Release Notes for SAS® Fraud Management 4.2_M1, Hot Fix 14

Description	Component	Summary and Business Impact	Test Scenario
The Agent Time Analysis report does not return data from the last hour.	REPORTS	**Summary:** When you adjust the DBMAINT_ATA_WINDOW parameter for report lag time to zero and you run job 4020, the Agent Time Analysis report only displays data through the end of the previous hour, based on browser time. **Business Impact:** The Agent Time Analysis report is missing data from the last hour.	After you apply this hot fix, Agent Time Analysis reports based on the following conditions: • the value of the DBMAINT_ATA_WINDOW parameter • the time of the last successful run for job 4020
The **Available Credit** column in the Agent Time Analysis report is always `$0.00`.	ANYLSTSWORK	**Summary:** The **Available Credit** value is not set correctly in the Agent Time Analysis report because the **OPEN_TO_BUY_AMT** column in the FCM_ALERT_ACTION database table is always null. This column should be populated by real-time demographics. The value for the field is correct in the entity-demographics section on the alert page. **Business Impact:** The **Available Credit** column in the Agent Time Analysis report is incorrect.	After you apply this hot fix, the **Available Credit** column in the Agent Time Analysis report is set correctly.
