

Release Notes for SAS® Fraud Management 4.1_M0, Hot Fix 14

Description	Component	Summary and Business Impact	Test Scenario
<p>When the User Variable Segment list becomes too long, SAS® OnDemand Scoring Engine generates an error and does not start.</p>	<p style="text-align: center;">OSE</p>	<p>Summary: The User Variable Segment list becomes too long for a constant string in the SAS® System. When this problem occurs, the error <code>Could not find starting variable 'V##_SEG_ID_VERSION'</code> is generated.</p> <p>Business Impact: SAS OnDemand Scoring Engine will not start after a rule deployment. No transactions are scored for fraud.</p>	<p>After you apply this hot fix, the list length is not an issue and SAS OnDemand Scoring Engine restarts after rules deployment, without an error.</p>
