

QuickStart Guide

SAS® 9.2 Installation Kit for DVD Installations

BEFORE YOU BEGIN

1 If you have not reviewed them yet, please refer to the System Requirements.

- System requirement documentation is available from Install Center (<http://support.sas.com/documentation/installcenter/92/documents/index.html>).

2 Your SAS installation data file (SID file) is on your media and is valid for a limited time.

- If your installation process fails because the SID file has expired, contact your SAS Site Representative for a new SID file, contained in the Renewal Software Order E-mail.

3 Microsoft Windows users must be logged on as an Administrator.

- For Windows, the user name must not have a password that contains more than one dollar sign (\$). A password cannot contain single or double quotes, less than or greater than signs (< >) or an ampersand (&).
- Blank passwords are not permitted.

4 UNIX users should install under a sas account. The root account should not be used.

5 Users of OpenVMS on HP Integrity should have bypass privileges enabled.

- Ensure that the process quotas are set according to the “Minimum and Recommended AUTHORIZE Quotas” section of the System Requirements for SAS 9.2 Foundation for OpenVMS on HP Integrity, available from Install Center.
- In addition, `sys$scratch` and `sys$login` should reside on an ODS-5 volume.

6 Installation on z/OS begins with using the SAS Deployment Wizard on a Windows machine.

- The SAS Deployment Wizard gives you the choice of installing the client pieces of your order on the Windows machine or walking you through your z/OS installation parameters, then FTPing them to the machine you want to install on and performing the installation there.
- If you choose to install the client pieces, you will still have to rerun the SAS Deployment Wizard on a Windows machine to collect the parameters and pass them to the z/OS machine.

INSTALLING YOUR SOFTWARE

1 Confirm that you have received the software that you expected.

- In your installation kit, find the SAS Order Information document, which lists the software that you ordered. Verify that the SAS products and servers listed are correct and match what you expected to receive. If they are not what you expect, contact SAS Customer Service at 1-800-727-0025.
 - After you have installed your software, the SAS Order Information document will also be available from your SAS Software Depot at `/install_doc/<order number>/soi.html`.
-

2 Insert your media into your DVD drive to start the SAS Deployment Wizard.

- The media for Windows and z/OS users should autoplay. If it does not, double-click the `setup.exe` at the root of your DVD to start the SAS Deployment Wizard.
- UNIX users should mount their DVD with the appropriate mount command and execute `setup.sh` at the root of the DVD.
- OpenVMS on HP Integrity users should mount the media, i.e., `$ mount/over=id/media=cdrom/undef=(stream_lf:0) cdrom_drive`. To launch the SAS Deployment Wizard, run `setup_vms.exe` from the mounted media, i.e., `$ run cdrom_drive:[000000] setup_vms.exe`.

3 Select the language that you want to use for the installation.

4 Use the dialogs to install and configure your software.

- While you can select "Install SAS Software," SAS recommends that you select "Create or Add to a SAS Software Depot." The SAS Software Depot is a networked repository of your SAS software, containing everything you need to install your software order. After you create the SAS Software Depot, you should install from it.
- Click the Help button for more information about the choices available in each dialog.
- For more detailed information, please see the SAS Deployment Wizard User's Guide, available from Install Center (<http://support.sas.com/documentation/installcenter/deploywiz/9.2/user.pdf>).

TIPS AND ALERT NOTES

- For the latest installation news, please visit these sites for tips and Alert Notes that may not be in your documentation:
 - Alert Notes

TECHNICAL SUPPORT

- If you need assistance with the software, we ask that only the SAS Installation Representative or the SAS Support Consultant call our Technical Support Division.
 - For U.S. and Canadian customers, support is provided from our corporate headquarters in Cary, North Carolina. You may call (919) 677-8008, Monday through Friday.
 - Customers outside of the U.S. can obtain local-language technical support through the local office in their countries. Customers in these locations should contact their local office for specific support hours. See <http://support.sas.com/techsup/contact/index.html> for contact information for local offices.
- Before calling, you may want to explore the SAS Institute Technical Support Web site at <http://support.sas.com/techsup/>. The Technical Support web site offers a Knowledge Base, FAQs, Technical Support Documents and more that may answer your questions. This Web site also provides a mechanism for reporting problems.
