BI User Roles: Managing and Integrating your BI Environment

Anand Chitale, SAS Institute Inc.

Justin Choy, SAS Institute Inc.

ABSTRACT

With the increasing number of Business Intelligence (BI) users and their multiple roles and responsibilities, managing the BI environment is a topic of concern for IT from a security as well as a user experience point of view. SAS® 9.2 provides enhanced ways of controlling and configuring the BI environment via client-based roles and capabilities. This paper will discuss how to create roles and make effective use of these roles and capabilities to manage and integrate the BI environment.
