Release Notes for SAS® Fraud Management 3.2 M2 Hot Fix 14

Description	Component	Summary	Test Scenario
The model signature can grow and shrink over versions but should do so without data loss	.OSE	The model signature can grow and shrink with version changes but should do so without data loss.	For customers using a challenger model, the signature length might grow. With this fix, the longer length is not truncated. This fix allows for a discrepancy between the segment content and the segment size for variable-length segments.
