

The SAS[®] System Version 9 (TS M0) HP-UX[®] for the Itanium[™] Processor Family Architecture

Please Read Before Beginning Installation

Alert Notes list problems that you need to be aware of before installing or using this software. Fixes and/or workarounds may be provided for the problems. Should you need assistance with the software, we ask that only the SAS Representative or SAS Support Consultant call our Technical Support Division. Sites in the U.S. and Canada may call (919) 677-8008. Other sites should contact their SAS Representative or SAS Support Consultant for the nearest SAS office.

Installation and General System Issues

- Alert Notes about Installation and General System Issues are the only Alert Notes included in this document.
- For the latest Alert Notes about Installation, General System Issues, or product-specific issues, visit the following SAS Web site:

http://www.sas.com/service/techsup/search/alert_search.html

This Web page gives you the following search options:

- Operating System
- Release
- Sorted by
- Product
- Component

SAS recommends that you perform two searches - one in which "component" is *Installation Issues* and one in which "component" is *General System Issues*.

In addition, you may want to perform a third search in which "component" is *All Components* and select a product to view product-specific Alert Notes.

- After your initial query of Alert Notes from the Web site listed above, it is essential that one or more representatives at your site subscribe to TSNEWS-L in order to receive future Alert Notes concerning your software. By subscribing, we will automatically e-mail you with any new Alert Notes, removing the need for frequent visits to the Web site.
