Elementary Statistics Using SAS® Price: \$69.95

This thoroughly revised and updated edition of Ramon Littell and Sandra Schlotzhauer's *SAS System for Elementary Statistical Analysis* explains the basics of SAS data sets and shows how to use SAS for descriptive statistics and graphs; discusses fundamental statistical concepts; shows analyses for comparing two groups and multiple groups, fitting regression equations, and exploring contingency tables.

Elementary Statistics Using JMP® Price: \$79.95

Sandra Schlotzhauer demonstrates how to use JMP for descriptive statistics and graphs, and continues with a discussion of fundamental statistical concepts, including normality and hypothesis testing. Using a step-by-step approach, she shows analyses for comparing two groups, comparing multiple groups, fitting regression equations, and exploring contingency tables.

Sandra Schlotzhauer provides consulting and training services, focusing on the pharmaceutical industry. She started Schlotzhauer Consulting LLC in 1996 after 15 years of experience in the software, pharmaceutical, and aerospace industries. Sandra received her BS and MS in statistics from the University of Florida. She draws on her extensive experience in teaching basic statistics to non-statisticians, with a focus on using statistical methods and software as tools to make practical decisions based on data. Sandra has used SAS software since 1979.
