Foreword xi
Acknowledgments xiii

Chapter 1 Why Do I Need to Write Code? 1

Introduction 2
A Brief History of SAS 2
SAS: A Complete Programming Language 2
SAS Enterprise Guide: A Graphical User Interface for SAS 4
So How Does SAS Enterprise Guide Work? 5
Examples of Enhancing the Generated Code 8
Examples of Writing Your Own Code 11
Summary 12

Chapter 2 Understanding Coding with SAS Enterprise Guide 13

Introduction 14
The Structure of a SAS Program 14
Writing Your Own Code: The Code Node 14
Using and Customizing the Code Window 20
The Code Node in Process Flow Diagrams 24
Understanding Generated Code 25
Complementing the Generated Code 29
Adding Code to the SAS Enterprise Guide Start-up File 30
Adding Code before or after a Task or Code 31
Inserting Code into a Task 32
Using Generated Code as a Template 35
Summary 36
Exercises 36

Chapter 3 Getting Started 37

Introduction 38
Getting Ready to Face the World 38
We Know Where You Live 39
Formats and Functions 40
A Final Word on Options 41
Query-Free Filtering 41
Do It Once—Use It Often 46
Using Macro Variables 46
Using Macro Functions 55
ODS: The Output Delivery System 58
What Is ODS All About? 58
Making Your Output Go Where You Want 59
Summary 62
Exercises 63

Chapter 4 Data Manipulation Part 1: Queries 65

Introduction 66
What Is SQL? 66
Basic Queries: What SAS Enterprise Guide Does Already 68
The Filter and Query Task 68
The Delete Data Sets and Formats Task 74
The Append Data Task 74
Indexes: Creation and Usage 75
Index Creation 76
Index Usage 78
Good Index, Bad Index 80
Updating and Validating Data 80
Deleting Rows 81
Inserting Rows 82
Updating 83
Integrity Checks 84
Advanced SQL Queries 88
Summary 88

Where to Look for More Information 89
Exercises 90

Chapter 5 Data Manipulation Part 2: DATA Step and Functions 91

Introduction 91
DATA Step Basics 92
Creating Multiple Tables 94
When Position Matters 96
SAS Functions 103
Summary 104
Where to Look for More Information 104
Exercises 105

Chapter 6 Seeing Data Differently 107

Introduction 108
Basic Formats: The Create Formats Task 108
Reviewing Existing Formats 112
Creating Picture Formats 113
    Formatting Numbers 113
    Formatting Dates and Times 116
Multilabel Formats 117
Using Formats as Look-up Tables 120
Creating Informats 122
Summary 123
Where to Look for More Information 123
Exercises 124

Chapter 7 Enhancing Report Output 125

Introduction 126
More ODS 126
Improving Titles 134
    Improving BY Lines 135
    Page Numbers 137
    Basic Formatting 138
Adding Hyperlinks 138
One-Stop Reporting 140
    Hyperlinks Revisited 150
Trafficlighting 152
Documents, The ODS Waiting Room 161
    Combining Output 161
    Varying Output 163
Summary 167
Where to Look for More Information 167
Exercises 168

Chapter 8 Graphical Output 169

Introduction 169
SAS Enterprise Guide Graphical Output 170
Enhancing SAS Enterprise Guide Graphs 171
    More Linking 172
    Exploding Pies 177
    Detail Pies 181
Extra SAS Graphical Output 186
Summary 188
Where to Look for More Information 188
Exercises 189

Chapter 9 Macros: Reusable Programming 191

Introduction 191
What Is a Macro? 192
Converting a Program to a Macro 192
Converting a Task to a Macro 196
Including Macros 197
The Biggest Exploding Pie 198
Summary 202
Where to Look for More Information 202
Exercises 202

Appendix A Directory of Procedures Supported by SAS Enterprise Guide 203

Directory of Procedures 204
Task Cross-Reference 231
Category Cross-Reference 234

Appendix B Selected Additional SAS Procedures 241

Appendix C Data Used in This Book 247

Appendix D Solutions to Exercises 253

Index 269
