Changing the Game: Technology and Analytics

Stephen Brobst, Teradata
Paul Kent, SAS Institute Inc.

ABSTRACT

A new era of high-performance analytics has emerged. In-database processing for deep analytics enables much faster turnaround for developing new analytic models. In addition, it dramatically reduces the costs associated with data replication into shadow file systems. This paper examines these trends and quantifies the impacts. The paper also provides best practices for executing a phased deployment strategy of these capabilities.

No paper was submitted for publication.
