### Purpose and Audience

This book contains information on setup and maintenance of SAS/ASSIST software.

The *SAS/ASSIST Software System Administrator's Guide* is written for users at customer sites who have front-line responsibility for the SAS System at their site. This varies from site to site, but generally includes the SAS Installation Representative and the SAS Support Consultant.

*Note:* The displays in this book were captured in the OS/390 operating environment. △

---

### Chapter Overview

Chapter 1, "Introduction," on page 1 provides an introduction of the book and a chapter overview.

Chapter 2, "Setting Up SAS/ASSIST Software," on page 3 describes how to set up SAS/ASSIST software, including using the SASPARM table, the SAS autoexec file, and command-line options. This chapter also includes a checklist for setting up SAS/ASSIST software.

Chapter 3, "Setting Up and Customizing Master and Group Profiles," on page 7 describes the Master/Group Profile window and how you can use it to create and customize profiles.

Chapter 4, "Printing Reports and Graphics," on page 19 describes how to print graphics while using SAS/ASSIST software. Included is a discussion of the Form window subsystem used to print reports and device drivers used to print graphics.

Chapter 5, "Setting Up Query Managers," on page 31 describes types of Query Managers available in SAS/ASSIST. Included are examples of different types of Query Managers and a discussion on creating Query Manager Tables.

## Available Resources

System Administrators should have available the *Getting Started with the SAS System Using SAS/ASSIST Software* and *Doing More with SAS/ASSIST Software* books. They should also have available the companion documentation for their operating environment.
