## SAS® Quality Knowledge Base for Product Data 5

### Supported Operating Systems and Hardware

To keep pace with changes to third-party technologies, SAS has adopted a general policy of supporting one or more baseline major versions, subsequent minor updates, and subsequent major versions for each officially supported operating system. Only the supported baseline major versions are listed in this document. The full SAS Support policy governing third-party software can be found at [https://support.sas.com/resources/thirdpartysupport/baseline\\_plus.html](https://support.sas.com/resources/thirdpartysupport/baseline_plus.html).

As part of this policy, SAS strongly encourages customers to install the latest operating-system service packs.
