Michael Ames, SAS

ABSTRACT

An overview of SAS integration with Hadoop. Unlike traditional databases, Hadoop scales to address the needs of large-scale data-intensive distributed applications in a reliable, cost-effective manner. In this session, we'll present examples and use cases highlighting connectivity with SAS/ACCESS®, introduce a new Base® SAS procedure and file interface extensions specifically for Hadoop. Finally, we'll provide a sneak peek into the future of embedding SAS processing within Hadoop.
