Using This Book ix

Chapter 1 Principal Component Analysis 1
Introduction: The Basics of Principal Component Analysis 2
Example: Analysis of the Prosocial Orientation Inventory 10
SAS Program and Output 13
Steps in Conducting Principal Component Analysis 21
An Example with Three Retained Components 41
Conclusion 55
Appendix: Assumptions Underlying Principal Component Analysis 55
References 56

Chapter 2 Exploratory Factor Analysis 57
Introduction: When Is Exploratory Factor Analysis Appropriate? 59
Introduction to the Common Factor Model 60
Exploratory Factor Analysis versus Principal Component Analysis 68
Preparing and Administering the Investment Model Questionnaire 72
SAS Program and Analysis Results 73
Steps in Conducting Exploratory Factor Analysis 79
A More Complex Example: The Job Search Skills Questionnaire 107
Conclusion 125
Appendix: Assumptions Underlying Exploratory Factor Analysis 126
References 127

Chapter 3 Assessing Scale Reliability with Coefficient Alpha 129
Introduction: The Basics of Scale Reliability 130
Coefficient Alpha 132
Assessing Coefficient Alpha with PROC CORR 133
Summarizing the Results 138
Conclusion 140
References 140

Chapter 4 Path Analysis with Manifest Variables 141
Introduction: The Basics of Path Analysis 143
Example 1: A Path-Analytic Investigation of the Investment Model 150
Overview of the Rules for Performing Path Analysis 151
Preparing the Program Figure 153
Preparing the SAS Program 164
Interpreting the Results of the Analysis 181
Modifying the Model 198
Preparing a Formal Description of the Analysis and Results for a Paper 225

Example 2: Path Analysis of a Model Predicting Victim Reactions to Sexual Harassment 234
Conclusion: Learning More about Path Analysis 245
References 245

Chapter 5 Developing Measurement Models with Confirmatory Factor Analysis 249
Introduction: A Two-Step Approach to Path Analysis with Latent Variables 250
A Model of the Determinants of Work Performance 251
Basic Concepts in Latent-Variable Analyses 254
Advantages of Path Analysis with Latent Variables 257
Necessary Conditions for Confirmatory Factor Analysis and Path Analysis with Latent Variables 259
Example: The Investment Model 261
Testing the Fit of the Measurement Model from the Investment Model Study 264
Conclusion: On to Path Analysis with Latent Variables? 340
References 340

Chapter 6 Path Analysis with Latent Variables 343
Recapitulation: Basic Concepts in Path Analysis with Latent Variables 344
Testing the Fit of the Theoretical Model from the Investment Model Study 347
Preparing a Formal Description of Results for a Paper 410
Additional Examples 422
Conclusion: Learning More about Latent Variable Models 436
References 436

Appendix A.1 Introduction to SAS Programs, SAS Logs, and SAS Output 439
Introduction: What is the SAS System? 439
Three Types of SAS System Files 440
Conclusion 447

Appendix A.2 Data Input 449
Introduction: Inputting Questionnaire Data versus Other Types of Data 450
Keying Data: An Illustrative Example 450
Inputting Data Using the CARDS Statement 455
Additional Guidelines 460
Inputting a Correlation or Covariance Matrix 469
Inputting Data Using the INFILE Statement Rather than the CARDS Statement 474
Controlling the Size of the Ouput and Log Pages with the OPTIONS Statement 476
Conclusion 477
References 477

Appendix A.3 Working with Variables and Observations in SAS Data Sets 479
Introduction: Manipulating, Subsetting, Concatenating, and Merging Data 480
Placement of Data Manipulation and Data Subsetting Statements 481
Data Manipulation 486
Data Subsetting 498
A More Comprehensive Example 504
Concatenating and Merging Data Sets 505

Conclusion 514
References 514

Appendix A.4 Exploring Data with PROC MEANS, PROC FREQ, PROC PRINT, and PROC UNIVARIATE 515
Introduction: Why Perform Simple Descriptive Analyses? 516
Example: A Revised Volunteerism Survey 517
Computing Descriptive Statistics with PROC MEANS 519
Creating Frequency Tables with PROC FREQ 523
Printing Raw Data with PROC PRINT 526
Testing for Normality with PROC UNIVARIATE 527
Conclusion 546
References 546

Appendix A.5 Preparing Scattergrams and Computing Correlations 547
Introduction: When Are Pearson Correlations Appropriate? 548
Interpreting the Coefficient 548
Linear versus Nonlinear Relationships 550
Producing Scattergrams with PROC PLOT 552
Computing Pearson Correlations with PROC CORR 557
Appendix: Assumptions Underlying the Pearson Correlation Coefficient 563
Reference 564

Appendix B Data Sets 565

Appendix C Critical Values of the Chi-Square Distribution 569

Index 571
