

System Requirements

SAS[®] Space Optimization 6.2

Server Tier

For information about the file sizes required for the server-tier software, please visit Install Center (<http://support.sas.com/installcenter>) and refer to the SAS 9.2 Foundation System Requirements document appropriate for the host.

SAS Space Optimization SAS Server

Hosts: Microsoft Windows, Microsoft Windows for x64, AIX, Solaris

The following products are included in SAS Space Optimization SAS Server. Unless explicitly licensed, use of this software is limited to SAS Space Optimization SAS Server.

- Base SAS software
- SAS Integration Technologies software
- SAS/ACCESS engine of choice
- SAS/GRAPH software
- SAS/OR software

The vertical product SAS Retail Space Management Client should be installed on the SAS Space Optimization SAS Server. For information about the specific requirements for SAS Retail Space Management Client, please see the System Requirements document available from Install Center (<http://support.sas.com/idsearch?ct=200000>)

Finally, SAS Space Optimization SAS Server includes SAS Merchandise Data Integration and SAS Clustering, which are delivered by Technical Support.

SAS Retail Space Management Server

Hosts: Microsoft Windows, Microsoft Windows for x64

SAS Retail Space Management Server includes several vertical products that are not included with SAS Foundation:

- SAS Retail Space Management Server
- SAS 3D View Control

These vertical products are included with SAS Space Planning SAS Server but may be installed on a different machine. For information about the specific requirements for these vertical products, please see their System Requirements document available from Install Center (<http://support.sas.com/idsearch?ct=200000>).

Mid-Tier

Note: If you are using an application server on a UNIX machine, SAS strongly recommends that you set the *ulimit* on that machine to 10240. For details about the procedure to set the *ulimit* for your operating system, contact your system administrator.

SAS Space Optimization Mid-Tier

Hosts: Microsoft Windows, Microsoft Windows for x64, AIX, Solaris

SAS Retail Space Management Web Services are included with this solution and should be installed on the mid-tier. For information about SAS Retail Space Management Web Services's specific requirements, please see its System Requirements document available from Install Center (<http://support.sas.com/idsearch?ct=200000>).

Application Server

SAS Space Optimization requires one of the following application servers:

- Oracle WebLogic
- IBM WebSphere
- JBoss

For information about the required versions, please see the Third Party Software Reference Web site at <http://support.sas.com/resources/thirdpartysupport/index.html> or refer to the pre-installation checklist described in the *QuickStart Guide* included with your software order.

Additional Requirement

Adobe Flash Player 10 is required.

Database Requirements

SAS Space Optimization requires one of the following databases:

- Oracle Database v10g or newer
- IBM DB2 9.5 or newer

Client Tier

Hosts: Microsoft Windows, Microsoft Windows for x64

The following products are included with this solution and should be installed on the client tier. For information about each product's specific requirements, please see its System Requirements document available from Install Center (<http://support.sas.com/idsearch?ct=200000>).

- SAS Retail Space Management Explorer
- SAS Retail Space Management Client
- SAS Management Console

In addition, the client tier includes SAS Clustering, which is delivered by Technical Support.
