Travelers Insurance: Streamlining SAS® Deployments with HP and Red Hat

Tim Nolan, Travelers

ABSTRACT

With six SAS® Business Analytics applications deployed across multiple business units including claims research, business insurance, and personal insurance, Travelers Insurance is streamlining operations and saving money by modernizing, standardizing, and consolidating on HP ProLiant Servers running Red Hat Enterprise Linux. This session outlines Travelers' IT and business selection criteria and decisions (around systems, operating platform, storage, management, staffing, etc.) as well as the resulting migration benefits and lessons learned.
