Incorrect ETL job definition for “Load DDS GL_ACCOUNT Table”

SAS FM 4.1

The problem is the column length in work table views is incorrect for “RETAINED_EARN_ROLL_FWD_CD”. This causes an incorrect mapping from character (32) to character (3) and results in errors when running job.

To resolve the problem, take the following steps:

1. View job in ETL
2. Select properties for “Data Validation”
3. Select “Mapping” tab
4. Change Column length on Target table for column “RETAINED_EARN_ROLL_FWD_CD” from 3 to 32.
5. Select properties for “Fact Table Lookup”
6. Select “Mapping” tab
7. Change Column length on Target tables for column “RETAINED_EARN_ROLL_FWD_CD” from 3 to 32.

There is a corrected job available here:

Load DDS GL_ACCOUNT Table.xml
