

Paper 360-2009

BI Strategy at the Belgian Federal Government Economy

Frank De Saer, Belgian Federal Government Economy

ABSTRACT

The core business of the Federal Government Economy is to deliver all relevant information to its stakeholders (civilians, companies, politicians, etc.) to support a balanced, growing economy. Over the years, a lot of process improvement projects were implemented to have this information more performant and to give access to this information to several users/decision makers in a more performant and flexible way. ICT played a powerful role in these processes. One of the strategic projects was the introduction of a BI platform for which SAS® was chosen. In the presentation, we will show you the impact on the organization, the processes and work methodology including some technical realisations.

No paper was submitted for publication.
