

Release Notes for SAS® Fraud Management 3.3_M1, Hot Fix 13

Description	Component	Summary	Test Scenario
When the User Variable Segment list becomes too long, SAS® OnDemand Scoring Engine generates an error and does not start.	OSE	The User Variable Segment list becomes too long for a constant string in the SAS® System. When this problem occurs, the error <code>Could not find starting variable 'V##_SEG_ID_VERSION'</code> is generated.	When you apply this hot fix, the list length is not an issue and SAS OnDemand Scoring Engine restarts with rules deployment and without an error.
