SAS® and Teradata: Accelerating the Power to Know

Robert Ray, SAS Institute Inc.
Wayne Thompson, SAS Institute Inc.

ABSTRACT

The collaboration between SAS® and Teradata on enterprise class scoring has produced the SAS® Scoring Accelerator for Teradata which deploys SAS® Enterprise Miner™ scoring models in a highly scalable format to a Teradata server. Once deployed, these models have been shown to be linearly scalable, completely leveraging the power of the parallel shared-nothing architecture of Teradata. This presentation will cover the model deployment process from start to finish and include performance profiles from a multi-node Teradata server. There will also be a preview of how this technology will be integrated into SAS® Model Manager 2.2.
