

Paper 387-2012

Analytic Infrastructure Design Considerations

Bryan Harris, Visti
Jessica Dunn, Bank of America

ABSTRACT

Did you know that half of productivity gains realized across all industries can be attributed to IT? Going forward, SAS expects analytics to complement IT innovation in driving additional productivity gains. In this session, we'll make sense of the buzz around cloud, big data, high-performance computing and approachable analytics, and share how you can design the right infrastructure to support a range of analytic disciplines that boost productivity and confer competitive advantage.
