Paper 326-2009

Keeping Things Going with SAS® Reporting: A Look at Various SAS® 9.2 Server Options for Performance Considerations

Diane Hatcher, SAS Institute Inc.
Justin Choy, SAS Institute Inc.

ABSTRACT

The platform for Business Analytics has always provided options for improving the performance of your SAS® reporting applications, including client-side pooling and load balancing servers. SAS® 9.2 introduces additional options to the mix for the Workspace Server and OLAP Server. This paper will review the various options and provide you with some guidelines on which ones to consider for your environment.
