The Future of SAS® Deployment: From MSI Packages to Web-Based Control

Mark Schneider, SAS

ABSTRACT

Take a glimpse into the not-so-distant future of installing and configuring SAS software. We'll describe, and in some cases demonstrate, short-term enhancements to SAS® 9.3 functionality, including MSI and RPM provisioning, automatic hot-fix download and deployment, and console/linemode for the SAS® Download Manager, SAS® Deployment Wizard, and SAS® Deployment Manager. We'll also outline longer-term initiatives like Web-based orchestration of multi-machine deployments and support for "hot" maintenance, applied without shutting down your SAS environment.
