# Combining SAS/ETS® and JMP® Software for Powerful Econometric Modeling

Mark Little, SAS  
David DeNardis, SAS

## ABSTRACT

This presentation demonstrates new JMP® add-ins that make powerful SAS/ETS® econometric modeling features available from within the JMP environment, and shows how you can perform state-of-the-art economic analysis by combining SAS® power with JMP flexibility. The new JMP platforms demonstrated include regression modeling with autocorrelated errors and autoregressive conditional heteroscedasticity, regression modeling for qualitative and limited dependent variables, unobserved components time series models, panel data models, and seasonal adjustment of time series.
