Chapter 1 — Overview

This document contains information about obtaining the SAS licensing file, called the setinit, and applying it to DataFlux products. Each of the following chapters is dedicated to a single DataFlux product. You should refer to the chapter that refers to the DataFlux products that you have.

Chapter 2 — DataFlux Data Management Studio

Use the following steps to obtain and apply a setinit for DataFlux Data Management Studio.

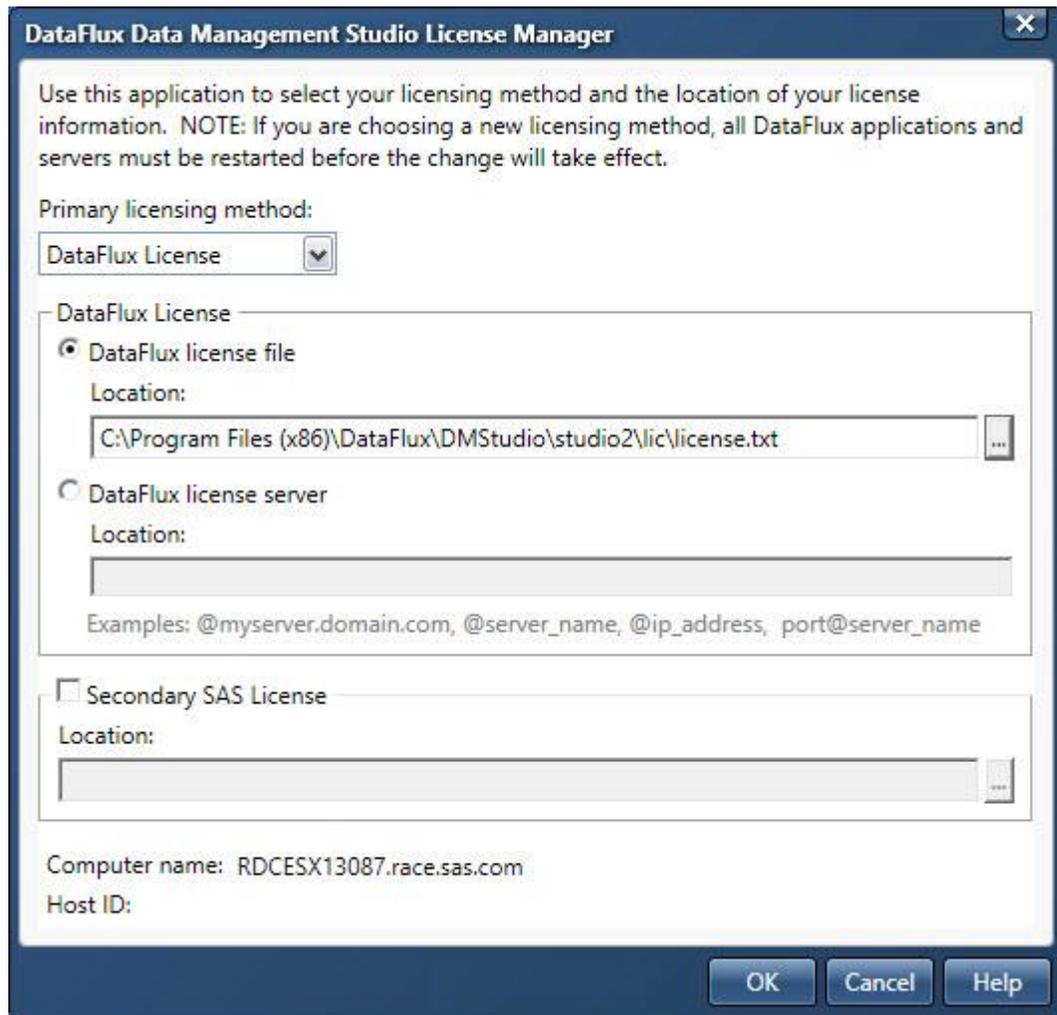

1. Obtain a SAS setinit from <http://support.sas.com/adminservices/contact.html>. You will receive an e-mail with the SAS setinit.
2. Save the SAS setinit to a location that DataFlux Data Management Studio has access to.
3. On the computer where DataFlux Data Management Studio is installed, select **Start** → **Programs** → **DataFlux** → **License Manager**. The **DataFlux Data Management Studio License Manager** dialog box is displayed.

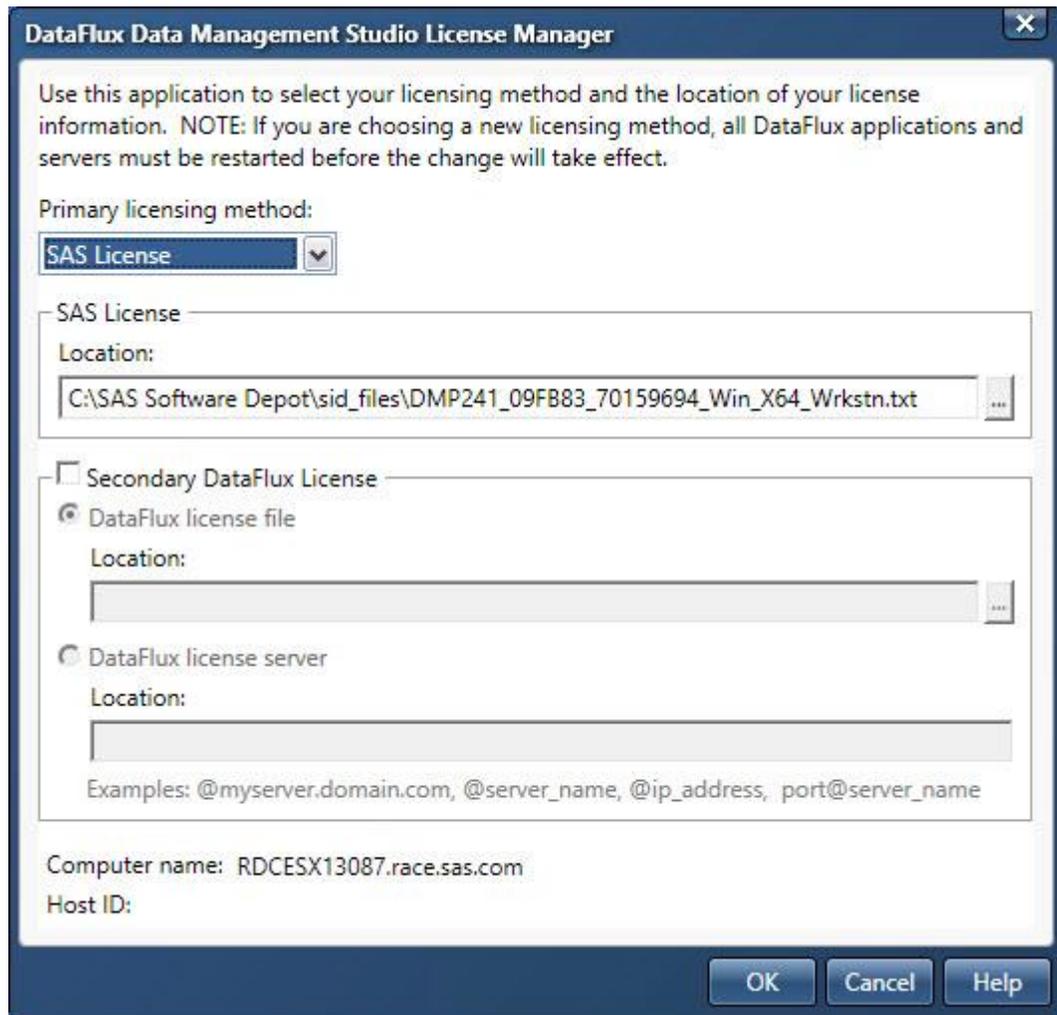

The screenshot shows the 'DataFlux Data Management Studio License Manager' dialog box. It has a title bar with a close button (X) in the top right corner. The main content area contains the following elements:

- A text block: "Use this application to select your licensing method and the location of your license information. NOTE: If you are choosing a new licensing method, all DataFlux applications and servers must be restarted before the change will take effect."
- A label: "Primary licensing method:"
- A dropdown menu currently set to "DataFlux License".
- A section titled "DataFlux License" containing two radio button options:
 - DataFlux license file: Below this is a "Location:" label and a text input field with a browse button (three dots).
 - DataFlux license server: Below this is a "Location:" label and a text input field with a browse button (three dots). Below the input field are examples: "@myserver.domain.com, @server_name, @ip_address, port@server_name".
- A section titled "Secondary SAS License" with an unchecked checkbox and a "Location:" label followed by a text input field with a browse button (three dots).
- At the bottom, it displays "Computer name: RDCEX13087.race.sas.com" and "Host ID:".
- At the very bottom are three buttons: "OK", "Cancel", and "Help".

4. In the **DataFlux Data Management Studio License Manager** dialog box, select **SAS License** as the primary licensing method.

5. In the SAS License file section of the dialog box, specify the location of the SAS setinit.
Note: SAS license names can be different from version to version.

6. Click **OK**.

Chapter 3 — DataFlux Data Management Server

Use the following steps to obtain and apply a setinit for DataFlux Data Management Server.

1. Obtain a SAS setinit from <http://support.sas.com/adminservices/contact.html>. You will receive an e-mail with the SAS setinit.
2. Save the SAS setinit to a location that the DataFlux Data Management Server has access to.
3. On the computer where DataFlux Data Management Server is installed, modify the `app.cfg` file located in the `etc` directory of the installation. The `app.cfg` file has two settings must be modified.

- a. Ensure the setting for the license is set to SAS. For example,

```
base/primary_license = SAS
```

- b. Ensure the location of the license is set.

UNIX example

```
base/primary_license_loc =  
/opt/dataflux/file_name.file_extension
```

Windows example

```
base/primary_license_loc = C:\Program  
Files\DataFlux\DMServer\2.x\etc\license\file_name.file_extension
```

4. Restart the DataFlux Data Management Server.

Chapter 4 — DataFlux Federation Server

Use the following steps to obtain and apply a setinit for DataFlux Federation Server.

Note: *These steps apply only to the DataFlux Federation Server (Release 3.1 and earlier) and not to the SAS Federation Server.*

1. Obtain a SAS setinit from <http://support.sas.com/adminservices/contact.html>. You will receive an e-mail with the SAS setinit.
2. Save the SAS setinit to a location that the DataFlux Federation Server has access to.
3. On the computer where the DataFlux Federation Server is installed, modify the `dfs_serv.xml` file in order to update the provider and the location. See the examples below.

UNIX syntax

```
<OptionSet name="License">
  <OptionSet name="Primary">
    <Option name="Provider">SAS</Option>
    <Option name="Location">
      /opt/dataflux/file_name.file_extension</Option>
  </OptionSet>
```

Windows Syntax

```
<OptionSet name="License">
  <OptionSet name="Primary">
    <Option name="Provider">SAS</Option>
    <Option name="Location"> C:\Program
      Files\DataFlux\FederationServer\2.x\etc\license\file_name.file
      _extension</Option>
  </OptionSet>
```

4. Restart the DataFlux Federation Server.

Chapter 5 — DataFlux Authentication Server

Use the following steps to obtain and apply a setinit for DataFlux Authentication Server.

1. Obtain a SAS setinit from <http://support.sas.com/adminservices/contact.html>. You will receive an e-mail with the SAS setinit.
2. Save the SAS setinit to a location that the DataFlux Authentication Server has access to.
3. On the computer where the DataFlux Authentication Server is installed, you might have to modify the `as_serv_aspsql.xml` file in order to update the provider and the location. The provider should be SAS. See the examples below.

UNIX syntax

```
<OptionSet name="Primary">  
  <Option name="Provider">SAS</Option>  
  <Option  
    name="Location">/opt/dataflux/AuthenticationServer/2.x/etc/license  
  </Option>  
</OptionSet>
```

Windows Syntax

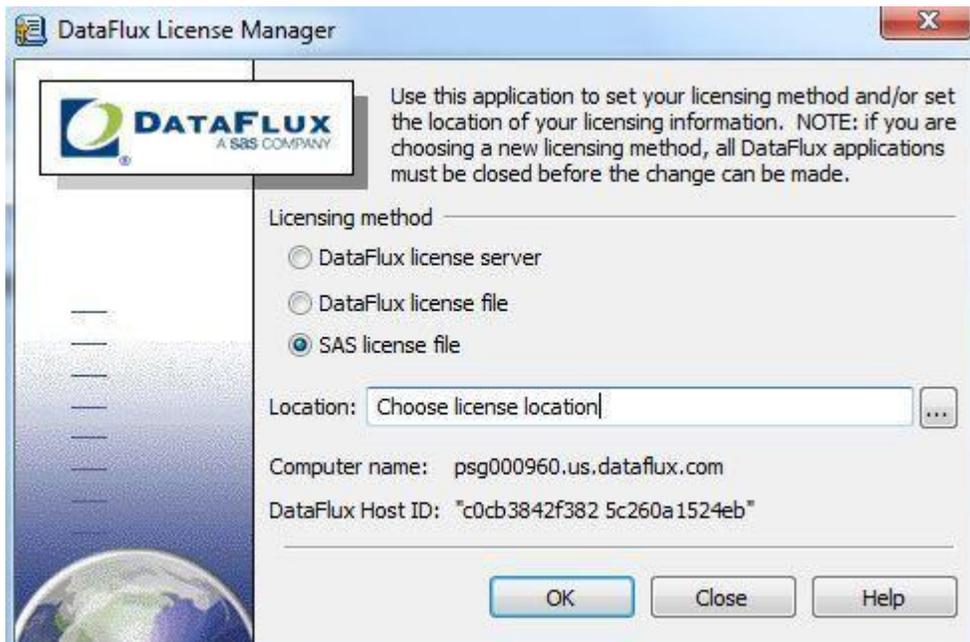

```
<OptionSet name="Primary">  
  <Option name="Provider">SAS</Option>  
  <Option name="Location">C:\Program  
    Files\DataFlux\AuthenticationServer\2.x\etc\license</Option>  
</OptionSet>
```

Chapter 6 — DataFlux dfPower Studio

Use the following steps to obtain and apply a setinit for DataFlux dfPower Studio.

1. Obtain a SAS setinit from <http://support.sas.com/adminservices/contact.html>. You will receive an e-mail with the SAS setinit.
2. Save the SAS setinit to a location that the DataFlux dfPower Studio has access to.
3. Click **Start** → **Programs** → **DataFlux dfPower Studio 8.x** → **License Manager**. In the **DataFlux License Manager** dialog box, select the **Licensing method** and specify the **Location** of the SAS setinit.

Note: SAS license names can be different from version to version.

Chapter 7 — DataFlux Integration Server

Use the following steps to obtain and apply a setinit for DataFlux Integration Server.

UNIX Instructions

1. Obtain a SAS setinit from <http://support.sas.com/adminservices/contact.html>. You will receive an e-mail with the SAS setinit.
2. Save the SAS setinit to a location that the DataFlux Integration Server has access to.
3. Specify the SAS license mode. From the `bin` directory of the DataFlux Integration Server installation, run `dflm` in order to determine the mode of the license. In order to change the mode to SAS, run `dflm -m`. See the example below.

```
-bash-3.00$ ./dflm

DataFlux License Manager

Current licensing mode: DataFlux (FLEXnet)
Current licensing version: 1.1

Generating machine code...

lmhostid - Copyright (c) 1989-2008 Acreso Software Inc. All Rights Reserved.
The FLEXnet host ID of this machine is ""00145e16b45e 00145e16b460""
Only use ONE from the list of hostids.

Run './dflm -m' if you need to change the licensing mode.

-bash-3.00$ ./dflm -m

DataFlux License Manager

Current licensing mode: DataFlux (FLEXnet)
Current licensing version: 1.1

Available licensing modes:

  1: DataFlux (FLEXnet)
  2: DataFlux (Legacy)
  3: SAS

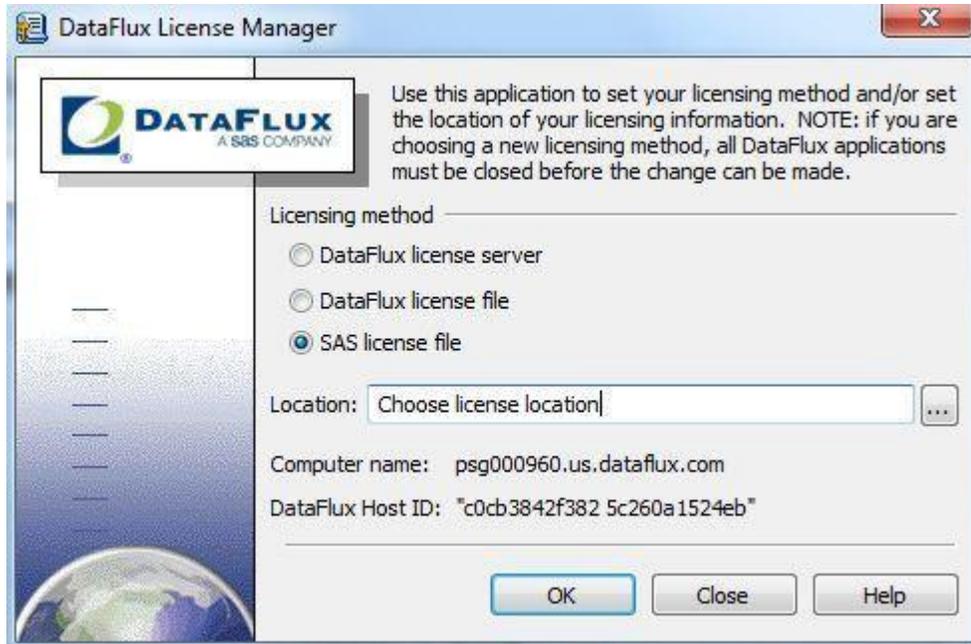

Enter the mode number to activate or 'x' to exit: █
```

4. In the `dfexec.cfg` file, confirm that the license location is set.
`license location = /opt/dataflux/file_name.file_extension`
5. Restart the DataFlux Integration Server.

Windows Instructions

1. Obtain a SAS setinit from <http://support.sas.com/adminservices/contact.html>. You will receive an e-mail with the SAS setinit.
2. Save the SAS setinit to a location that the DataFlux Integration Server has access to.
3. Click **Start** → **Programs** → **DataFlux dfPower Studio 8.x** → **License Manager**. In the **DataFlux License Manager** dialog box, select the **Licensing method** and specify the **Location** of the SAS setinit.

Note: SAS license names can be different from version to version.

4. Restart the DataFlux Integration Server

Chapter 8 — DataFlux dfIntelliServer

Use the following steps to obtain and apply a setinit for DataFlux dfIntelliServer.

UNIX Instructions

1. Obtain a SAS setinit from <http://support.sas.com/adminservices/contact.html>. You will receive an e-mail with the SAS setinit.
2. Save the SAS setinit to a location that the DataFlux dfIntelliServer has access to.
3. On the computer where DataFlux dfIntelliServer is installed, modify the `dfserv.cfg` file located in the `etc` directory of the installation. Specify the “license location” value to the location of the SAS setinit. For example:

```
license_location = /opt/dataflux/file_name.file_extension
```
4. In the `bin` directory of the installation, execute `./dflm -m` in order to run the License Manager. Select option 3 to change the license mode to SAS, as in the example that follows.

```
Prompt> ./dflm -m

DataFlux License Manager

Current licensing mode: DataFlux (FLEXnet)
Current licensing version: 1.1
Available licensing modes:

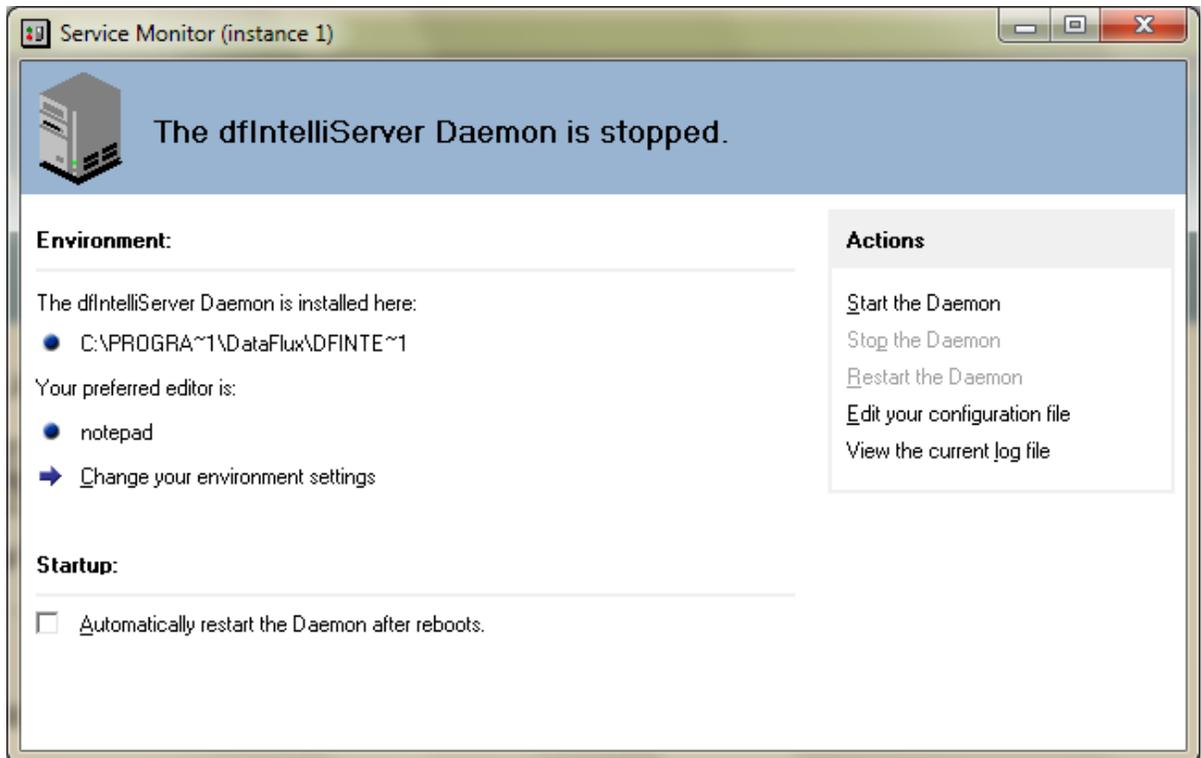

1: DataFlux (FLEXnet)
2: DataFlux (Legacy)
3: SAS

Enter the mode number to activate or 'x' to exit: 3
Changed licensing mode to SAS.
```

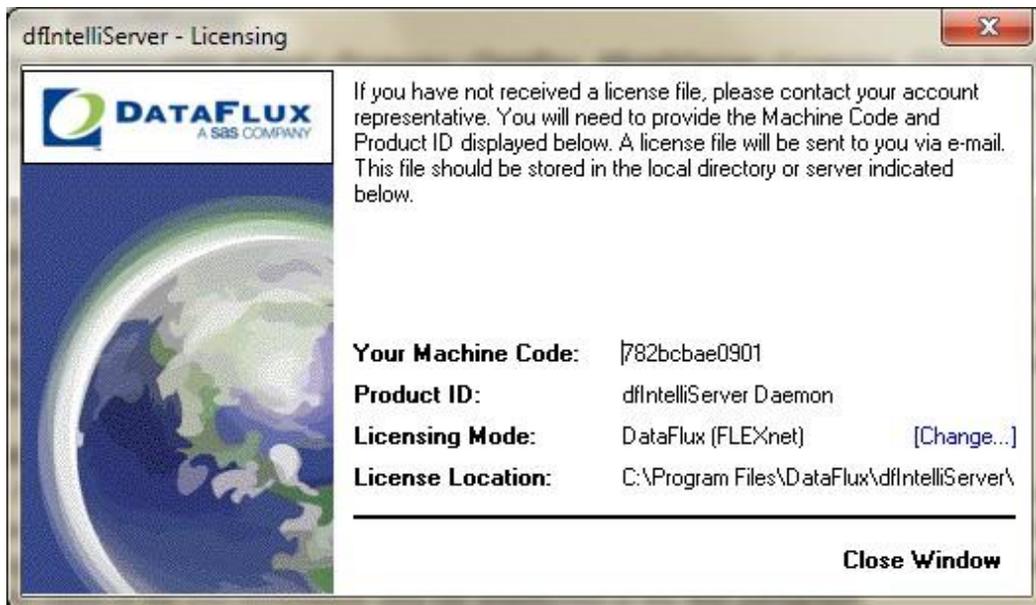

5. Restart the DataFlux dfIntelliServer.

Windows Instructions

1. Obtain a SAS setinit from <http://support.sas.com/adminservices/contact.html>. You will receive an e-mail with the SAS setinit.
2. Save the SAS setinit to a location that the DataFlux dfIntelliServer has access to.
3. On the computer where DataFlux dfIntelliServer is installed, select **Start** → **Programs** → **DataFlux dfIntelliServer** → **Service Monitor**. Select **Stop the Daemon** to stop DataFlux dfIntelliServer.

4. Select **Start** → **Programs** → **DataFlux dfIntelliServer** → **Licensing**. The **Licensing** dialog box opens.

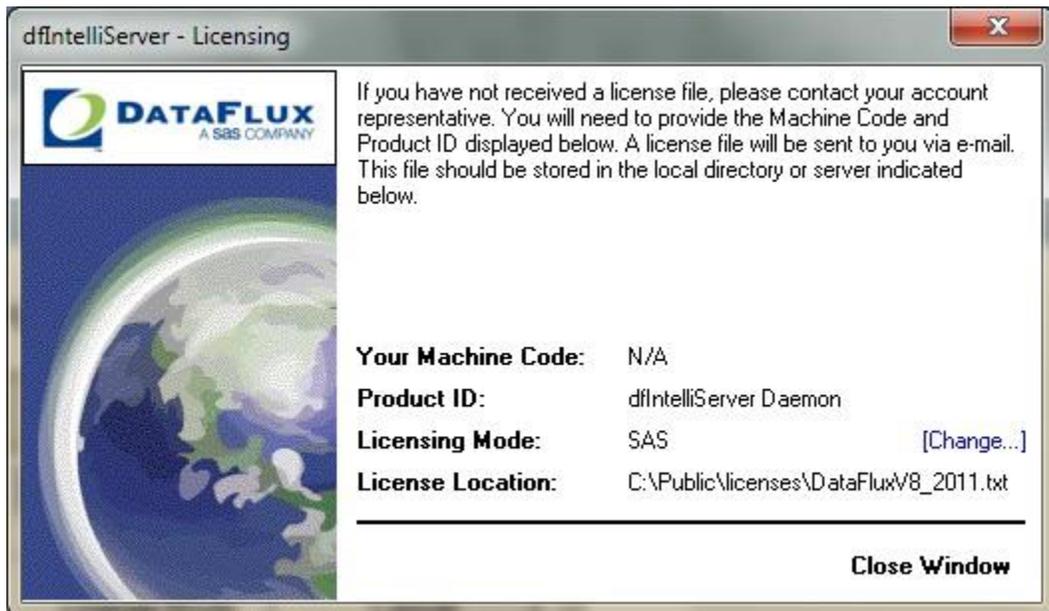

5. In the **Licensing** dialog box, click the **Change** link beside the **Licensing Mode** field.

6. In the **Set Licensing Mode** dialog box that opens, select **SAS** from the list and then click **Change Mode**.

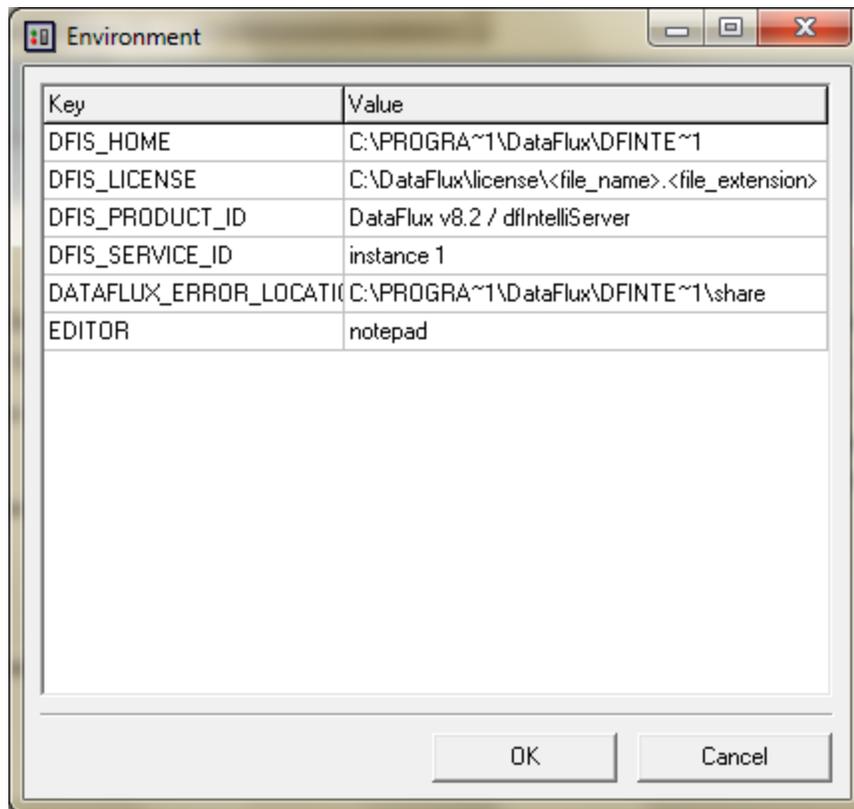

7. After the **Set Licensing Mode** dialog box closes, click **Close Window** in the **Licensing** dialog box.

- In the **Service Monitor** dialog box, click the **Change your environment settings** link. Specify the location of the SAS setinit for DFIS_LICENSE.

Note: SAS license names can be different from version to version.

- Click **OK**.
- Restart the DataFlux dfIntelliServer.

SAS is the leader in [business analytics](#) software and services, and the largest independent vendor in the business intelligence market. Through innovative solutions, SAS helps customers at more than 70,000 sites improve performance and deliver value by making better decisions faster. Since 1976 SAS has been giving customers around the world THE POWER TO KNOW®.
