z/OS SAS® Deployment: This Isn't Your Father's Install Anymore!

Dan Taylor, SAS Institute Inc.
Keefe Hayes, SAS Institute Inc.

ABSTRACT

Topic Area: Technology Solutions - Extending SAS® across the Enterprise.

With SAS® 9.2, the SAS® Deployment Wizard for z/OS arrives, and SAS on z/OS fully participates in the automated download, installation, configuration, and deployment of SAS software on z/OS. No more cut and paste configuration; no more manual deployment of content.

The SAS Deployment Wizard is a portable dialog-based tool that drives a series of prompts to define a SAS installation. This tool provides a common approach that allows a site to follow a uniform methodology for installing SAS across all hosts in the Enterprise.

Come to this session to witness the ease with which SAS can be installed on z/OS through the power of the SAS Deployment Wizard.
