What's New in SAS Quality Knowledge Base for Contact Information 31

The SAS Quality Knowledge Base (QKB) is a collection of files that store data and logic that define data management operations. SAS software products reference the QKB when performing data management operations on your data.

This document explains the changes in SAS Quality Knowledge Base for Contact Information (CI) 31.

- [Overview](#)
- [QKB Locales](#)
- [Changes in the QKB](#)
- [Known Problems](#)

See the SAS Quality Knowledge Base for Contact Information 31 online Help for additional information. For information about previous releases, see the SAS Quality Knowledge Base product page at <http://support.sas.com/documentation/onlinedoc/qkb/>.

Overview

SAS QKB CI 31 includes updates for the following locales and definitions:

English, United Kingdom

- Field Content identification analysis definition added

English, United States

- Field Content identification analysis definition updated

German, Germany

- Field Content identification analysis definition updated

Italian, Italy

- Field Content identification analysis definition updated

Japanese, Japan

- Address (Full) match definition updated

Norwegian, Norway

- Field Content identification analysis definition added

All locales

- The following definitions have improved Leap Year processing:
 - Date (DMY Validation - Numeric Only) identification analysis definition
 - Date (MDY Validation - Numeric Only) identification analysis definition

- Date (YMD Validation - Numeric Only) identification analysis definition
- Field Name identification analysis definition is now available for all locales:
 - Languages supported are: English, Danish, French, German, Hebrew, and Chinese
 - The identities were synced with the Identities produced by the Field Content identification analysis definitions

The latest SAS QKB CI documentation is available on the SAS Quality Knowledge Base support page (<http://support.sas.com/documentation/onlinedoc/qkb/index.html>).

The file format of libraries in this release differs from the file format of libraries in releases earlier than QKB CI 2010B. Therefore, it is not possible to merge QKB CI 31 into any QKB that was released prior to QKB CI 2010B. If a merge is desired, first install QKB CI 31 in a new location and then merge the QKB CI version prior to 2010B into QKB CI 31. See the QKB Merge Tool section in the DataFlux Data Management Studio online Help for details.

QKB Locales

This release includes the following locales:

Afrikaans, South Africa	English, South Africa	Malay, Malaysia
Arabic, Egypt	English, United Kingdom	Norwegian, Norway
Chinese, China	English, United States	Polish, Poland
Czech, Czech Republic	Finnish, Finland	Portuguese, Brazil
Danish, Denmark	French, Belgium	Portuguese, Portugal
Dutch, Belgium	French, Canada	Russian, Russia
Dutch, Netherlands	French, France	Slovak, Slovakia
English, Australia	German, Germany	Slovenian, Slovenia
English, Canada	Greek, Greece	Spanish, Argentina
English, Hong Kong	Hebrew, Israel	Spanish, Mexico
English, India	Hungarian, Hungary	Spanish, Spain
English, New Zealand	Italian, Italy	Swedish, Sweden
English, Philippines	Japanese, Japan	Thai, Thailand
English, Singapore	Korean, South Korea	Turkish, Turkey

Changes in the QKB

This section is organized by locale. Tables display the deprecations and enhancements made in this QKB. In some cases, changes to your data job are required. The **Deprecation Actions** section describes the actions that are necessary to keep data quality jobs properly functioning. The deprecation process is fully described in the **Deprecation Policy** topic in the SAS QKB online Help documentation. Definitions with a status of Added or Modified do not require changes to data jobs. See the online Help for details about these definitions.

If a locale shows **None**, it means no changes were made to the locale.

Deprecation Actions

Discontinue use

This definition is no longer supported and will be removed in a future release.

Replace with

This definition is no longer supported and will be removed in a future release. Switch any jobs that use the definition to use the replacement definition specified.

Modify jobs or the QKB to use the desired definition

Each definition that has been enhanced will also have a copy of the original version. The original definition is tagged and deprecated to be replaced by an enhanced definition that requires job changes. The required job changes for the enhanced definition are described in the Deprecation Action section. Users can do one of the following three options:

1. Modify their jobs to fit the new definition.
2. Modify their jobs to use the old QKB.
3. Modify the QKB by removing or renaming the new definition and then untag the old definition.

Users are encouraged to modify their jobs to take advantage of the enhanced processing.

Modify jobs to use the updated definition

1. Identity names have changed
The identity names of the definition have changed. This change requires an update to jobs that use the definition so that the identity names that are specified in those jobs match the names in the definition.
2. Preparsed input changes
Certain data quality functions expect input data that has been previously parsed. In SAS Data Quality Server, these functions are DQGENDERPARSED and DQMATCHPARSED. In DataFlux Data Management Studio the nodes are Gender Analysis (Parsed), Standardization (Parsed), and Match Codes (Parsed).
 - Definition no longer accepts preparsed input
If this definition is called by any of the preparsed input data quality functions or nodes, change it to use the corresponding function or node that does not expect preparsed input and provide the input as a single field. Jobs using functions or nodes without PARSED or (Parsed) will not require an update.
 - Preparsed input tokens have changed
If this definition is called by any of the preparsed input data quality functions or nodes, change the mapping of the input fields to the tokens

used by the enhanced definition. Jobs using functions or nodes without PARSED or (Parsed) will not require an update.

3. Output tokens have changed
Update jobs using the definition so that the output tokens of the enhanced definition are expected by those jobs.
4. Match code length has increased
Check any jobs using the definition to ensure that the match code fields can accommodate a match code with the new length.

Known Problems

- Due to the complexity of full addresses, jobs using **Address (Full)** match, parse, and standardization definitions might take a long time to complete.
- Due to the complexity of Indian addresses, jobs using the **Address**, **Address (Global)**, and **Address (Full)** match, parse, and standardization definitions in the English, India locale might show higher rates of error than are typical for other definitions. Jobs using these definitions might also take a long time to complete.
- Due to the large number of possible telephone area codes in Germany, extensive processing is required to parse German telephone numbers. Therefore, jobs run using the **Phone** match, parse, and standardization definitions in the German, Germany locale might take a long time to complete.
- When multiple locales are selected, the QKB installer for Windows might overestimate the amount of disk space required to complete the installation.
