<b>About This Book</b> .....	<b>xi</b>
<b>About The Authors</b> .....	<b>xvii</b>
<b>Acknowledgments</b> .....	<b>xix</b>
<b>Chapter 1: Implementation Strategies</b> .....	<b>1</b>
Why “CDISC It”? .....	1
Which Models to Use and Where .....	4
Starting with the Clinical Data Acquisition Standards Harmonization (CDASH) Standard .....	5
Implementation Plans and the Need for Governance .....	5
SDTM Considerations .....	6
ADaM Considerations .....	8
Chapter Summary .....	11
<b>Chapter 2: SDTM Metadata and Define.xml for Base SAS Implementation</b> <b>13</b>	
SDTM Metadata .....	14
Table of Contents Metadata .....	15
Variable-Level Metadata .....	16
Codelist Metadata .....	19
Value-Level Metadata .....	22
Computational Method Metadata .....	24
Building define.xml .....	25
Define File Header Metadata .....	26
Define File Creation SAS Program .....	26
Chapter Summary .....	27
<b>Chapter 3: Implementing the CDISC SDTM with Base SAS</b> .....	<b>29</b>
Base SAS Macros and Tools for SDTM Conversions .....	30
Creating an SDTM Codelist SAS Format Catalog .....	31

Creating an Empty SDTM Domain Dataset .....	32
Creating an SDTM --DTC Date Variable .....	35
Creating an SDTM Study Day Variable.....	36
Sorting the Final SDTM Domain Dataset .....	37
Building SDTM Datasets.....	38
Building the Special-Purpose DM and SUPPDM Domains .....	38
Building the LB Findings Domain .....	42
Building a Custom XP Findings Domain .....	45
Building the AE Events Domain .....	47
Building the EX Exposure Interventions Domain .....	49
Building Trial Design Model (TDM) Domains.....	51
Chapter Summary .....	55
<b>Chapter 4: Implementing CDISC SDTM with the SAS Clinical Standards     Toolkit and Base SAS.....</b>	<b>57</b>
SAS Clinical Standards Toolkit Background.....	57
Clinical Standards Setup for Study XYZ123 .....	58
Building SDTM Datasets.....	61
Base SAS Macros and Tools for SDTM Conversions.....	61
Building the Special-Purpose DM and SUPPDM Domains.....	63
Building define.xml.....	66
Chapter Summary .....	71
<b>Chapter 5: Implementing the CDISC SDTM with SAS Clinical     Data Integration.....</b>	<b>73</b>
SAS Clinical Data Integration Introduction.....	74
SAS Clinical Data Integration Metadata .....	74
Classifications of SAS Clinical Data Integration Metadata.....	74
Setup of SAS Clinical Data Integration Metadata .....	75
SAS Clinical Data Integration Study Setup.....	78
Define the Clinical Study and Subfolders .....	79
Register Source Datasets and Define Target SDTM Datasets.....	82
Setting SAS Clinical Data Integration Defaults .....	87
Creating SDTM Domains .....	89
Creating the Special-Purpose DM and SUPPDM Domain .....	89
Creating the AE (Adverse Events) Events Domain.....	97
Creating the XP Pain Scale Customized Findings Domain.....	99
Creating the EX Exposure Interventions Domain .....	100
Creating the LB Laboratory Findings Domain.....	100

Creating the Trial Design Model Domains.....	101
Using Customized Code in SDTM Production .....	101
Templating Your SDTM Conversion Jobs for Reuse .....	102
Using SAS Clinical Data Integration to Create define.xml.....	103
Chapter Summary .....	106
<b>Chapter 6: ADaM Metadata and ADaM Define.xml.....</b>	<b>107</b>
Metadata Spreadsheets .....	108
Variable Metadata in ADaM.....	108
Analysis Parameter Value-Level Metadata.....	109
Analysis Results Metadata .....	110
Building define.xml.....	113
Define.xml Navigation and Rendering.....	113
Chapter Summary .....	116
<b>Chapter 7: Implementing ADaM .....</b>	<b>117</b>
ADaM Tools.....	118
ISO 8601 Date and DateTime Conversions.....	118
Merging In Supplemental Qualifiers .....	120
ADSL – The Subject-Level Dataset .....	125
The ADaM Basic Data Structure (BDS).....	128
ADAE – Adverse Event Analysis Datasets .....	131
ADTTE – The Time-to-Event Analysis Dataset.....	133
Chapter Summary .....	136
<b>Chapter 8: SDTM Validation .....</b>	<b>139</b>
SAS Clinical Standards Toolkit .....	140
SAS Clinical Standards Toolkit Setup .....	140
SAS Clinical Standards Toolkit Validation Program .....	142
SAS Clinical Data Integration.....	146
OpenCDISC Validator .....	150
Installing OpenCDISC Validator.....	151
Running OpenCDISC Validator (Graphical User Interface).....	151
Evaluating the Report File and Report Results .....	152
Modifying the Configuration Files.....	156
Running OpenCDISC Validator in Command Line Mode .....	158
Chapter Summary .....	162

<b>Chapter 9: Validating ADaM Data</b> .....	<b>163</b>
ADaM's Published Validation Checks .....	163
OpenCDISC Validator .....	164
Running the OpenCDISC Validator as a Macro .....	165
Traceability Checks .....	167
Chapter Summary .....	170
<b>Chapter 10: CDISC Data Review and Analysis</b> .....	<b>171</b>
Safety Evaluations with JMP Clinical .....	172
Getting Started with JMP Clinical.....	172
Safety Analyses .....	176
Patient Profiles .....	180
Customizing JMP Clinical.....	181
One PROC Away with ADaM Datasets .....	183
Chapter Summary .....	185
<b>Chapter 11: Integrated Data and Regulatory Submissions</b> .....	<b>187</b>
Regulatory Guidance .....	188
Data Integration Challenges .....	188
Data Integration Strategies .....	189
<b>Representing Subjects Who Appear in Multiple Studies in Subject-Level</b>	
<b>Datasets</b> .....	<b>190</b>
Deciding on Which Data to Integrate .....	193
Coding Dictionary Issues.....	194
Summary of Data Integration Strategies .....	195
Data Integration and Submission Tools.....	195
Setting Variable Lengths Based on the Longest Observed Value.....	196
Converting from Native SAS to Version 5.0 Transport Files .....	199
Converting from Version 5.0 Transport Files to Native SAS .....	200
Getting Submission Ready .....	200
Chapter Summary .....	201
<b>Chapter 12: Other Topics</b> .....	<b>203</b>
Standard for Exchange of Non-Clinical Data .....	203
HL7 Messaging .....	204
BRIDG Model .....	205
Protocol Representation Model.....	205

FDA Janus Clinical Trials Repository .....	206
CDISC Model Versioning .....	206
Future CDISC Directions .....	207
Chapter Summary .....	208
<b>Appendix A: Source Data Programs .....</b>	<b>209</b>
adverse Dataset .....	210
demographics Dataset .....	211
dosing Dataset.....	212
laboratory Dataset .....	215
pain scores Dataset .....	221
<b>Appendix B: SDTM Metadata.....</b>	<b>223</b>
Appendix B.1 - Table of Contents Metadata .....	223
Appendix B.2 - Variable-Level Metadata .....	224
Appendix B.3 - Codelist Metadata.....	226
Appendix B.4 - Value-Level Metadata.....	228
Appendix B.5 - Computational Method Metadata .....	228
Appendix B.6 - Define Header Metadata .....	228
<b>Appendix C: ADaM Metadata .....</b>	<b>229</b>
Appendix C.1 - Define Header Metadata .....	229
Appendix C.2 - Table of Contents Metadata .....	230
Appendix C.3 - Variable-Level Metadata .....	230
Appendix C.4 - Parameter-Level Metadata .....	232
Appendix C.5 - Computational Method Metadata .....	232
Appendix C.6 - Codelist Metadata .....	232
Appendix C.7 - Analysis Results Metadata.....	233
Appendix C.8 - External Links Metadata .....	234
<b>Appendix D: %make_define SAS Macro.....</b>	<b>235</b>
%make_define SAS Macro.....	235
Additional SAS Code Comments .....	249
<b>Index .....</b>	<b>253</b>
