

CONTENTS

Preface to the Third Edition.....	ix
Preface to the Second Edition	xi
Preface to the First Edition.....	xiii

Chapter 1 – Introduction & Basics

1.1 Statistics—the Field	1
1.2 Probability Distributions	4
1.3 Study Design Features.....	9
1.4 Descriptive Statistics	13
1.5 Inferential Statistics	16
1.6 Summary.....	21

Chapter 2 – Topics in Hypothesis Testing

2.1 Significance Levels	23
2.2 Power	25
2.3 <i>One-Tailed</i> and <i>Two-Tailed</i> Tests	26
2.4 p-Values.....	27
2.5 Sample Size Determination.....	27
2.6 Multiple Testing.....	30
2.7 Summary.....	40

Chapter 3 – The Data Set TRIAL

3.1 Introduction.....	41
3.2 Data Collection	41
3.3 Creating the Data Set TRIAL.....	44
3.4 Statistical Summarization.....	47
3.5 Summary.....	54

Chapter 4 – The *One-Sample t-Test*

4.1 Introduction.....	55
4.2 Synopsis.....	55
4.3 Examples	56
4.4 Details & Notes	63

Chapter 5 – The *Two-Sample t-Test*

5.1 Introduction.....	67
5.2 Synopsis.....	67
5.3 Examples	68
5.4 Details & Notes	73

Chapter 6 – One-Way ANOVA	
6.1 Introduction.....	79
6.2 Synopsis.....	79
6.3 Examples.....	82
6.4 Details & Notes	88
Chapter 7 – Two-Way ANOVA	
7.1 Introduction.....	95
7.2 Synopsis.....	95
7.3 Examples.....	98
7.4 Details & Notes	119
Chapter 8 – Repeated Measures Analysis	
8.1 Introduction.....	125
8.2 Synopsis.....	125
8.3 Examples.....	129
8.4 Details & Notes	160
Chapter 9 – The Crossover Design	
9.1 Introduction.....	171
9.2 Synopsis.....	172
9.3 Examples.....	174
9.4 Details & Notes	185
Chapter 10 – Linear Regression	
10.1 Introduction.....	191
10.2 Synopsis.....	191
10.3 Examples.....	194
10.4 Details & Notes	209
Chapter 11 – Analysis of Covariance	
11.1 Introduction.....	221
11.2 Synopsis.....	222
11.3 Examples.....	225
11.4 Details & Notes	246
Chapter 12 – The Wilcoxon Signed-Rank Test	
12.1 Introduction.....	253
12.2 Synopsis.....	253
12.3 Examples.....	254
12.4 Details & Notes	260
Chapter 13 – The Wilcoxon Rank-Sum Test	
13.1 Introduction.....	263
13.2 Synopsis.....	263
13.3 Examples.....	265
13.4 Details & Notes	270

Chapter 14 – The <i>Kruskal-Wallis Test</i>	
14.1 Introduction.....	273
14.2 Synopsis.....	273
14.3 Examples.....	275
14.4 Details & Notes	279
Chapter 15 – The <i>Binomial Test</i>	
15.1 Introduction.....	283
15.2 Synopsis.....	283
15.3 Examples.....	285
15.4 Details & Notes	289
Chapter 16 – The <i>Chi-Square Test</i>	
16.1 Introduction.....	293
16.2 Synopsis.....	293
16.3 Examples.....	295
16.4 Details & Notes	308
Chapter 17 – Fisher’s <i>Exact Test</i>	
17.1 Introduction.....	317
17.2 Synopsis.....	317
17.3 Examples.....	318
17.4 Details & Notes	321
Chapter 18 – McNemar’s <i>Test</i>	
18.1 Introduction.....	325
18.2 Synopsis.....	325
18.3 Examples.....	326
18.4 Details & Notes	335
Chapter 19 – The <i>Cochran-Mantel-Haenszel Test</i>	
19.1 Introduction.....	341
19.2 Synopsis.....	341
19.3 Examples.....	343
19.4 Details & Notes	355
Chapter 20 – <i>Logistic Regression</i>	
20.1 Introduction.....	361
20.2 Synopsis.....	362
20.3 Examples.....	366
20.4 Details & Notes	386
Chapter 21 – The <i>Log-Rank Test</i>	
21.1 Introduction.....	397
21.2 Synopsis.....	398
21.3 Examples.....	399
21.4 Details & Notes	408

Chapter 22 – The Cox Proportional Hazards Model	
22.1 Introduction.....	413
22.2 Synopsis.....	414
22.3 Examples.....	415
22.4 Details & Notes	424
Chapter 23 – Exercises	
23.1 Introduction.....	429
23.2 Exercises	429
23.3 Appropriateness of the Methods.....	431
23.4 Summary.....	435
Appendix A – Probability Tables	
A.1 Probabilities of the Standard Normal Distribution.....	438
A.2 Critical Values of the Student t-Distribution	439
A.3 Critical Values of the Chi-Square Distribution	440
Appendix B – Common Distributions Used in Statistical Inference	
B.1 Notation.....	441
B.2 Properties	442
B.3 Results	443
B.4 Distributional Shapes.....	445
Appendix C – Basic ANOVA Concepts	
C.1 Within- vs. Between-Group Variation	447
C.2 Noise Reduction by Blocking	449
C.3 Least Squares Mean (LS-mean).....	453
Appendix D – SS Types I, II, III, and IV Methods for an Unbalanced Two-Way Layout	
D.1 SS Types Computed by SAS.....	457
D.2 How to Determine the Hypotheses Tested.....	459
D.3 Empty Cells.....	464
D.4 More Than Two Treatment Groups.....	465
D.5 Summary.....	468
Appendix E – Multiple Comparison Methods	
E.1 Introduction.....	471
E.2 Multiple Comparisons of Means	472
E.3 Multiple Comparisons of Binomial Proportions	482
E.4 Summary.....	487
Appendix F – Data Transformations	
F.1 Introduction.....	489
F.2 The Log Transformation.....	490

Appendix G – SAS Code for Exercises in Chapter 23.....	493
Appendix H – Finding Adjusted Alphas for Interim Analyses— SAS Examples	
H.1 Introduction	499
H.2 Pocock’s Approach	499
H.3 O’Brien-Flemming Approach	501
H.4 Lan-DeMets Cumulative α -Spending Function	503
H.5 Lan-DeMets α -Spending Function References.....	506
Appendix I – Commonly Used Parameterizations in Logistic Regression Models	
I.1 Introduction.....	509
I.2 The ‘Reference’ Parameterization.....	509
I.3 The ‘Effect’ Parameterization	511
I.4 More Than Two Nominal Levels.....	512
I.5 Other Parameterizations	515
References.....	517
Index	521
