

SAS® Life Science Analytics Framework API 2.5.1
Release Notes
November 2021

The SAS® Life Science Analytics Framework API 2.5.1 is available for use with SAS® Life Science Analytics Framework 5.4.x.

This release is primarily a compatibility release to support the latest version of SAS® Life Science Analytics Framework 5.4. A summary of the updates is listed below.

Update	Description
Compatibility API Server Changes	Compatibility API server changes were made to be compatible with the latest release of SAS® Life Science Analytics Framework 5.4.
Privileges	<p>With SAS® Life Science Analytics Framework 5.4, the global privilege PRIVILEGE_ALLOW_VISUAL_ANALYTICS was removed and, as a result, was removed in this API release.</p> <p>The scoped privilege PRIVILEGE_MANAGE_SHARED_FOLDERS was added, and the deprecated PRIVILEGE_DISABLE_VERSIONING scoped privilege has been removed.</p>
Study Components	The StudyComponent enum value TABLE has been replaced with two separate components, TABLES_ANALYSIS and TABLES_TABULATION.
Process Flow User Task	The UserTask field, actualHours, was renamed in SAS® Life Science Analytics Framework 5.4 to hoursWorked. Note: It is still named actualHours in the API. The field will be renamed in the next major API release, and the type will be changed from float to Double.
User Properties	<p>The following fields have been added to the UserDescriptor object:</p> <ul style="list-style-type: none"> • Date created • String createdBy • Date lastModified • String lastModifiedBy
