

## Fee-Waived Software for Local, Special Interest and Regional SAS® Users Groups

As requests for fee-waived software continue to grow, it has become necessary to establish guidelines for this opportunity. The intended use for the fee-waived software is solely for the operational needs of the registered SAS users group.

Examples of these operational needs include reporting and analyzing your group's data as well as maintaining your group's membership lists. In order to perform these tasks, SAS has created a Users Group bundle of fee-waived software that we believe includes all of the software necessary to run your registered group.

### Fee-Waived Software Bundle

- Base SAS® (includes SAS® Enterprise Guide®)
- SAS/GRAPH®
- SAS/STAT®
- SAS/AF®
- SAS/FSP®

### Guidelines

The software license must be renewed annually. The fee-waived software is intended to be used:

- For Windows desktop platform.
- By *only* members of the Executive Board of the registered SAS users group.
- For the operational (business) needs of the registered SAS users group.

If you feel you need additional software or you need to run the software on a platform other than Windows desktop, please send a detailed description as to what additional software you are requesting, why you need it and how you intend to use this software to [ugsupport@sas.com](mailto:ugsupport@sas.com).
