

# System Requirements

## SAS<sup>®</sup> Space Planning 6.2

### Server Tier

For information about the file sizes required for the server-tier software, please visit Install Center (<http://support.sas.com/installcenter>) and refer to the SAS 9.2 Foundation System Requirements document appropriate for the host.

### **SAS Space Planning SAS Server**

**Hosts:** Microsoft Windows, Microsoft Windows for x64, AIX, Linux for Intel Architecture, Solaris

**The following products are included in SAS Space Planning SAS Server.** Unless explicitly licensed, use of this software is limited to SAS Space Planning SAS Server.

- Base SAS software
- SAS Integration Technologies software
- SAS/ACCESS engine of choice
- SAS/GRAPH software

### **SAS Retail Space Management Server**

**Hosts:** Microsoft Windows, Microsoft Windows for x64

SAS Retail Space Management Server includes several vertical products that are not included with SAS Foundation:

- SAS Retail Space Management Server
- SAS 3D View Control

These vertical products are included with SAS Space Planning SAS Server but may be installed on a different machine. For information about the specific requirements for these vertical products, please see their System Requirements document available from Install Center (<http://support.sas.com/idsearch?ct=200000>).

### Mid-Tier

**Note:** *If you are using an application server on a UNIX machine, SAS strongly recommends that you set the ulimit on that machine to 10240. For details about the procedure to set the ulimit for your operating system, contact your system administrator.*

## **SAS Space Planning Mid-Tier**

**Hosts:** Microsoft Windows, Microsoft Windows for x64, AIX, Solaris

SAS Retail Space Management Web Services is included with this solution and should be installed on the mid-tier. For information about SAS Retail Space Management Web Services' specific requirements, please see its System Requirements document available from Install Center (<http://support.sas.com/idsearch?ct=200000>).

## **Application Server**

SAS Space Planning requires one of the following application servers:

- Oracle WebLogic
- IBM WebSphere
- JBoss

For information about the required versions, please see the Third Party Software Reference Web site at <http://support.sas.com/resources/thirdpartysupport/index.html> or refer to the pre-installation checklist described in the *QuickStart Guide* included with your software order.

## **Additional Requirement**

Adobe Flash Player 10 is required.

## **Database Requirements**

SAS Space Planning requires one of the following databases:

- Oracle Database v10g or newer
- IBM DB2 9.5 or newer

## **Client Tier**

**Hosts:** Microsoft Windows, Microsoft Windows for x64

The following products are included with this solution and should be installed on the client tier. For information about each product's specific requirements, please see its System Requirements document available from Install Center (<http://support.sas.com/idsearch?ct=200000>).

- SAS Retail Space Management Explorer
- SAS Retail Space Management Client

In addition, the client tier includes SAS Merchandise Data Integration, which is delivered by Technical Support.
