

SAS[®] Enterprise Business Intelligence Training

Do you ever wish you could have the right information, at the right time?

With the platform for SAS Business Analytics, you can access the right data when you need it, enabling you to make better-informed decisions in less time.

Fast-Track Training

SAS offers “fast-track” training courses, where content is consolidated from multiple courses into a concentrated five-day training session. These accelerated courses are for individuals who are capable of learning large amounts of information in a short time period.

Flexible Delivery Methods

Choose from several delivery methods to fit your preferred learning style, including:

- Classroom training (public or on-site).
- Live Web courses.
- SAS[®] e-Learning.

For more information

For more information about platform training, including how to choose the right courses for your needs:

BUSINESS USER

I access existing information as well as create my own reports and analyses using point-and-click applications. I use SAS[®] Add-In for Microsoft Office, SAS[®] Web Report Studio and the SAS[®] Information Delivery Portal.

The courses within this job role teach business users, including middle managers and other information consumers, how to access existing information and create ad hoc analyses and reports using point-and-click applications.

Software addressed:

- SAS[®] Add-In for Microsoft Office
- SAS[®] Information Delivery Portal
- SAS[®] Web Report Studio

BI CONTENT DEVELOPER

I understand my organization's data and the applications I need to create reports and analyses for myself and others in my organization. I use SAS[®] Information Map Studio, SAS[®] BI Dashboard, SAS[®] Enterprise Guide[®] for the creation of stored processes. I may also use SAS[®] OLAP Cube Studio and SAS[®] Visual BI (powered by JMP[®] software).

The courses within this job role teach business analysts (and others who may perform this role) how to structure their organizations' data for easy reporting and analysis. Business analysts typically create content that will be utilized by other people in their organizations.

Software addressed:

- SAS[®] BI Dashboard
- SAS[®] Enterprise Guide[®]
- SAS[®] Information Map Studio
- SAS[®] OLAP Server/SAS[®] OLAP Cube Studio
- SAS[®] Stored Processes
- SAS[®] Visual BI

BI APPLICATIONS DEVELOPER

I'm responsible for building, implementing and customizing applications. I use SAS® development applications such as SAS/AF®, SAS® AppDev Studio™ and SAS/IntrNet®.

The courses within this job role teach BI applications developers (and others who may perform this role) how to build, implement and customize applications for the SAS platform.

Software addressed:

- SAS® AppDev Studio™
- SAS/AF®
- SAS/IntrNet®

PROJECT MANAGER

I'm responsible for managing the strategy, objectives and tasks for a SAS project. I have a high-level understanding of SAS technologies and a detailed knowledge of project management methodologies. Also, I am involved in implementing our Business Intelligence Competency Center (BICC).

The courses within this job role teach project managers how to establish and evolve a Business Intelligence Competency Center in their organizations.
