

System Requirements

SAS[®] Model Manager 2.2

Overall

If you want the ability to publish Teradata scoring functions from within the SAS Model Manager user interface, each of the following two components require Teradata JDBC driver version 12:

- the SAS Model Manager mid-tier
- Java scoring clients that call “SAS Model Manager Java Scoring API” to access Teradata in-database scoring functions created by SAS

Server Tier

For information about the file sizes required for the server-tier software, please refer to the host-appropriate SAS 9.2 Foundation System Requirements document, available from Install Center (<http://support.sas.com/installcenter>).

SAS Model Manager Server Software

Hosts: Microsoft Windows, Microsoft Windows for x64, AIX, HP-UX for the Itanium Processor Family Architecture, Linux for x64, Solaris

Base SAS is a prerequisite for the installation of SAS Model Manager software.

The following products are included in SAS Model Manager Server. Unless explicitly licensed, use of this software is limited to SAS Model Manager Server.

- SAS Integration Technologies software
- SAS Model Manager Common Components software
- SAS Model Manager Server software
- SAS/GRAPH software

Mid-Tier

Note: *If you are using an application server on a UNIX machine, SAS strongly recommends that you set the ulimit on that machine to 10240. Speak to your system administrator for the procedure to set the ulimit for your operating system.*

The following products are included with this solution and should be installed on the mid-tier. For information about each product's specific requirements, please see its Systems Requirements document available from Install Center (<http://support.sas.com/idsearch?ct=200000>).

- SAS Analytics Platform
- SAS Model Manager Application Programming Interface
- SAS Model Manager In-Database Scoring for Teradata

Client Tier

SAS Model Manager Report Registration Client Software

Hosts: Microsoft Windows, Microsoft Windows for x64, AIX, HP-UX for the Itanium Processor Family Architecture, Linux for x64, Solaris

Base SAS is a prerequisite for the installation of SAS Model Manager Report Registration Client software.

The following products are included in SAS Model Manager Report Registration Client. Unless explicitly licensed, use of this software is limited to SAS Model Manager Report Registration Client.

- SAS Model Manager Common Components software
- SAS Model Manager Report Registration Client software

For information about the file sizes required for the SAS Model Manager Report Registration Client, please refer to the host-appropriate SAS 9.2 Foundation System Requirements document, available from Install Center (<http://support.sas.com/installcenter>).

Non-Foundation Software for the Client Tier

The following products are included with this solution and should be installed on the client tier. For information about each product's specific requirements, please see its Systems Requirements document available from Install Center (<http://support.sas.com/idsearch?ct=200000>).

- SAS Model Manager Client
- SAS Enterprise Guide
- SAS Management Console
