/ACCESS and SAS In-Database Technologies support to selected cloud and database variants of supported data sources. For more information about the supported variants, see https://support.sas.com/en/documentation/third-party-software-reference/9-4/support-for-database.html.
SAS/ACCESS Interface to HAWQ

Base SAS is required for the installation of SAS/ACCESS Interface to HAWQ.
SAS/ACCESS Interface to HAWQ includes the required ODBC driver.

For SAS 9.4M3
DBMS Product Required: HAWQ Database version 1.2.1 or later.

For SAS 9.4M4
DBMS Product Required: HAWQ Database version 2.0 or later.

For SAS 9.4M5 and Later
DBMS Product Required: HAWQ Database version 2.2 or later.

For instructions about how to configure SAS/ACCESS Interface to HAWQ, see the Configuration Guide for SAS 9.4 Foundation for Microsoft Windows.

SAS/ACCESS Interface to Impala

Base SAS is required for the installation of SAS/ACCESS Interface to Impala.

DBMS Products Required:
- Impala server version 1.2.3 or later
- ODBC Driver for Impala release 2.5.13 or later

For SAS 9.4M4 and Later
DBMS Products Required:
- Impala server version 2.6 or later
- ODBC Driver for Impala release 2.5.34 or later

SAS/ACCESS Interface to JDBC

SAS/ACCESS Interface to JDBC was new with the November 2018 release of SAS/ACCESS. Base SAS is required for the installation of SAS/ACCESS Interface to JDBC.

SAS/ACCESS Interface to JDBC requires a Java Database Connectivity (JDBC) driver. JDBC drivers are often available from DBMS vendors and from other third-party JDBC driver developers.

SAS/ACCESS Interface to Microsoft SQL Server

Base SAS is required for the installation of SAS/ACCESS Interface to Microsoft SQL Server.
SAS/ACCESS Interface to Microsoft SQL Server includes the required ODBC driver.

Note: With the release of SAS 9.4 M4, SAS/ACCESS Interface to Microsoft SQL Server now includes support for the Microsoft Azure SQL Database.

SAS has extended SAS/ACCESS and SAS In-Database Technologies support to selected cloud and database variants of supported data sources. For a list of the supported variants, see https://support.sas.com/en/documentation/third-party-software-reference/9-4/support-for-database.html.
For SAS 9.4M3 and Later

DBMS Product Required: Microsoft SQL Server 2012 or later

For information about how to configure SAS/ACCESS Interface to Microsoft SQL Server, see the Configuration Guide for SAS 9.4 Foundation for Microsoft Windows.

SAS/ACCESS Interface to MySQL

Base SAS is required for the installation of SAS/ACCESS Interface to MySQL.

SAS has extended SAS/ACCESS and SAS In-Database Technologies support to selected cloud and database variants of supported data sources. For a list of the supported variants, see https://support.sas.com/en/documentation/third-party-software-reference/9-4/support-for-database.html.

DBMS Products Required:

- Any MySQL Client version 5.1 or later
- MySQL Server version 5.1 or later

For SAS 9.4M4 and Later

DBMS Products Required:

- Any MySQL Client version 5.6 or later
- MySQL Server version 5.6 or later

For more information about SAS/ACCESS Interface to MySQL software, see the MySQL chapter in SAS/ACCESS Software for Relational Databases: Reference.

SAS/ACCESS Interface to Netezza

Base SAS is required for the installation of SAS/ACCESS Interface to Netezza.

SAS/ACCESS Interface to Netezza requires an ODBC driver from IBM. To obtain the IBM Netezza ODBC driver, release 4.6.2 or later, contact IBM Technical Support at (877) 426-6006, or visit the IBM Fix Central website, http://www.ibm.com/support/fixcentral/

DBMS Products Required:

- IBM Netezza version 6.0 or later
- Client utilities for IBM Netezza version 4.6.2 or later

For SAS 9.4M2 – 9.4M5

DBMS Products Required:

- IBM Netezza version 7.0 or later
- Client utilities for IBM Netezza version 7.0 or later

For SAS 9.4M6

DBMS Products Required:

- IBM Netezza version 7.2.1 or later
- Client utilities for IBM Netezza version 7.2.1 or later
For best results, match the Netezza ODBC client version with the version of the Netezza server where it will be connected. For example, if you have a Netezza Server release 7.0.4, use the ODBC client driver release 7.0.4 with SAS/ACCESS Interface to Netezza.

**SAS/ACCESS Interface to ODBC**

Base SAS is required for the installation of SAS/ACCESS Interface to ODBC.

**DBMS Product Required:** An ODBC driver for the data source.

Before you can use SAS/ACCESS Interface to ODBC software, an ODBC driver for the data source from which you want to access data is required. ODBC drivers are often available from DBMS vendors and other third-party ODBC driver developers. The ODBC driver you select may require additional DBMS software for network access. All required network software supplied by your database system vendor must be 32-bit-compliant.

The 32-bit version of the ODBC Driver is required for the data source. All database clients for Windows 32 must be 32-bit.

**SAS/ACCESS Interface to OLE DB**

Base SAS software is required for the installation of SAS/ACCESS Interface to OLE DB.

**DBMS Product Required:** An OLE DB data source provider

Before you can use SAS/ACCESS Interface to OLE DB software, an OLE DB provider for the desired data source is required. OLE DB providers are often available from DBMS vendors and other third-party software vendors. The OLE DB provider you select may require additional DBMS software for network access.

All required network software that is supplied by your database system vendor must be 32-bit-compliant. The 32-bit version of the OLE DB provider is required for the data source.

**SAS/ACCESS Interface to Oracle**

Base SAS is required for the installation of SAS/ACCESS Interface to Oracle.

In order to use the Bulk Load feature of this SAS product, you must have the Oracle SQL*Loader data-loading utility installed. This utility can be obtained by running the Oracle installer and selecting the Oracle Utilities product. Refer to your Oracle documentation for information on SQL*Loader.

You can install an Oracle client on the same machine as SAS/ACCESS Interface to Oracle, or an Oracle server can be used in place of the Oracle client.
DBMS Products Required:

- Oracle Database 11gR2 or later
- Oracle Client 11gR2 (32-bit libraries) or later

Notes: Some additional configuration might be required to use the 12c or 18c client. See the Configuration Guide for SAS 9.4 Foundation for Microsoft Windows for more information. For best results, SAS recommends installing the latest patches on the client and server.

SAS/ACCESS Interface to PC Files

Base SAS is required for the installation of SAS/ACCESS Interface to PC Files.

Product Required on Windows: 32-bit or 64-bit SAS PC Files Server, running the same “bitness” of ACE (Microsoft Access Database Engine 2010 Redistributable) driver on the same Windows machine.

DBMS Product Required on Windows: Microsoft Access Database Engine 2010 Redistributable (ACE) or a later version.

SAS/ACCESS Interface to PC Files software supports access to virtually any data source through ODBC support on Windows, as well as the following software formats:

- dBase files (.dbf)
- Excel files (.xls, .xlsx, .xlsb, .xlsxm)
- JMP files (.jmp is in Base SAS)
- Lotus files (.wk1, .wk3 and .wk4)
- Microsoft Access database files (.mdb or .accdb)
- Paradox (.db)
- SPSS files (.sav)
- Stata files (.dta)

SAS 9.4 will automatically install the Access Database Engine 2010 Redistributable (ACE driver) when you install SAS/ACCESS Interface to PC Files software if no previous ACE driver is installed; otherwise the existing ACE installation is left as is.

Note: 32-bit and 64-bit Microsoft ACE engines cannot co-exist on 64-bit Windows. SAS recommends installing a Microsoft ACE driver to match the SAS bitness on 64-bit Windows.

Use of an ACCESS or EXCEL libname engine requires the installation of a 64-bit Microsoft ACE driver. If the message “ERROR: Connect: Class not registered” appears while you are using the libname ACCESS or EXCEL libname engine, you have the incompatible 32-bit Microsoft Access database engine (ACE) installed.

If you have to use the 32-bit ACE driver with 64-bit SAS installed, a 32-bit PC Files Server must be used to bridge the “bitness gap” with PCFILES libname engine. You can run SAS PC Files Server as a Windows service or as an application listening to the PCFILES libname engine. SAS PC Files Server provides data encryption and authentication features with default port number 9621, which can be configured through the SAS PC Files Server application console. Note that the bitness (32-bit or 64-bit) of SAS PC Files Server must match that of the Microsoft ACE driver on the same Windows machine.
**SAS/ACCESS Interface to PostgreSQL**

Base SAS is required for the installation of SAS/ACCESS Interface to PostgreSQL.

SAS/ACCESS Interface to PostgreSQL includes the required ODBC driver.

**DBMS Products Required:** PostgreSQL Database version 9.1.9 or later.

For **SAS 9.4M4 and 9.4M5**

**DBMS Products Required:** PostgreSQL Database version 9.1.23 or later.

For **SAS 9.4M6**

**DBMS Product Required:** PostgreSQL Database version 9.5.14 or later.

**SAS/ACCESS Interface to SAP ASE**

Base SAS is required for the installation of SAS/ACCESS Interface to SAP ASE (formerly SAS/ACCESS Interface to Sybase).

**Note:** Connecting to SAP IQ is not supported by SAS/ACCESS Interface to SAP ASE; use SAS/ACCESS Interface to SAP IQ instead.

**DBMS Product Required:** SAP ASE (Sybase) Open Client SDK, Release 15.7 or later (32-bit libraries).

**Note:** SAS/ACCESS Interface to SAP ASE no longer supports access to Microsoft SQL Server data. SAS/ACCESS Interface to SAP ASE uses the CTLIB API calls to access the SAP ASE DBMS product. These CTLIB API calls are not supported by Microsoft SQL Server. To obtain access to Microsoft SQL Server data, use SAS/ACCESS Interface to Microsoft SQL Server.

**SAS/ACCESS Interface to SAP HANA**

Base SAS is required for the installation of SAS/ACCESS Interface to SAP HANA.

SAS/ACCESS Interface to SAP HANA requires the ODBC driver (32-bit) for SAP HANA from SAP. The ODBC driver is part of the SAP HANA Client.

**DBMS Products Required:**
- SAP HANA 1.0 SPS 08 Server or later
- SAP HANA ODBC Client for SAP HANA 1.0 SPS 08 or later

For **SAS 9.4M4 and Later**

**DBMS Products Required:**
- SAP HANA 1.0 SPS 12 Server or later
- SAP HANA ODBC Client for SAP HANA 1.0 SPS 12 or later

For best results, SAS recommends installing the latest Service Packs on the client and server. SAS also recommends matching the SAP HANA client version with the version of the SAP HANA server where it will be connected.
SAS/ACCESS Interface to SAP IQ

Base SAS is required for the installation of SAS/ACCESS Interface to SAP IQ (formerly SAS/ACCESS Interface to Sybase IQ).

To obtain the required SAP IQ Network Client, contact your database administrator or SAP Technical Support.

DBMS Products Required:
- SAP IQ Network Client version 15.4 or later
- SAP IQ Database version 15.4 or later

For SAS 9.4M3 and Later

DBMS Products Required:
- SAP IQ Network Client version 16.0 or later
- SAP IQ Database version 16.0 or later

SAS/ACCESS Interface to Teradata

Base SAS is required for the installation of SAS/ACCESS Interface to Teradata.

SAS has extended SAS/ACCESS and SAS In-Database Technologies support to selected cloud and database variants of supported data sources. For a list of the supported variants, see https://support.sas.com/en/documentation/third-party-software-reference/9-4/support-for-database.html.

DBMS Products Required:
- Teradata Database version 13.10 or later
- Teradata CLIv2 client libraries, TTU 13.10 or later for Windows (32-bit libraries)

For SAS 9.4M3

DBMS Products Required:
- Teradata Database version 14.10 or later
- Teradata CLIv2 client libraries, TTU 14.10 or later for Windows (32-bit libraries)

For SAS 9.4M4 and Later

DBMS Products Required:
- Teradata Database version 15.10 or later
- Teradata CLIv2 client libraries, TTU 15.10 or later for Windows (32-bit libraries)

For more information about SAS/ACCESS Interface to Teradata software, see the Teradata chapter in SAS/ACCESS Software for Relational Databases: Reference.

SAS/AF

Products Required for Build Mode:
- Base SAS software
- SAS/AF software
- SAS/GRAPH software (to create and display some graphics objects)
Other products may be required, depending on the application.

**Products Required for Run Mode:**
- Base SAS software
- SAS/GRAPH software (to display some graphics objects)

Other products may be required, depending on the application.

**Printers:**
- A color or gray-scale printer is required for printing graphics-based objects.
- Depending on the object, certain non-graphic objects may require SAS/GRAPH software to print.

**SAS/CONNECT**
Base SAS is required for the installation of SAS/CONNECT.

SAS/CONNECT software uses the TCP/IP access method and supports Microsoft’s TCP/IP System Driver, which is provided with Microsoft Windows.

**SAS/EIS**

Products Required for Build Mode:
- Base SAS software
- SAS/AF software
- SAS/EIS software
- SAS/FSP software
- SAS/GRAPH software

Other products may be required, depending on the application.

Products Required for Run Mode:
- Base SAS software
- SAS/GRAPH software
- SAS/EIS software

Other products may be required, depending on the application.

**Memory:** 128 MB required

**Printers:** For printing graphics-based objects, a color or gray-scale printer is required.

**SAS/Genetics**
Base SAS and SAS/GRAPH are required for the installation of SAS/Genetics.
**SAS/GIS**

Products Required for Build Mode:

- Base SAS software
- SAS/AF software
- SAS/GIS software
- SAS/GRAPH software

Other products may be required, depending on the application.

Products Required for Run Mode:

- Base SAS software
- SAS/FSP software
- SAS/GIS software
- SAS/GRAPH software

Other products may be required, depending on the application.

**Printers:** A color or gray-scale printer is required.

**SAS/GRAZH**

The 32-bit or 64-bit version of Microsoft Internet Explorer 11 is required to run the SAS/GRAPH ActiveX Graph Control from a web browser.

The 32-bit or 64-bit versions of Internet Explorer version 11, Mozilla Firefox version 6.0 or later, or Google Chrome version 15 or later are required to run the SAS/GRAPH Java Applets from a web browser.

The Java plug-in must be installed in order for the SAS/GRAPH Java applets to be displayed in the SAS internal browser, Internet Explorer, Firefox, or Chrome. If the Java plug-in is not installed already, the SAS internal browser and Internet Explorer will prompt you for the installation, but the other web browsers will not. The Java runtime can be installed from the Java website before you run SAS Java applets.

If you are prompted to install the Java plug-in, you must refresh your browser after the plug-in is installed or the SAS/GRAPH Java applet will not display.

**SAS/IML Studio**

**RAM and Disk Space**

4 GB minimum, 8 GB recommended. For the installation, 1 GB of disk space is required.

**Display Settings**

SAS/IML Studio 15.1 requires at least 1024x768 screen resolution with 24-bit color. SAS recommends 1920x1080 resolution with 24-bit color.
SAS/IntrNet

SAS/IntrNet software consists of several components that may be installed independently. SAS/IntrNet Server software is installed on an existing SAS System and is included on SAS 9.4 media.

CGI Tools and Applications

Application Dispatcher
Requires Base SAS software and SAS/IntrNet Server software. The Application Broker component of the Application Dispatcher must be installed on a web server.

htmSQL
Requires Base SAS software, SAS/SHARE software, and a SAS/IntrNet software license (SETINIT). The htmSQL component must be installed on a web server.

MDDB Report Viewer Application
Requires Base SAS software; SAS/GRAPH software; SAS/IntrNet software; and SAS/EIS software or SAS OLAP Server software. The Application Dispatcher component must be installed and configured.

Xplore Sample Web Application
Requires Base SAS software and SAS/IntrNet Server software. The Application Dispatcher component must be installed and configured.

Design-Time Controls
Requires Base SAS software and SAS/IntrNet Server software. The Application Broker component of the Application Dispatcher must be installed on a web server.

Java Tools and Applications

SAS/CONNECT Driver for Java
Requires Base SAS software, SAS/CONNECT software, and SAS/IntrNet Server software. SAS/SHARE software must also be installed if data services are used. The Java Tools package must be installed on a web server or a client system.

Tunnel Feature:
Must be installed on a web server running on a UNIX or Windows system.

SAS/OR

The use of graphics in SAS/OR software requires a SAS/GRAPH license.

SAS/TOOLKIT

Products Included:
- Base SAS software
- A compiler
The only language with a Production status for SAS/TOOLKIT software is C. Other languages have a Beta status.

**SAS/Warehouse Administrator**

**Products Required for Build Mode**
- Base SAS software
- SAS/AF software (required only for API usage)

**Products Required for Run Mode:**
- Base SAS software
- Other products, depending on the application (e.g., SAS/ACCESS software for access to DBMS tables, SAS/CONNECT software for access to remote data, or SAS/AF software to access warehouse via method calls)

**Printers:**
- For printing graphics-based objects, a color or gray-scale printer is required.
- Certain non-graphic objects may require SAS/GRAPH software to print, depending on the object.
SAS is the leader in business analytics software and services, and the largest independent vendor in the business intelligence market. Through innovative solutions delivered within an integrated framework, SAS helps customers at more than 50,000 sites improve performance and deliver value by making better decisions faster. Since 1976, SAS has been giving customers around the world THE POWER TO KNOW®.
