Using This Book.....	xi
Chapter 1 Basic Concepts in Research and Data Analysis	1
Introduction: A Common Language for Researchers	2
Steps to Follow When Conducting Research	3
Variables, Values, and Observations	6
Scales of Measurement and JMP Modeling Types	9
Basic Approaches to Research	12
Descriptive versus Inferential Statistical Analysis	16
Hypothesis Testing	17
Summary.....	25
References.....	25
Chapter 2 Getting Started with JMP	27
Starting the JMP Application.....	28
The JMP Approach to Statistics.....	29
A Step-by-Step JMP Example.....	30
Summary.....	38
References.....	38
Chapter 3 Working with JMP Data	39
Structure of a JMP Table	40
JMP Tables, Rows, and Columns.....	43
Getting Data into JMP.....	51
Data Table Management	58
Summary.....	70
References.....	70

Chapter 4 Exploring Data with the Distribution Platform.....	71
Why Perform Simple Descriptive Analyses?.....	72
Example: The Helpfulness Social Survey.....	73
Computing Summary Statistics.....	76
Testing for Normality	83
A Step-by-Step Distribution Analysis Example	100
Summary.....	100
References.....	101
Chapter 5 Measures of Bivariate Association	103
Significance Tests versus Measures of Association.....	104
Choosing the Correct Statistic	105
Pearson Correlations	110
Spearman Correlations	123
The Chi-Square Test of Independence.....	124
Fisher's Exact Test for 2 by 2 Tables	133
Summary.....	134
Assumptions Underlying the Tests.....	135
References.....	136
Chapter 6 Assessing Scale Reliability with	
 Coefficient Alpha	137
Introduction: The Basics of Scale Reliability	138
Cronbach's Alpha	141
Computing Cronbach's Alpha.....	142
Summarizing the Results	150
Summary.....	151
References.....	151
Chapter 7 <i>t</i> Tests: Independent Samples and	
 Paired Samples	153
Introduction: Two Types of <i>t</i> Tests.....	154
The Independent-Samples <i>t</i> Test.....	155
The Paired-Samples <i>t</i> Test.....	174
Summary.....	189

	Assumptions Underlying the t Test.....	190
	References.....	192
Chapter 8	One-Way ANOVA with One Between-Subjects Factor	193
	Introduction: One-Way ANOVA Between-Subjects Design.....	194
	Example with Significant Differences between Experimental Conditions.....	198
	Example with Nonsignificant Differences between Experimental Conditions.....	212
	Understanding the Meaning of the F Statistic	215
	Summary.....	217
	Assumptions Underlying One-Way ANOVA with One Between-Subjects Factor	217
	References.....	218
Chapter 9	Factorial ANOVA with Two Between-Subjects Factors	219
	Introduction to Factorial Designs	220
	Some Possible Results from a Factorial ANOVA	223
	Example with Nonsignificant Interaction	231
	Example with a Significant Interaction.....	249
	Summary.....	256
	Assumptions for Factorial ANOVA with Two Between-Subjects Factors	256
	References.....	257
Chapter 10	Multivariate Analysis of Variance (MANOVA) with One Between-Subjects Factor.....	259
	Introduction: Multivariate Analysis of Variance (MANOVA)	260
	Example with Significant Differences between Experimental Conditions.....	266
	Example with Nonsignificant Differences between Experimental Conditions.....	276
	Summary.....	278

Assumptions Underlying MANOVA with One Between-Subjects Factor	279
References.....	280
Chapter 11 One-Way ANOVA with One Repeated-Measures Factor.....	281
Introduction: What Is a Repeated-Measures Design?.....	282
Example: Significant Differences in Investment Size Across Time.....	284
Repeated-Measures Design versus Between-Subjects Design	297
Univariate or Multivariate ANOVA for Repeated-Measures Analysis.....	300
Summary.....	311
Assumptions of the Multivariate Analysis of Design with One Repeated-Measures Factor	312
References.....	312
Chapter 12 Factorial ANOVA with Repeated-Measures Factors and Between-Subjects Factors	315
Introduction: Mixed-Design ANOVA	316
Possible Results from a Two-Way Mixed-Design ANOVA.....	322
Problems with the Mixed-Design ANOVA	327
Example with a Nonsignificant Interaction	328
Example with a Significant Interaction.....	346
An Alternative Approach to a Univariate Repeated- Measures Analysis	354
Summary.....	357
Assumptions for Factorial ANOVA with Repeated- Measures and Between-Subjects Factors.....	358
References.....	360
Chapter 13 Multiple Regression.....	361
Introduction to Multiple Regression.....	362
Predicting a Response from Multiple Predictors.....	368
The Results of a Multiple Regression Analysis	378
Example: A Test of the Investment Model.....	394

Computing Simple Statistics and Correlations	397
Estimating the Full Multiple Regression Equation	401
Uniqueness Indices for the Predictors	408
Summarizing the Results	409
Getting the Big Picture.....	410
Formal Description of Results for a Paper	411
Summary.....	412
Assumptions Underlying Multiple Regression	413
References.....	415
Chapter 14 Principal Component Analysis.....	417
Introduction to Principal Component Analysis	418
The Prosocial Orientation Inventory	427
Using the Multivariate Platform	430
Conducting the Principal Component Analysis	432
A Graphical Approach to Principal Components.....	452
Summary.....	456
Assumptions Underlying Principal Component Analysis	457
References.....	457
Appendix Choosing the Correct Statistic.....	459
Introduction: Thinking about the Number and Scale of Your Variables.....	460
Guidelines for Choosing the Correct Statistic	463
Summary.....	466
Index	467
