

System Requirements

SAS[®] BI Web Services for .NET 9.2

Software Requirements

Important: Administrator privilege is required to install various system updates. To ensure that SAS BI Web Services for .NET can be completely and safely installed, it is required that the installer have administrator privilege.

File System Recommendations

- NTFS is recommended.

Windows Server 2003

SAS BI Web Services for .NET is supported on Windows Server 2003 updated with Service Pack 2, on 32-bit architecture only. Internet Information Services (IIS) 6 must be installed and configured with a default web site before installing SAS BI Web Services for .NET. For 64-bit systems, IIS must be operating in 32-bit compatibility mode. If IIS is not configured in 32-bit compatibility mode, it will be set to 32-bit compatibility mode during configuration of SAS BI Web Services for .NET.

Windows XP

SAS BI Web Services for .NET is supported on Windows XP updated with Service Pack 2, on 32-bit architecture only. IIS 5.1 must be installed and configured with a default web site before installing SAS BI Web Services for .NET.

Windows Vista

SAS BI Web Services for .NET is supported on Windows Vista Enterprise Edition and Windows Vista Business Edition. IIS 7 must be installed and configured with a default web site before installing SAS BI Web Services for .NET. Additionally, the following features must be enabled for Internet Information Services: ASP.NET, .NET Extensibility, ISAPI Extensions, ISAPI Filters, Default Document, Request Filtering, IIS Management Service, and IIS Management Console.

Windows Server 2008

SAS BI Web Services for .NET is supported on Windows Server 2008. IIS 7 must be installed and configured with a default web site before installing SAS BI Web Services for .NET. Additionally, the following features must be enabled for Internet Information Services: ASP.NET, .NET Extensibility, ISAPI Extensions, ISAPI Filters, Default Document, Request Filtering, IIS Management Service, and IIS Management Console.

Hardware Requirements

Intel or Intel-compatible Pentium class processor, with a minimum of 1 GB of memory (2 GB or more recommended).

Note: When running on a 64-bit machine, SAS BI Web Services for .NET will only run in 32-bit mode. Applications that use the components provided by the integration technologies client can only run in 32-bit mode. IIS 6 on Windows Server 2003 will be configured to run in 32-bit compatibility mode on 64-bit systems during configuration.

SAS® Software Requirements

SAS BI Web Services for .NET requires the SAS Integration Technologies Client in order to run, and will install the client during installation of SAS BI Web Services for .NET.

System Requirements Wizard

The System Requirements Wizard is used to ensure that a computer onto which you would like to install BI Web Services for .NET software meets the minimum system requirements. Space requirements will vary depending upon the third-party components and the individual files on your computer that need to be updated. The System Requirements Wizard will inform you of the components that do not meet the minimum system requirements before updating them. The System Requirements Wizard will install these components if you do not already have them installed on your system:

- Microsoft Windows Installer 3.0
- Microsoft Runtime Components 8.0 SP1
- Microsoft .NET Framework 2.0
- Microsoft Web Services Enhancements (WSE) 3.0

Space Requirements

In addition to the space used by the System Requirements Wizard and the SAS Integration Technologies Client, SAS BI Web Services for .NET requires 9MB.

Connecting to Remote SAS Servers via IOM Bridge for COM

IOM Bridge for COM requires the installation of Microsoft's TCP/IP networking protocol, which is provided with all supported versions of Windows.

Product Requirements for the SAS Server

Use of SAS BI Web Services for .NET 9.2 requires a SAS 9.2 Metadata Server and at least one of the following: (a) a SAS 9.2 Stored Process Server, or (b) a SAS 9.2 Workspace Server.
