Dynamic Prompts Make Data Cascading Easy: Introducing New Features in SAS® 9.2 Prompt Framework

Diane Hatcher, SAS Institute Inc.
LanChien Hsueh, SAS Institute Inc.

ABSTRACT

The SAS® 9.2 Prompt Framework provides a consistent and easy user interface for creating prompts that can be used across applications and platforms. The Prompt Framework is available across all desktop and web clients in the platform for Business Analytics. A new feature in SAS 9.2, Dynamic Prompts, enables users to create custom prompts that easily extract necessary information based on previously entered prompted values. This paper will highlight Dynamic Prompts and give an overview of other new features of the SAS 9.2 Prompt Framework, such as Cascading Prompts, Relative Date/Time Prompts, Shared Prompts, and Range Prompts.

No paper was submitted for publication in the *Proceedings*. Check <http://support.sas.com/rnd/papers/> or contact the author.
