Scheduling and Distribution: Key Reporting Capability for Productive Enterprise Business Intelligence

Anand Chitale, SAS
Justin Choy, SAS

ABSTRACT

With business intelligence becoming a commodity, every business user is in need of a report that provides relevant information in the right format and at the right time. With the majority of business users as information consumers, making the reports available across the enterprise is a key towards productive decision making process.

This paper discusses various options provided by SAS® Web Reports and its in-built integrated report scheduling and distribution mechanism. It provides a self-service scheduling mechanism for report users and allows distribution of pre-created reports in various formats to enterprise-wide information consumers in a secured and easy-to-use fashion.

No paper was submitted for publication in the *Proceedings*. Check <http://support.sas.com/rnd/papers/> or contact the author.
