Predictive Analytics Reporting Framework

Heidi Hiemstra
Director, Research
Reusable predictive models

Common Definitions of terms

Multi-Institutional collaboration

Student-level watch lists for targeted interventions

Measurable Intervention results

39 forward-thinking US Colleges and Universities

Data-driven insights

National, non-profit
Literature-based tool to inventory and benchmark student services and interventions

- Includes 600+ total interventions at PAR member institutions
- Ability to compare among all PAR institutions

Higher Education
Collaborative for Institutional Effectiveness and Student Success

Student Success Matrix (SSMx)
Customized models to predict student risk and give insight on student attributes.
Comparative Benchmarking

Student-level data + common data definitions = deeply drillable comparative reports
