SAS Integration Technologies Client 9.2

Software Requirements

Important: *Administrator privilege is required to install various system updates. To insure that SAS Integration Technologies Client can be completely and safely installed, it is required that the installer have administrator privilege.*

File System Recommendations

- The use of file systems supporting long filenames is required.
- NTFS is recommended.

Network Installations

Long filename support is required on any Windows Server or Novell Server where a server installation is performed.

Note: *When running on a 64-bit machine, SAS Integration Technologies will only run in 32-bit mode. Applications that use the components provided by the integration technologies client can only run in 32-bit mode.*

Windows Server 2003

SAS Integration Technologies Client is supported on Windows Server 2003 updated with Service Pack 1, on 32-bit architecture only.

Windows XP

SAS Integration Technologies Client is supported on Windows XP updated with Service Pack 2, on 32-bit architecture only.

Windows Vista

SAS Integration Technologies Client is supported on Windows Vista Enterprise Edition and Windows Vista Business Edition.

Windows Server 2008

SAS Integration Technologies Client is supported on Windows Server 2008.

Hardware Requirements

Intel or Intel-compatible Pentium III class processor (minimum 800 MHz recommended), with a minimum of 256 MB of memory (512 MB or more recommended).

System Requirements Wizard

The System Requirements Wizard is used to ensure that a computer onto which you would like to install Integration Technologies Client software meets the minimum system requirements. Space requirements will vary depending upon the third-party components and the individual files on your computer that need to be updated. The System Requirements Wizard will inform you of the components that do not meet the minimum system requirements before updating them.

Space Requirements

The Integration Technologies Client requires 6.8MB.

Required System Components	Disk Space Required
Microsoft .Net Framework 2.0	*110 MB
Microsoft Data Access Components	**20 MB
Visual C++ Redistributables Bundle	10 MB
Visual C++ Redistributables Bundle	4 MB
Visual C++ Redistributables Bundle	2 MB

* The .NET Framework requires 150 MB during the install process for creation of temporary files. The final footprint after the install is 110 MB. The .NET Framework also requires Microsoft Internet Explorer 5.01 or later.

**Needed for Windows 2000 systems only.

Note: *More information about the MDAC distribution, including a complete file manifest, can be found at* http://www.microsoft.com/data.

Connecting to Remote SAS Servers via IOM Bridge for COM

IOM Bridge for COM requires the installation of Microsoft's TCP/IP networking protocol, which is provided with all supported versions of Windows.

Product Requirements for the SAS Server

SAS Integration Technologies Client is compatible with all releases of Version 8.2 and higher of the SAS System. However, certain features of SAS Integration Technologies Client are only available when used with later releases of the SAS System. For example, you can create and run stored processes only using SAS 9.1 or later.
